Troubleshooting

Read me first

Please read this manual before using the device to ensure safe and proper use.

- Descriptions are based on the device's default settings.
- Some content may differ from your device depending on the region, service provider, or device's software.
- Content (high quality content) that requires high CPU and RAM usage will affect the overall performance of the device. Apps related to the content may not work properly depending on the device's specifications and the environment that it is used in.
- Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung.
- Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customise the operating system may cause the device or apps to work improperly.
- Software, sound sources, wallpapers, images, and other media provided with this device are licensed for limited use. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Users are entirely responsible for illegal use of media.
- You may incur additional charges for data services, such as messaging, uploading and downloading, auto-syncing, or using location services depending on your data plan. For large data transfers, it is recommended to use the Wi-Fi feature.
- Default apps that come with the device are subject to updates and may no longer be supported without prior notice. If you have questions about an app provided with the device, contact a Samsung Service Centre. For user-installed apps, contact service providers.
- Modifying the device's operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss. These actions are violations of your Samsung licence agreement and will void your warranty.

Maintaining water and dust resistance

The device may be damaged if water or dust enters the device. Follow these tips carefully to prevent damage to the device and to maintain the water- and dust-resistant performance of the device.

- Do not immerse the device in water deeper than 1 m and keep it submerged for more than 30 minutes.
- Ensure that the back cover is tightly closed. Otherwise, it may not provide protection from water and dust.
- Do not immerse the device in water for extended periods.
- Do not expose the device to **water moving with force**, such as water running from a tap, ocean waves, or waterfalls.
- Do not open the device's covers when the device is in water or in very humid places, such as swimming pools or bathrooms.
- Do not open the back cover using wet hands or when the device is wet.
- **The rubber seal fitted to the back cover** is an important component of the device. Take care when opening and closing the back cover to avoid damaging the rubber seal. Also, ensure that the rubber seal is free from debris, such as sand or dust to prevent damage to the device.
- Do not detach or remove the back cover from the device.
- **If the device is exposed to freshwater, dry it thoroughly with a clean, soft cloth. If the device is exposed to any liquid other than freshwater, rinse the device with freshwater immediately and dry it thoroughly with a clean, soft cloth. Failure to rinse the device in freshwater and dry it as instructed may cause the device to suffer from operability or cosmetic issues.**
- The back cover may be loosened **if the device is dropped or receives an impact**. Ensure that all the covers are properly aligned and tightly closed.

- **If the device has been immersed in water or the microphone or the speaker is wet,** sound may not be heard clearly during a call. Ensure that the microphone or the speaker is clean and dry by wiping it with a dry cloth.
- The water-resistant design of the device causes it to vibrate slightly in certain conditions. Vibrations in these conditions, such as when the volume level is high, are normal and do not affect the device's performance.
- The touch screen and other features may not work properly **if the device is used in water or in other liquids.**
- **Your device has been tested in a controlled environment and certified to be water- and dust-resistant in specific situations (meets requirements of classification IP67 as described by the international standard IEC 60529 - Degrees of Protection provided by Enclosures [IP Code]; test conditions: 15 - 35 °C, 86 - 106 kPa, 1 metre, 30 minutes).** Despite this classification, your device is not impervious to water damage in any situation.

Caution: situations that could cause damage to your device or other equipment

Note: notes, usage tips, or additional information

Getting started

Package contents

Check the product box for the following items:

- Device
- Battery
- Quick start guide

- The items supplied with the device and any available accessories may vary depending on the region or service provider.
- The supplied items are designed only for this device and may not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from your local Samsung retailer. Make sure they are compatible with the device before purchase.
- Use only Samsung-approved accessories. Some accessories, such as docking devices, may not have the same water- and dust-resistance certification.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Samsung website.

Device layout

- Do not cover the antenna area with your hands or other objects. This may cause connectivity problems or drain the battery.
- Using a Samsung-approved screen protector is recommended. Unapproved screen protectors may cause the sensors to malfunction.

Buttons

Button	Function
 Power	<ul style="list-style-type: none"> • Press and hold to turn the device on or off. • Press to turn on or lock the screen.
 Recent apps	<ul style="list-style-type: none"> • Tap to open the list of recent apps. • Tap and hold to access additional options for the current screen.
 Home	<ul style="list-style-type: none"> • Press to turn on the screen while the screen is locked. • Press to return to the Home screen. • Press twice to launch S Voice. • Press and hold to launch Google.
 Back	<ul style="list-style-type: none"> • Tap to return to the previous screen.
 Volume	<ul style="list-style-type: none"> • Press to adjust the device volume.

Using the SIM or USIM card and battery

Installing the SIM or USIM card and battery

Insert the SIM or USIM card provided by the mobile telephone service provider, and the included battery.

- Only microSIM cards work with the device.
- Some LTE services may not be available depending on the service provider. For more information about service availability, contact your service provider.

1 Remove the back cover.

Be careful not to damage your fingernails when you remove the back cover.

Do not bend or twist the back cover excessively. Doing so may damage the cover.

2 Insert the SIM or USIM card with the gold-coloured contacts facing downwards.

- Do not insert a memory card into the SIM card slot. If a memory card happens to be lodged in the SIM card slot, take the device to a Samsung Service Centre to remove the memory card.
- Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards.

3 Insert the battery.

4 Replace the back cover.

- Ensure that the back cover is closed tightly.
- Use only Samsung-approved back covers and accessories with the device.

Removing the SIM or USIM card and battery

1 Remove the back cover.

2 Pull out the battery.

- 3 Press the SIM or USIM card with your finger, and then pull it out.

Charging the battery

Use the charger to charge the battery before using it for the first time. A computer can be also used to charge the battery by connecting them via the USB cable.

Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

- When the battery power is low, the battery icon appears empty.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid disconnecting from the network or losing power during a data transfer, always use these apps after fully charging the battery.

- 1 Connect the USB cable to the USB power adaptor.

2 Plug the USB cable into the multipurpose jack.

- Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.
- Ensure that the the back cover is closed tightly to prevent water and dust from entering the device. Open or loose back cover may allow water and dust to enter the device and cause damage.

3 Plug the USB power adaptor into an electric socket.

- The device can be used while it is charging, but it may take longer to fully charge the battery.
- If the device receives an unstable power supply while charging, the touch screen may not function. If this happens, unplug the charger from the device.
- While charging, the device may heat up. This is normal and should not affect the device's lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.
- If the device is not charging properly, take the device and the charger to a Samsung Service Centre.

- 4 After fully charging, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Do not remove the battery before removing the charger. This may damage the device.

To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging.

Reducing the battery consumption

Your device provides options that help you save the battery power. By customising these options and deactivating features in the background, you can use the device longer between charges:

- When you are not using the device, switch to sleep mode by pressing the Power button.
- Close unnecessary apps using the task manager.
- Deactivate the Bluetooth feature.
- Deactivate the Wi-Fi feature.
- Deactivate auto-syncing of apps.
- Decrease the backlight time.
- Decrease the screen brightness.

Using a memory card

Installing a memory card

Your device accepts memory cards with maximum capacities of 64 GB. Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.
- Use caution to insert the memory card right-side up.

- The device supports the FAT and the exFAT file systems for memory cards. When inserting a card formatted in a different file system, the device asks to reformat the memory card.
- Frequent writing and erasing of data shortens the lifespan of memory cards.
- When inserting a memory card into the device, the memory card's file directory appears in the **My Files** → **SD card** folder.

- 1 Remove the back cover.
- 2 Insert a memory card with the gold-coloured contacts facing downwards.

- 3 Replace the back cover.

Removing the memory card

Before removing the memory card, first unmount it for safe removal. On the Home screen, tap **Apps** → **Settings** → **Storage** → **Unmount SD card**.

- 1 Remove the back cover.
- 2 Pull out the memory card.
- 3 Replace the back cover.

Do not remove the memory card while the device is transferring or accessing information. Doing so can cause data to be lost or corrupted or can damage the memory card or device. Samsung is not responsible for losses that result from the misuse of damaged memory cards, including the loss of data.

Formatting the memory card

A memory card formatted on a computer may not be compatible with the device. Format the memory card on the device.

On the Home screen, tap **Apps** → **Settings** → **Storage** → **Format SD card** → **Format SD card** → **Erase everything**.

Before formatting the memory card, remember to make backup copies of all important data stored in the device. The manufacturer's warranty does not cover loss of data resulting from user actions.

Turning the device on and off

Press and hold the Power button for a few seconds to turn on the device.

When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

To turn off the device, press and hold the Power button, and then tap **Power off**.

Follow all posted warnings and directions from authorised personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals.

Locking and unlocking the screen

Pressing the Power button turns off the screen and locks it. Also, the screen turns off and automatically locks if the device is not used for a specified period.

To unlock the screen, press the Power button or the Home button and flick your finger in any direction within the unlock screen area.

You can change the unlock code to unlock the screen. Refer to [Changing the screen lock method](#) for more information.

Basics

Using the touch screen

- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- To avoid damaging the touch screen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.

- The device may not recognise touch inputs close to the edges of the screen, which are outside of the touch input area.
- Leaving the touch screen idle for extended periods may result in afterimages (screen burn-in) or ghosting. Turn off the touch screen when you do not use the device.
- It is recommended to use fingers when you use the touch screen.

Tapping

To open an app, to select a menu item, to press an on-screen button, or to enter a character using the keyboard on the screen, tap it with a finger.

Tapping and holding

Tap and hold an item or the screen for more than 2 seconds to access available options.

Dragging

To move an item, tap and hold it and drag it to the target position.

Double-tapping

Double-tap on a webpage or image to zoom in. Double-tap again to return.

Flicking

Flick left or right on the Home screen or the Apps screen to see another panel. Flick up or down to scroll through a webpage or a list of items, such as contacts.

Spreading and pinching

Spread two fingers apart on a webpage, map, or image to zoom in a part. Pinch to zoom out.

Home screen layout

Home screen

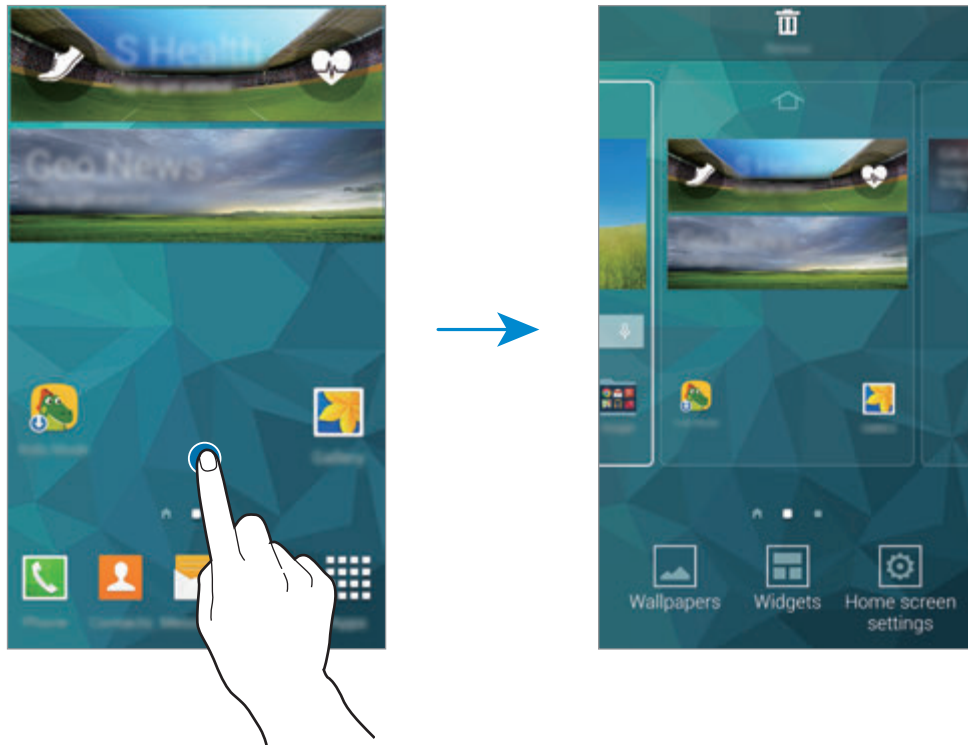

The Home screen is the starting point for accessing all of the device's features. It displays widgets, shortcuts to apps, and more. Widgets are small apps that launch specific app functions to provide information and convenient access on your Home screen.

To view other panels, scroll left or right, or tap one of the screen indicators at the bottom of the screen. To customise the Home screen, refer to [Managing the Home screen](#).

Home screen options

On the Home screen, tap and hold an empty area, or pinch your fingers together to access the available options.

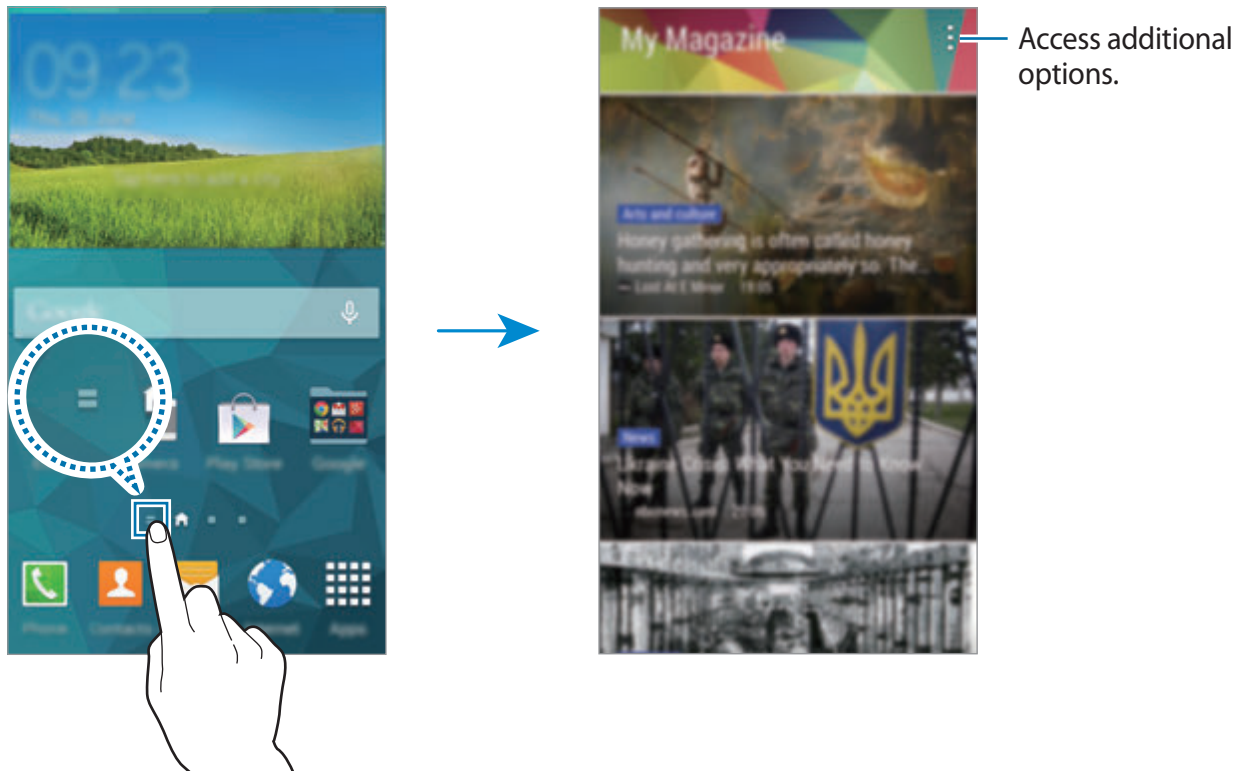

Using My Magazine

My Magazine displays live social network updates and news that you are interested in.

To activate **My Magazine**, tap and hold an empty area on the Home screen. Then, tap **Home screen settings** and tick **My Magazine**.

On the Home screen, tap  or scroll right to open **My Magazine**.

To select the content to be displayed, tap  → **Settings**, and then select the categories that interest you.

To update the content automatically when **My Magazine** opens, tap  → **Settings**, and then tick **Auto refresh on opening**.

Apps screen

The Apps screen displays icons for all apps, including newly installed apps.

On the Home screen, tap **Apps** to open the Apps screen. To view other panels, scroll left or right, or select a screen indicator at the bottom of the screen. To customise the Apps screen, refer to [Managing the Apps screen](#).

Indicator icons

Indicator icons appear on the status bar at the top of the screen. The icons listed in the table below are most common.

The status bar may not appear at the top of the screen in some apps. To display the status bar, drag down from the top of the screen.

Icon	Meaning
	No signal
	Signal strength
	Roaming (outside of normal service area)
	GPRS network connected
	EDGE network connected
	UMTS network connected
	HSDPA network connected
	HSPA+ network connected
	LTE network connected
	Wi-Fi connected
	Bluetooth feature activated
	GPS activated
	Call in progress
	Missed call
	Air browse feature activated
	Smart stay or smart pause feature activated
	Synced with the web
	Connected to computer
	No SIM or USIM card

Icon	Meaning
✉	New text or multimedia message
🕒	Alarm activated
🔇	Mute mode activated
🔊	Vibration mode activated
✈	Flight mode activated
⚠	Error occurred or caution required
🔋	Battery power level

Notifications and quick setting panels

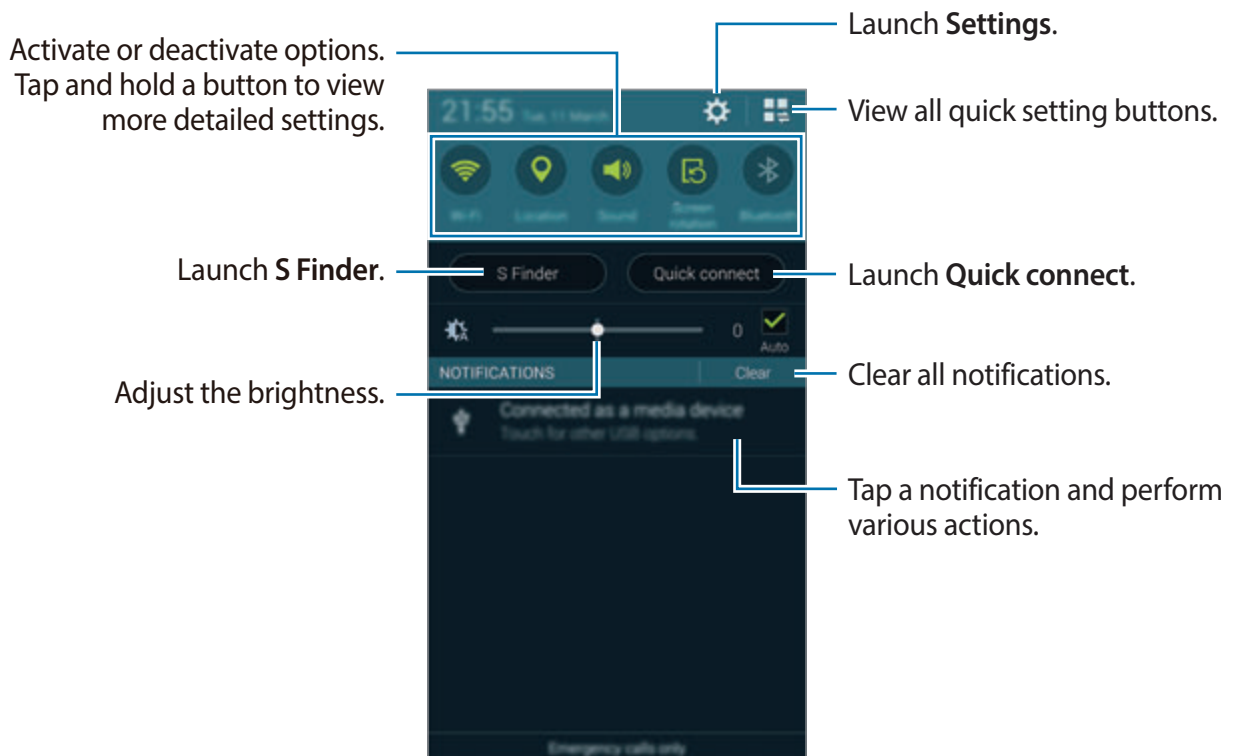

Using the notifications panel

When you receive new notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notifications panel and view the details.

To open the notifications panel, drag the status bar downwards. To close the notifications panel, drag the bar from the bottom of the screen upwards.

You can use the following functions on the notifications panel.

Adjusting the brightness

To set the device to adjust the brightness automatically, tick **Auto**. To manually adjust the brightness, drag the brightness adjustment bar to the left or right.

When the battery power is low, the brightness adjustment bar disappears from the notifications panel.

Rearranging quick setting buttons

To rearrange quick setting buttons on the notifications panel, tap , tap and hold an item, and then drag the item to another location.

Using the quick setting panel

You can activate or deactivate some features on the notifications panel. To activate or deactivate more features, open the quick setting panel.

To open the quick setting panel, drag the status bar downwards with two fingers.

Alternatively, tap  on the notifications panel. To close the quick setting panel, drag the bar from the bottom of the screen upwards.

Tap the following options to activate or deactivate them. You can view more detailed settings if you tap and hold a button.

- **Wi-Fi:** Refer to [Wi-Fi](#) for more information.
- **Location:** Refer to [Location](#) for more information.
- **Sound / Vibrate / Mute:** Select a sound mode.
- **Screen rotation:** Allow or prevent the interface from rotating when you rotate the device.

Some apps do not allow screen rotation.

- **Bluetooth:** Refer to [Bluetooth](#) for more information.
- **Mobile data:** Refer to [Data usage](#) or [Mobile networks](#) for more information.
- **U. power saving:** Refer to [Ultra power saving mode](#) for more information.
- **Toolbox:** Refer to [Toolbox](#) for more information.

- **Mobile hotspot:** Refer to [Tethering and Mobile hotspot](#) for more information.
- **Screen Mirroring:** Refer to [Screen Mirroring](#) for more information.
- **NFC:** Refer to [NFC](#) for more information.
- **Sync:** When you activated this feature, the device automatically sync apps, such as calendar or email.
- **Smart stay:** When you activate this feature, the screen stays on as long as you look at it.
- **Power saving:** Refer to [Power saving feature](#) for more information.
- **Blocking mode:** Refer to [Blocking mode](#) for details.
- **Flight mode:** Refer to [Flight mode](#) for more information.
- **Private mode:** Refer to [Private mode](#) for more information.
- **Touch sensitivity:** Refer to [Increasing touch screen sensitivity](#) for more information.

Opening apps

On the Home screen or the Apps screen, select an app icon to open it.

To open the list of recently-used apps, tap  and select an app icon to open.

Closing an app

Tap  → , and then tap **End** next to an app to close it. To close all running apps, tap **End all**. Alternatively, tap  → .

Installing or uninstalling apps

Samsung Apps (GALAXY Apps)

Use this app to purchase and download apps.

Tap **Samsung Apps (GALAXY Apps)** on the Apps screen.

This app may not be available depending on the region or service provider.

Installing apps

Browse apps by category or tap  to search for a keyword.

Select an app to view information about it. To download free apps, tap **Free**. To purchase and download apps where charges apply, tap the button that shows the app's price.

To change the auto update settings, tap  → **Settings** → **Auto update apps**, and then select an option.

Play Store

Use this app to purchase and download apps.

Tap **Play Store** on the Apps screen.

Installing apps

Browse apps by category or tap  to search for a keyword.

Select an app to view information about it. To download free apps, tap **INSTALL**. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap  → **Settings** → **Auto-update apps**, and then select an option.

Downloading suggested apps

You can view and download dedicated Galaxy device apps.

On the Apps screen, tap **⋮** → **GALAXY Essentials**. Alternatively, on the Home screen, tap the **GALAXY Essentials** widget, and then tap  next to an app.

To download all apps in the list, tap **Download all**.

Managing apps

Uninstalling or disabling apps

To disable default apps, on the Apps screen, tap **⋮** → **Uninstall/disable apps**.  appears on the apps that you can disable. Select an app and tap **Disable**.

To uninstall downloaded apps, on the Apps screen, tap **⋮** → **Downloaded apps** → **⋮** → **Uninstall**. Alternatively, on the Apps screen, tap **Settings** → **Application manager**, select an app, and then tap **Uninstall**.

Enabling apps

On the Apps screen, tap **⋮** → **Show disabled apps**, select apps, and then tap **Done**. Alternatively, on the Apps screen, tap **Settings** → **Application manager**, scroll to **DISABLED**, select an app, and then tap **Enable**.

- Hiding apps: Hide apps in the Apps screen only. You can continue to use hidden apps.
- Disabling apps: Disable selected default apps that cannot be uninstalled from the device. You cannot use disabled apps.
- Uninstalling apps: Uninstall downloaded apps.

Entering text

Keyboard layout

A keyboard appears automatically when you enter text to send messages, create memos, and more.

Text entry is not supported in some languages. To enter text, you must change the input language to one of the supported languages.

Changing the input language

Tap  → **Select input languages**, and then select the languages to use. If you select two or more languages, you can switch between the input languages by sliding the space key left or right.

Changing the keyboard layout

Tap , select a language under **INPUT LANGUAGES**, and then select a keyboard layout to use.

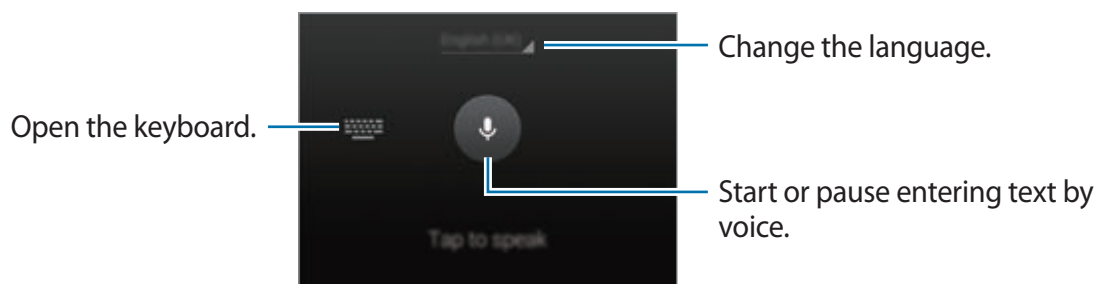

On **3x4 keyboard**, a key has three or four characters. To enter a character, tap the corresponding key repeatedly until the desired character appears.

Using additional keyboard functions

Tap and hold  to use the following functions. Other icons may appear instead of the  icon depending on the last function that was used.

-  : Enter text by voice.

-  : Add an item from the clipboard.
-  : Change the keyboard settings.
-  : Enter emoticons.

Copying and pasting

- 1 Tap and hold over text.
- 2 Drag  or  to select the desired text, or tap **Select all** to select all text.
- 3 Tap **Copy** or **Cut**. The selected text is copied to the clipboard.
- 4 Place the cursor where the text is to be inserted and tap  → **Paste**. To paste text that you have previously copied, tap  → **Clipboard** and select the text.

Screen capture

Capture a screenshot while using the device.

Press and hold the Home button and the Power button simultaneously. The image is saved in the **Gallery** →  → **Album** → **Screenshots** folder. After capturing a screenshot, you can edit the image and share it with others.

You can also capture screenshots using other methods. Refer to [Palm swipe to capture](#) for more information.

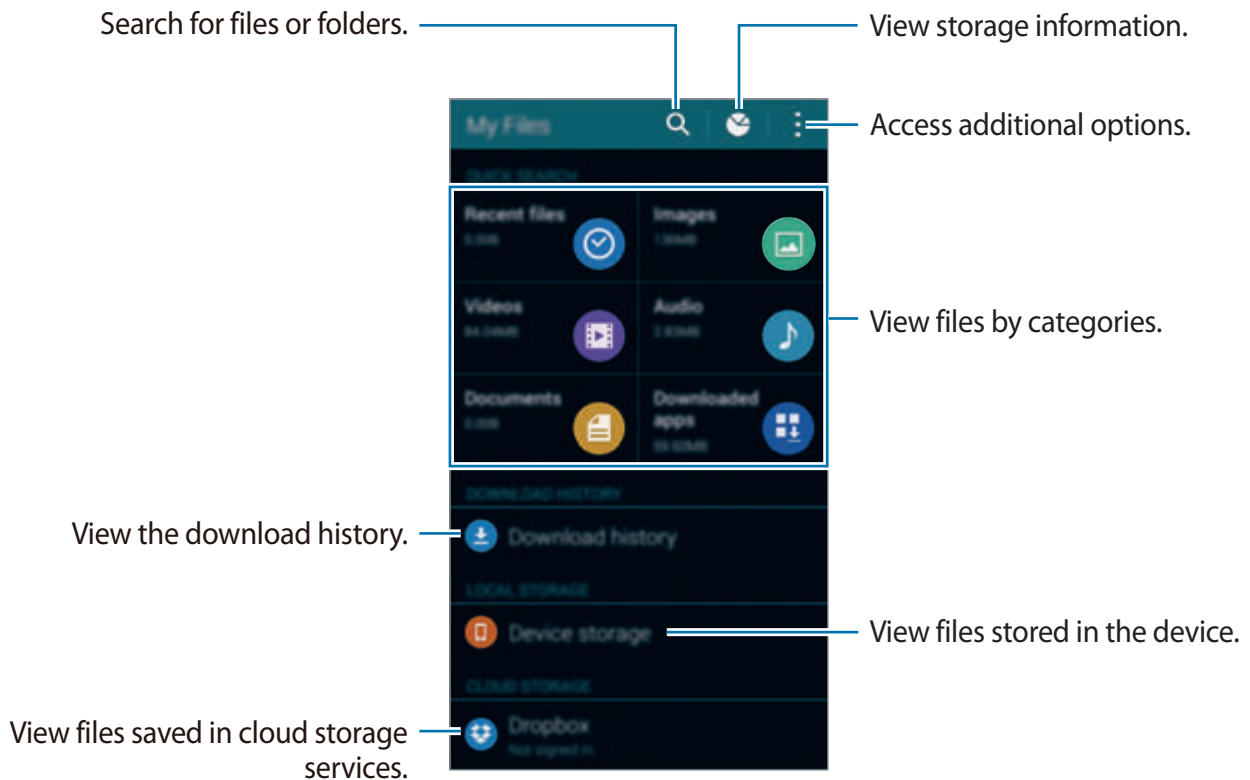

It is not possible to capture a screenshot while using some apps.

My Files

About My Files

Use this app to access various files stored in the device or in other locations, such as cloud storage services.

Tap **My Files** on the Apps screen.

Tap  and use the following options:

- **Add shortcut:** Add a shortcut to a folder on the My Files main screen.
- **Add FTP server:** Add an FTP server shortcut on the My Files main screen.
- **Scan for nearby devices:** Search for devices that have media sharing activated.
- **Settings:** Change the file manager settings.

Viewing files

Tap **My Files** on the Apps screen.

Select a folder to open it. To go up a level in the directory, tap . To return to the My Files main screen, tap .

Select a folder, tap , and then use the following options:

- **Select:** Select files or folders to apply options.
- **Delete:** Delete files or folders.
- **Create folder:** Create a folder.
- **View as:** Change the view mode.
- **Sort by:** Sort files or folders.
- **Add shortcut:** Add a shortcut to a folder on the My Files main screen or to the Home screen.
- **Settings:** Change the file manager settings.

Tap and hold a file or folder, and then use the following options:

- : Share files with others.
- : Delete files or folders.
-  → **Move:** Move files or folders to another folder.
-  → **Copy:** Copy files or folders to another folder.
-  → **Rename:** Rename a file or folder.
-  → **Add shortcut:** Add a shortcut to a folder on the My Files main screen or to the Home screen.
-  → **Zip:** Compress files or folders to create a zip file.
-  → **Details:** View file or folder details.

Power saving feature

Power saving mode

Save the battery power by limiting the device's functions.

On the Apps screen, tap **Settings** → **Power saving** → **Power saving mode**, and then tap the **Power saving mode** switch to activate it. Alternatively, open the quick setting panel and tap **Power saving** to activate it.

Select from the following options:

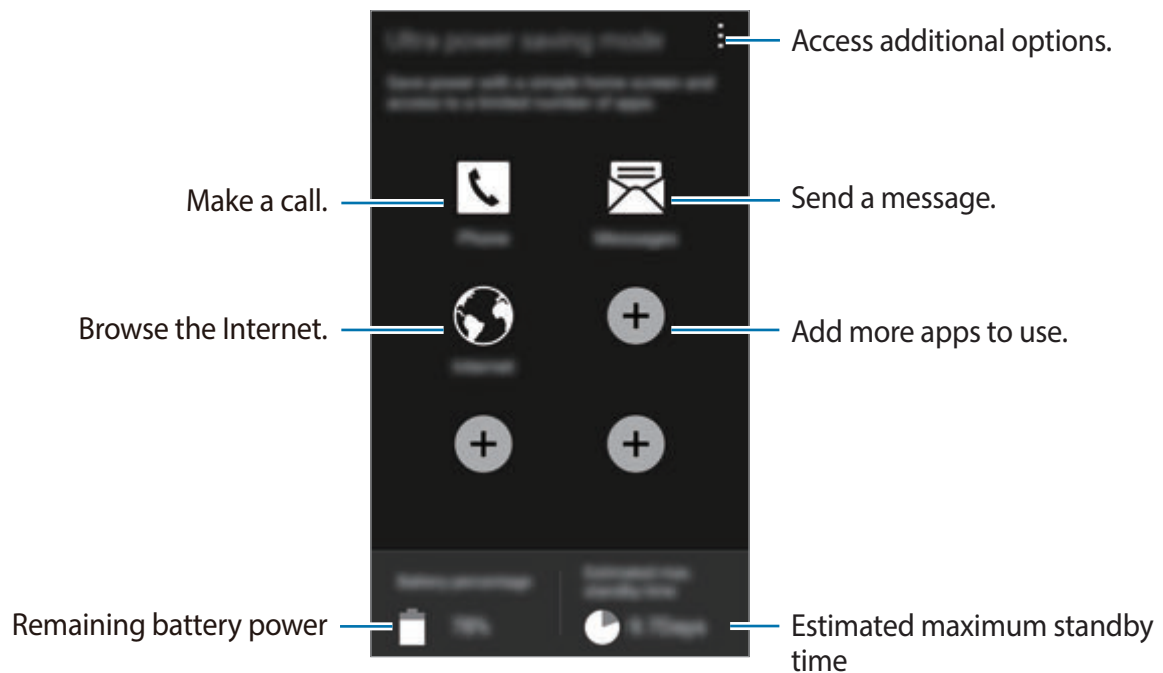

- **Restrict background data:** Prevent apps that are running in the background from using a mobile data connection.
- **Restrict performance:** Limit various options, such as turning off the backlight for the Recent apps button and the Back button.
- **Greyscale mode:** Display colours on the screen as grey tones.

Ultra power saving mode

Use this mode to extend the device's battery power. In ultra power saving mode, the device performs the following:

- Displays colours on the screen as grey tones.
- Restricts the available apps to essential and selected apps only.
- Deactivates the mobile data connection when the screen turns off.
- Deactivates the Wi-Fi and Bluetooth features.

On the Apps screen, tap **Settings** → **Power saving** → **Ultra power saving mode**, and tap the **Ultra power saving mode** switch to activate it. Alternatively, open the quick setting panel and tap **U. power saving** to activate it.

To add an app to the Home screen, tap **+** and select an app.

To remove an app from the Home screen, tap **:** → **Remove**, select an app with **−**, and then tap **OK**.

To change the settings for ultra power saving mode, such as network connectivity or sound, tap **:** → **Settings**.

To deactivate ultra power saving mode, tap **:** → **Disable ultra power saving mode**.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Viewing help information

To view help information to learn how to use the device and apps, on the Apps screen, tap **Settings** → **Help**.

To view help information for an app while you are using the app, tap **:** → **Help**.

Some apps may not include help information.

Network connectivity

Mobile data

Connect the device to a mobile network to use the Internet or share media files with other devices. Refer to [Data usage](#) for additional options.

On the Apps screen, tap **Settings** → **Data usage**, and then tick **Mobile data**. Alternatively, open the quick setting panel and tap **Mobile data** to activate it.

Wi-Fi

Connect the device to a Wi-Fi network to use the Internet or share media files with other devices. Refer to [Wi-Fi](#) for additional options.

- Your device uses a non-harmonised frequency and is intended for use in all European countries. The WLAN can be operated in the EU without restriction indoors, but cannot be operated outdoors.
- Turn off Wi-Fi to save the battery when not in use.

- 1 On the Apps screen, tap **Settings** → **Wi-Fi**, and then tap the **Wi-Fi** switch to activate it.
- 2 Select a network from the list of detected Wi-Fi networks. Networks that require a password appear with a lock icon.
- 3 Tap **Connect**. After the device connects to the Wi-Fi network, the device will automatically connect to it any time it is available.

Adding Wi-Fi networks

If the desired network does not appear in the networks list, tap **Add Wi-Fi network** at the bottom of the networks list. Enter the network name in **Network SSID**, select the security type and enter the password if it is not an open network, and then tap **Connect**.

Activating Wi-Fi Passpoint

Wi-Fi Passpoint enables the device to search for and connect to a certified Wi-Fi network. You can use the Passpoint feature to connect to public Wi-Fi networks that support automated authentication. When you move to a new location, it will search for and connect to another certified Wi-Fi network.

This feature may not be available depending on the region.

Tap **→ Advanced**, and then tick **Passpoint**.

Forgetting Wi-Fi networks

Any network that has ever been used, including the current network, can be forgotten so the device will not automatically connect to it. Select the network in the networks list and tap **Forget**.

Using Smart network switch

Use this feature to maintain a stable network connection when you browse webpages, download content, and more.

On the Apps screen, tap **Settings** → **Wi-Fi**, and then tick **Smart network switch**. The device automatically switches from a Wi-Fi network to a mobile network when the current Wi-Fi network is weak or unstable. When the Wi-Fi network signal becomes strong, the device switches from the mobile network back to the Wi-Fi network.

Tethering and Mobile hotspot

About tethering and mobile hotspots

Use this feature to share the device's mobile data connection with computers and other devices if an Internet connection is unavailable. Connections can be made via the Wi-Fi feature, USB, or the Bluetooth feature.

You may incur additional charges when using this feature.

Using the mobile hotspot

Use your device as a mobile hotspot to share your device's mobile data connection with other devices.

- 1 On the Apps screen, tap **Settings** → **Tethering and Mobile hotspot** → **Mobile hotspot**.
- 2 Tap the **Mobile hotspot** switch to activate it.
 -  appears on the status bar. Other devices can find your device in the Wi-Fi networks list.
 - To set a password for the mobile hotspot, tap  → **Configure hotspot** and select the level of security. Then, enter a password and tap **Save**.
- 3 On the other device's screen, search for and select your device from the Wi-Fi networks list.
- 4 On the connected device, use the device's mobile data connection to access the Internet.

Using USB tethering

Share the device's mobile data connection with other devices via a USB cable.

- 1 On the Apps screen, tap **Settings** → **Tethering and Mobile hotspot**.
- 2 Connect your device to the computer via the USB cable.
- 3 Tick **USB tethering**.
 appears on the status bar when the two devices are connected.
- 4 On the computer, use your device's mobile data connection.

Using Bluetooth tethering

Share the device's mobile data connection with other devices via Bluetooth. Ensure that the computer that you connect to supports the Bluetooth feature.

- 1 Pair your device with the other device via Bluetooth. Refer to [Pairing with other Bluetooth devices](#) for more information.
- 2 On the Apps screen of your device, tap **Settings** → **Tethering and Mobile hotspot**.
- 3 Tick **Bluetooth tethering**.
- 4 On the connected device, open the Bluetooth settings screen, tap  → **Internet access**.
 appears on the status bar when the two devices are connected.
- 5 On the connected device, use the device's mobile data connection to access the Internet.

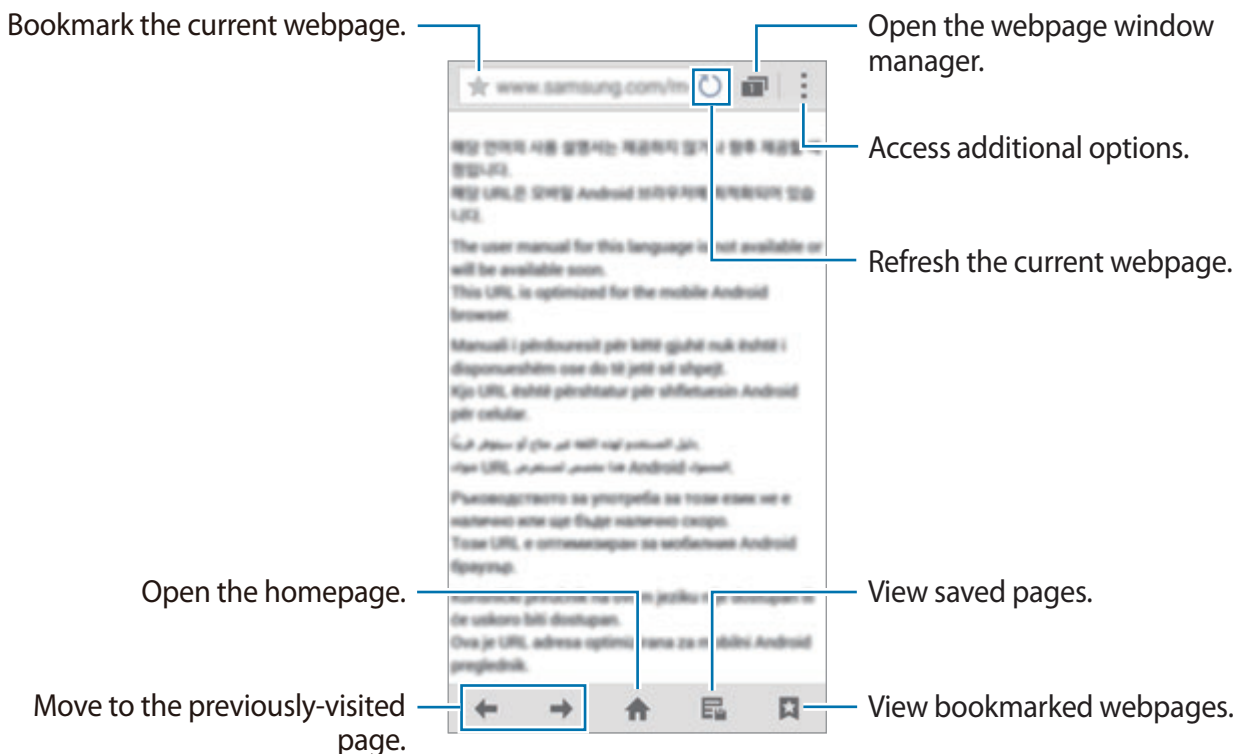

The connection methods may vary depending on the connected devices.

Internet

Browsing webpages

- 1 Tap **Internet** on the Apps screen.
- 2 Tap the address field. To change the search engine, tap the search engine icon next to the web address field.
- 3 Enter the web address or a keyword, and then tap **Go**. To search the web by voice, tap . To view the toolbars, drag your finger downwards slightly on the screen.

Setting the homepage

Tap **Internet** on the Apps screen.

Tap  → **Settings** → **Set homepage** → **Homepage**, and then select one of the following:

- **Default page:** Set the device's default webpage as your homepage.
- **Current page:** Set the current webpage as your homepage.
- **Quick access:** Set the quick access list as your homepage.
- **Most visited sites:** Set the list of most-visited webpages as your homepage.
- **Other:** Set a preset webpage as your homepage.

While viewing a webpage, tap  to open the homepage.

Managing the quick access list

You can quickly access your frequently-visited webpages by adding them to the quick access list.

To add a webpage to the quick access list, open the webpage that you want to add. Then, tap  → **Add to Quick access**.

To delete a webpage from the quick access list, tap and hold the webpage icon that you want to delete. Then, drag it to **Delete** at the top of the screen.

Managing the webpage history

Tap **Internet** on the Apps screen.

Tap  → **History** to open a webpage from the list of recently-visited webpages.

To delete webpages, tap  → **Delete** or **Clear history**.

Motions & usability features

Motions and gestures

Excessive shaking or impact on the device may result in unintended inputs. Control motions properly.

Direct call

On the Apps screen, tap **Settings** → **Motions and gestures** → **Direct call**, and then tap the **Direct call** switch to activate it.

While viewing call, message, or contact details, pick up and hold the device to your ear to make a call.

Smart alert

On the Apps screen, tap **Settings** → **Motions and gestures** → **Smart alert**, and then tap the **Smart alert** switch to activate it.

If you have missed calls or new messages, the device will vibrate when you pick it up.

This feature may not work if the screen is turned on or the device is not on a flat surface.

Mute/Pause

On the Apps screen, tap **Settings** → **Motions and gestures** → **Mute/Pause**, and then tap the **Mute/Pause** switch to activate it.

Covering screen with hand

Cover the screen with your palm to mute incoming calls or alarms, or to pause media playback.

Turning device over

Turn the device over to mute incoming calls or alarms, or to pause media playback.

Palm swipe to capture

On the Apps screen, tap **Settings** → **Motions and gestures** → **Palm swipe to capture**, and then tap the **Palm swipe to capture** switch to activate it.

Place the side of your hand on the screen and sweep it across the screen from the right to the left or vice versa to capture a screenshot. The image is saved in the **Gallery** → **≡** → **Album** → **Screenshots** folder. After capturing a screenshot, you can edit the image and share it with others.

It is not possible to capture a screenshot while using some apps.

Air view

Hover over an item or the screen with your finger to preview content or view information in a pop-up window.

On the Apps screen, tap **Settings** → **Air view**, and then tap the **Air view** switch to activate it.

Toolbox

You can easily launch various apps from the toolbox while using other apps.

On the Apps screen, tap **Settings** → **Toolbox**, and then tap the **Toolbox** switch to activate it. Alternatively, open the quick setting panel and tap **Toolbox** to activate it.  appears on the screen.

To launch an app, tap  and select an app.

To move the toolbox, tap  and drag it to another location.

To change the apps in the toolbox, tap and hold , and then drag it to **Edit**.

To hide the toolbox, tap and hold , and then drag it to **Remove**.

Increasing touch screen sensitivity

Use this feature to operate the screen while wearing gloves.

On the Apps screen, tap **Settings** → **Display**, and then tick **Increase touch sensitivity**.

Alternatively, open the quick setting panel and tap **Touch sensitivity** to activate it.

- Use leather gloves for better recognition while touching the screen. Other types of material may not be recognised.
- For best results, tap the screen firmly while wearing gloves.
- This feature may not work properly when you are using S view.

Personalising

Managing the Home and Apps screens

Managing the Home screen

Adding items

Tap and hold an app or a folder from the Apps screen, and then drag it to the Home screen.

To add widgets, on the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold a widget, and then drag it to the Home screen.

Moving and removing an item

Tap and hold an item on the Home screen, and then drag it to a new location.

To move the item to another panel, drag it to the side of the screen.

You can also move frequently-used apps to the shortcuts area at the bottom of the Home screen.

To remove an item, tap and hold the item. Then, drag it to **Remove** that appears at the top of the screen.

Creating a folder

- 1 On the Home screen, tap and hold an app, and then drag it to **Create folder** that appears at the top of the screen.
- 2 Enter a folder name.
- 3 Tap , select the apps to move to the folder, and then tap **Done**.

Managing folders

To rename a folder, select a folder, and then tap the existing folder name. Enter a new name for the folder and tap **Done**.

To change the colour of a folder, select a folder, tap , and then select a colour.

To move more apps to a folder, tap and hold an app, and then drag it to the folder.

To move an app from a folder, select a folder, tap and hold the app, and then drag it to a new location.

Managing panels

On the Home screen, tap and hold an empty area to add, move, or remove a panel.

To add a panel, scroll left to the last panel, and then tap .

To move a panel, tap and hold a panel preview, and then drag it to a new location.

To remove a panel, tap and hold a panel preview, and then drag it to **Remove** at the top of the screen.

To set a panel as the main Home screen, tap .

Managing the Apps screen

Changing view mode

On the Apps screen, tap  → **View as** and select a sorting method.

Hiding apps

Hide apps that you do not want to see on the Apps screen.

On the Apps screen, tap  → **Hide apps**, select apps, and then tap **Done**.

To display hidden apps, tap  → **Show hidden apps**, select apps, and then tap **Done**.

Moving items

On the Apps screen, tap  → **Edit**. Tap and hold an item and drag it to a new location.

To move the item to another panel, drag it to the side of the screen.

To move an item to a new panel, drag it to **Create page** that appears at the top of the screen.

You can move folders only in the folder panel.

Creating folders

1 On the Apps screen, tap  → **Create folder**. Alternatively, tap  → **Edit**, tap and hold an app, and then drag it to **Create folder** that appears at the top of the screen.

2 Enter a folder name.

3 Tap , select the apps to move to the folder, and then tap **Done**.

The new folder is added to the folder panel of the Apps screen.

Managing folders

To rename a folder, select a folder and tap the existing folder name. Enter a new name for the folder and tap **Done**.

To change the colour of a folder, select a folder, tap , and then select a colour.

To move more apps to a folder, tap  → **Edit**, tap and hold an app, and then drag it to the folder.

To move an app from a folder, tap  → **Edit**, select a folder, tap and hold the app, and then drag it to an app panel. If you move the app from the folder to the folder panel, a new folder is created.

Setting wallpaper and ringtones

Setting wallpaper

Set an image or photo stored in the device as wallpaper for the Home screen or the locked screen.

- 1 On the Home screen, tap and hold an empty area, and then tap **Wallpapers**. Alternatively, on the Apps screen, tap **Settings** → **Wallpaper**.
- 2 Select a screen to change or apply wallpaper to.
- 3 Scroll left or right and select from images displayed at the bottom of the screen.
To select photos taken by the device's camera or other images, tap **More images**.
- 4 Tap **Set wallpaper** or **Done**.

Changing ringtones

Change ringtones for incoming calls and notifications.

On the Apps screen, tap **Settings** → **Sound**.

To set a ringtone for incoming calls, tap **Ringtones**, select a ringtone, and then tap **OK**. To use a song stored in the device or in your account as a ringtone, tap **Add**.

To set a ringtone for notifications, tap **Notifications**, select a ringtone, and then tap **OK**.

Changing the screen lock method

You can change the way that you lock the screen to prevent others from accessing your personal information.

On the Apps screen, tap **Settings** → **Lock screen** → **Screen lock**, and then select a screen lock method. The device requires an unlock code whenever unlocking it.

If the unlock code is forgotten, take the device to a Samsung Service Centre to reset it.

Pattern

Draw a pattern by connecting four dots or more, and then draw the pattern again to verify it. Set a backup PIN to unlock the screen when you forget the pattern.

PIN

A PIN consists of numbers only. Enter at least four numbers, and then enter the password again to verify it.

Password

A password consists of characters and numbers. Enter at least four characters including numbers and symbols, and then enter the password again to verify it.

Fingerprint

Register your fingerprints to unlock the screen. Refer to [Finger Scanner](#) for more information.

Finger Scanner

For better fingerprint recognition

When you scan your fingerprints on the device, be aware of the following conditions that may affect the feature's performance:

- The Home button contains a fingerprint recognition sensor. Ensure that the Home button is not scratched or damaged by metal objects, such as coins, keys, and necklaces.
- The screen protector supplied with the device may cause the fingerprint recognition sensor to malfunction. Remove the screen protector to improve fingerprint sensitivity.
- Ensure that the fingerprint recognition area and your fingers are clean and dry.
- The device may not recognise fingerprints that are affected by wrinkles or scars.
- The device may not recognise fingerprints from small or thin fingers.
- To improve recognition performance, register fingerprints of the hand used most often to perform tasks on the device.
- Do not drag your finger too quickly or slowly. Drag your finger at a moderate speed to allow the device to recognise it.
- In dry environments, static electricity can build up in the device. Avoid using this feature in dry environments or before using the feature, discharge static electricity by touching a metal object.

Registering fingerprints

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Fingerprint manager**.
- 2 If you are registering more fingerprints, a fingerprint recognition pop-up window appears. Scan a registered fingerprint on the device and tap **+**.

- 3 Place your finger on the fingerprint area at the bottom centre of the screen.
- 4 Tap and hold the screen in the fingerprint area, and then drag your finger downwards over the Home button.

Repeat this action using the same finger until the fingerprint is registered.

If you bend your finger or use a fingertip, the device may not recognise your fingerprints.

- 5 If a pop-up window appears requesting a password, enter the alternative password, tap **Continue**, enter the alternative password again to verify it, and then tap **OK**. You can use the alternative password instead of scanning your fingerprints.
- 6 If a fingerprint lock pop-up window appears, tap **OK**. You can use your fingerprints to unlock the screen.

Managing registered fingerprints

You can delete or rename your registered fingerprints.

On the Apps screen, tap **Settings** → **Finger Scanner** → **Fingerprint manager**.

To delete fingerprints, tap **:** → **Deregister**, select fingerprints, and then tap **🗑** → **OK**.

To rename a fingerprint, tap and hold a fingerprint, tap **◆**, enter a new name, and then tap **OK**.

Changing the alternative password

You can change the password that you use as an alternative to scanning your fingerprints.

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Change alternative password**.
- 2 Enter the current alternative password and tap **Done**.
- 3 Enter a new password and tap **Continue**.
- 4 Enter the password again and tap **OK**.

Unlocking the screen with fingerprints

You can unlock the screen with the registered fingerprints.

On the Apps screen, tap **Settings** → **Finger Scanner** → **Screen lock** → **Fingerprint**.

Alternatively, on the Apps screen, tap **Settings** → **Lock screen** → **Screen lock** → **Fingerprint**.

Verifying the Samsung account password

Use fingerprints to verify your Samsung account password. You can use a fingerprint instead of entering your password, for example, when you purchase content from **Samsung Apps** (**GALAXY Apps**).

On the Apps screen, tap **Settings** → **Finger Scanner** → **Verify Samsung account**, and then tap the **Verify Samsung account** switch to activate it. Enter your Samsung account password and tap **Confirm**.

Using fingerprints for purchases via PayPal

You can make purchases by scanning your fingerprints.

This feature may not be available depending on the region or service provider.

- 1 On the Apps screen, tap **Settings** → **Finger Scanner** → **Pay with PayPal**.
- 2 Tap **Install** under **FIDO Ready™ support**.
- 3 Tap **Link** under **PayPal account**.
- 4 Follow the on-screen instructions to sign in to the PayPal website and register your fingerprints.

Private mode

About private mode

Use this mode to prevent others from using or accessing specific content, such as images and documents, stored on the device. You can save content to a specific location and deactivate private mode to hide items securely.

Hiding content

- 1 On the Apps screen, tap **Settings** → **Private mode**, and then tap the **Private mode** switch to activate it. Alternatively, open the quick setting panel and tap **Private mode** to activate it.
When you activate private mode for the first time, set an unlock code and a backup PIN.
- 2 Enter the private mode unlock code.
When this mode is activated,  appears at the top of the screen.

- 3 To select items to hide, tap and hold an item in the list, tick items to select, and then tap : → **Move to Private**, or tap **Move** → **Private** → **Move here**.

Items that are moved to private mode appear with  on them.

- 4 When you have selected the items to hide, on the Apps screen, tap **Settings** → **Private mode**, and then tap the **Private mode** switch to deactivate it. Alternatively, open the quick setting panel and tap **Private mode** to deactivate it.

The selected items will disappear from the screen.

Ensure that all files are saved or moved properly before deactivating private mode.

Viewing hidden content

You can only view hidden items when private mode is activated.

- 1 On the Apps screen, tap **Settings** → **Private mode**, and then tap the **Private mode** switch to activate it. Alternatively, open the quick setting panel and tap **Private mode** to activate it.
- 2 Enter the private mode unlock code.
- 3 On the Apps screen, tap **My Files** → **Private**.

All items moved in private mode appear on the screen.

Easy mode

Easy mode provides an easier user experience by using a simpler layout and bigger icons on the Home screen. You can access the most popular apps and frequently-used settings, and add shortcuts to your favourite contacts.

On the Apps screen, tap **Settings** → **Easy mode** → **Easy mode**, select apps to apply simpler layout, and then tap **Done**.

To return to standard mode, on the Home screen, tap **Easy settings** → **Easy mode** → **Standard mode** → **Done**.

Managing shortcuts

To add a shortcut to an app to the Home screen, scroll left, tap , and then select an app.

To add a shortcut to a contact on the Home screen, scroll right, tap .

To delete a shortcut from the Home screen, tap  → **Edit**, select an app or contact with .

Transferring data from your previous device

Using backup accounts

You can transfer backup data from your previous device to your new device using your Google or Samsung account. Refer to [Backing up and restoring data](#) for more information.

Using Samsung Smart Switch

You can transfer data of the previous device to a new device via Smart Switch (for mobiles and computers). Visit www.samsung.com/smartswitch for more information.

Samsung Smart Switch is not supported on some devices or computers.

Using Smart Switch Mobile

Use this app to transfer data from your previous iPhone or Android device to your new device. You can download the app from **Samsung Apps (GALAXY Apps)** or **Play Store**.

- 1 On your device, tap **Smart Switch Mobile**.
- 2 On your device, select an option depending on the previous device type and follow the on-screen instructions.

If the previous device is an Android device, ensure that the Smart Switch Mobile app is installed on the device. Refer to the help for more information.

Using Smart Switch with computers

Use this feature to import a backup of your data (from selected manufacturer's mobile devices) from a computer to your device. You can download the app from www.samsung.com/smartswitch.

- 1 Back up data from a previous device to the computer. For more information, contact the device's manufacturer.
- 2 On the computer, launch Smart Switch.
- 3 Connect your current device to the computer using the USB cable.
- 4 On the computer, click the manufacturer of the previous device and follow the on-screen instructions to transfer data to your device.

Using Samsung Kies

Import a backup of your data from your computer via Samsung Kies to restore data on your device. You can also back up data to the computer via Samsung Kies. Refer to [Connecting with Samsung Kies](#) for more information.

Setting up accounts

Adding accounts

Some apps used on your device require a registered account. Create accounts to have the best experience with your device.

On the Apps screen, tap **Settings** → **Accounts** → **Add account** and select an account service. Then, follow the on-screen instructions to complete the account setup.

To sync content with your accounts, select an account and tick items to sync.

Removing accounts

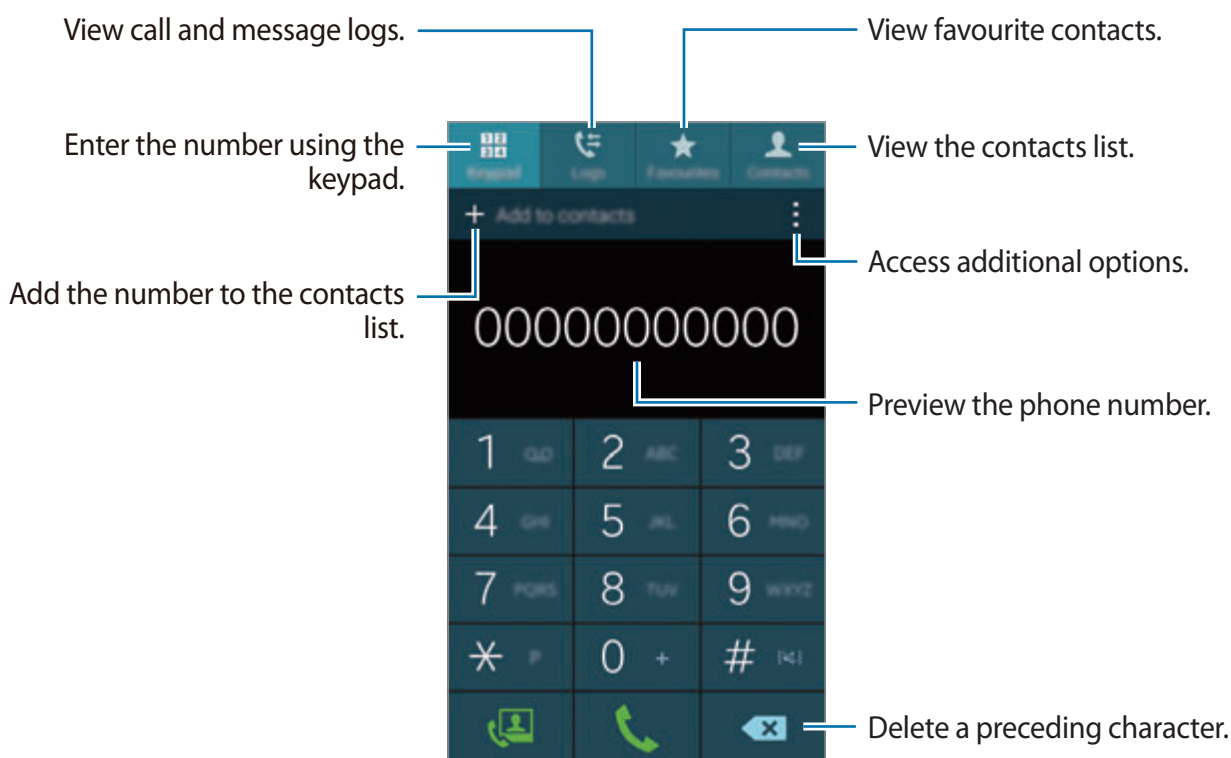

On the Apps screen, tap **Settings** → **Accounts**, select an account, and then tap **:** → **Remove account**.

Phone

Making calls

Tap **Phone** on the Apps screen.

Tap **Keypad**, enter a phone number, and then tap  to make a voice call, or tap  to make a video call. You can also make calls to phone numbers listed in **Logs**, **Favourites**, and **Contacts**.

Making calls from call logs or contacts list

Tap **Logs** or **Contacts**, and then drag a contact or a phone number to the right to make a call.

To deactivate the call by dragging an icon to the right feature, tap **⋮** → **Settings** → **Contacts**, and then deselect **Swipe to call or send msg.**

Making calls from the favourites list

You can easily call contacts that you communicate with frequently by adding them to the favourite contacts list.

To add contacts to the favourites list, tap **Contacts**, select a contact, and then tap ★.

To make a call to a favourite contact, tap **Favourites** and select a contact.

Number prediction

Tap **Keypad**.

When entering numbers on the keypad, automatic predictions appear. Select one of these to make a call.

Speed dial numbers

Tap **Keypad**.

For speed dial numbers, tap and hold the corresponding digit.

To assign a contact to a speed dial number, tap and hold an available speed dial number on the keypad, tap **OK**, and then select a contact. Or, tap **Contacts** → ⋮ → **Speed dial**, select a number, and then select a contact.

Making an international call

Tap **Keypad**.

Tap and hold **0** until the + sign appears. Enter the country code, area code, and phone number, and then tap 📞.

To block outgoing international calls, tap ⋮ → **Settings** → **Call** → **More settings** → **Call barring**. Then, select a call type and deselect **International calls**.

Receiving calls

Answering a call

When a call comes in, drag  outside the large circle.

If a call notification pop-up window appears while you are using an app, tap **Answer** in the pop-up window.

If the call waiting service is activated, another call can be answered. When the second call is answered, the first call is put on hold.

Rejecting a call

When a call comes in, drag  outside the large circle.

If a call notification pop-up window appears while you are using an app, tap **Reject** in the pop-up window.

To send a message when rejecting an incoming call, drag the reject message bar upwards.

To create various rejection messages, on the Apps screen, tap **Phone** →  → **Settings** → **Call** → **Call rejection** → **Rejection messages** → .

Automatically rejecting calls from unwanted numbers

- 1 Tap **Phone** on the Apps screen.
- 2 Tap  → **Settings** → **Call** → **Call rejection** → **Auto reject mode** → **Auto reject numbers**.
- 3 Tap **Auto reject list** → , enter a number, and then assign a category.
- 4 Tap **Save**.

Missed calls

If a call is missed,  appears on the status bar. Open the notifications panel to view the list of missed calls. Alternatively, on the Apps screen, tap **Phone** → **Logs** to view missed calls.

Options during calls

During a voice call

The following actions are available:

-  : Increase the volume.
- **Add call:** Dial a second call.
- **Keypad:** Open the keypad.
- **End call:** End the current call.
- **Speaker:** Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
- **Mute:** Turn off the microphone so that the other party cannot hear you.
- **Bluetooth:** Switch to a Bluetooth headset if it is connected to the device.
-  → **Hold:** Hold a call. Tap **Resume call** to retrieve the held call.
-  → **Contacts:** Open the contacts list.
-  → **Memo:** Create a memo.
-  → **Messages:** Send a message.
-  → **Personalise call sound:** Select or personalise the sound quality used during calls when a headset is connected.
-  → **Settings:** Change the call settings.

When you launch apps during a call, a pop-up window for the call screen () appears. You can continue your phone conversation while using apps.

To move the pop-up window, drag it to another location.

To delete the pop-up window, tap and hold it, and then tap **OK**.

To return to the call screen, tap the pop-up window.

During a video call

The following actions are available:

-  → **Hide me:** Hide your image from the other party.
-  → **Outgoing image:** Select an image to show it to the other party.
-  → **Capture image:** Capture the other party's image.
-  → **Record video:** Record a video of the other party's images.
-  → **Memo:** Create a memo.
-  → **Messages:** Send a message.
-  → **Keypad:** Open the keypad.
-  → **Speaker off / Speaker on:** Activate or deactivate the speakerphone. When using the speakerphone, speak into the microphone at the top of the device and keep the device away from your ears.
-  → **Switch to headset:** Switch to a Bluetooth headset if it is connected to the device.

Tap the screen to use the following options:

- **Switch:** Switch between the front and rear cameras.
- **Mute:** Turn off the microphone so that the other party cannot hear you.
- **End call:** End the current call.

Contacts

Adding contacts

Moving contacts from other devices

You can move contacts from other devices to your device. Refer to [Transferring data from your previous device](#) for more information.

Creating contacts manually

1 On the Apps screen, tap **Contacts** → **Contacts**.

2 Tap **+** and enter contact information.

- : Add an image.
- **+** / **-**: Add or delete a contact field.

3 Tap **Save**.

To add a phone number to the contacts list from the keypad, tap **Keypad**, enter the number, and then tap **Add to Contacts**.

Creating contacts from business cards

Take a photo of a business card and extract contact information from it.

1 On the Apps screen, tap **Contacts** → **Contacts**.

2 Tap **:** → **Business cards** → **+**.

To select or add languages to recognise, tap **:** → **Target language**.

- 3 Place a business card on the flat surface and rotate the device to landscape orientation.
- 4 Adjust the device to fit the card inside the frames on the screen. When the frames turn green, the device automatically takes a photo. The device also reads the contact information from the business card and converts it to a contact entry.
 - If the device does not take the photo automatically, tap .
 - To take photos of business cards manually, tap  → **Auto capture** → **Off**.
 - To extract text from a stored image, tap  → **Load image**.
- 5 Edit or add more information and tap **Save**.

Managing contacts

Editing a contact

- 1 On the Apps screen, tap **Contacts** → **Contacts**.
- 2 Select a contact to edit and tap .
- 3 Edit the contact information or tap **Add another field** to add more contact information.
- 4 Tap **Save**.

Deleting a contact

Select a contact to delete and tap  → **Delete**.

Sharing a contact

Select a contact to share, tap  → **Share name card**, and then select a sharing method.

Managing groups

On the Apps screen, tap **Contacts** → **Contacts**.

Tap .

Creating a new group

Tap , enter a group name, and then tap **Save**.

Adding contacts to a group

Select a group, and then tap . Select contacts to add, and then tap **Done**.

Deleting a group

Tap  → **Delete group**, select user-added groups, and then tap **Done**.

Sending a message or email to group members

Select a group, tap  → **Send message or email** → **Message** or **Email**, select members, tap **Done**, enter a message, and then tap the send button.

Merging contacts with accounts

Merge contacts that are saved in the device with your accounts.

On the Apps screen, tap **Contacts** → **Contacts**.

Tap  → **Merge accounts** → **Google** or **Samsung account**.

Importing and exporting contacts

Import contacts from storage services to your device or export contacts from the device to storage services.

On the Apps screen, tap **Contacts** → **Contacts**.

Tap  → **Settings** → **Contacts** → **Import/export**, and then select an import or export option.

Searching for contacts

On the Apps screen, tap **Contacts** → **Contacts**.

Use one of the following search methods:

- Scroll up or down the contacts list.
- Drag a finger along the index at the right side of the contacts list to scroll through it quickly.
- Tap the search field at the top of the contacts list and enter search criteria.

Once a contact is selected, take one of the following actions:

- ★ : Add to favourite contacts.
- 📞 / 📺 : Make a voice or video call.
- ✉️ : Compose a message.
- ✉️@ : Compose an email.

Adding shortcuts for contacts to the Home screen

Add shortcuts to contacts that you frequently communicate with on the Home screen.

- 1 On the Apps screen, tap **Contacts** → **Contacts**.
- 2 Select a contact.
- 3 Tap **⋮** → **Add shortcut to home screen**.

Messages & email

Messages

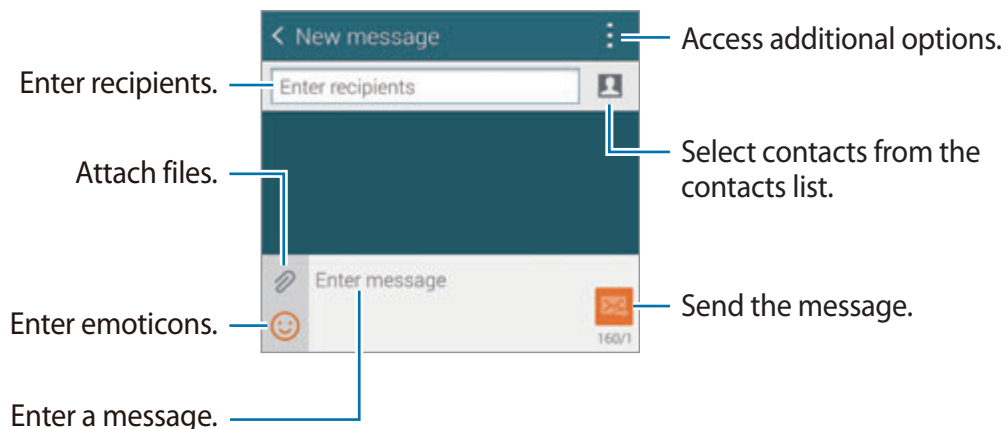

Sending messages

Send text messages (SMS) or multimedia messages (MMS).

You may incur additional charges for sending or receiving messages when you are roaming.

- 1 Tap **Messages** on the Apps screen.
- 2 Tap .
- 3 Add recipients and enter a message.

- 4 Tap  to send the message.

While composing a message, tap  to use one of the following options:

- **Quick responses:** Select a message template and enter a message.
- **Insert smiley:** Enter emoticons.
- **Add subject:** Enter a subject.
- **Add slide:** Add message slides.
- **Schedule message:** Set a specified time and date for a message to be sent.
- **Discard:** Cancel composing the message.
- **Font size:** Change the font size of text in the text field.

Sending scheduled messages

While composing a message, tap  → **Schedule message**. Set a time and date and tap **Done**.

- If the device is turned off at the scheduled time, is not connected to the network, or the network is unstable, the message will not be sent.
- This feature is based on the time and date set on the device. Messages may be sent at an incorrect time if you move across time zones or the network does not update the information.

Adding contacts to the priority list

Set contacts that you communicate with frequently as priority contacts. Send them messages by selecting a contact icon from above the messages list.

Tap **Tap to add priority senders**. → **Inbox** or **Contacts**, select contacts to add, and then tap **Done**. To add more contacts, tap .

To remove contacts from the priority list, tap and hold a contact, and then tap **Edit list of priority senders** →  → **Done**.

Viewing incoming messages

Incoming messages are grouped into message threads by contact. Select a contact to view the person's messages.

You may incur additional charges for sending or receiving messages when you are roaming.

While viewing a message, tap  to use one of the following options:

- **Video call:** Make a video call to the contact.
- **View contact:** View the contact's information.
- **Add to Contacts:** Add the contact to the contacts list.
- **Quick responses:** Enter a message by selecting one from message templates.
- **Add recipient:** Add recipients to send the message to.
- **Insert smiley:** Enter emoticons.
- **Add subject:** Enter a subject.
- **Add slide:** Add message slides.
- **Schedule message:** Set a specified time and date from a message to be sent.
- **Add to priority senders / Remove from priority senders:** Add contacts to or remove them from the priority senders list.
- **Add to spam numbers / Remove from spam numbers:** Identify a phone number as spam or remove a phone number from the spam list.
- **Discard:** Cancel composing the message.
- **Font size:** Change the font size of text in the text field.

Managing messages

While viewing the list of messages, tap  and use the following options:

- **Select:** Select messages to apply options.
- **Delete:** Delete all or selected messages.
- **Draft messages:** View messages saved for later delivery.
- **Locked messages:** View locked messages.
- **Scheduled messages:** View scheduled messages.
- **Spam messages:** View spam messages.
- **Font size:** Change the font size of text in the text field.
- **Settings:** Change message settings.
- **Help:** View help information about sending and managing messages.

Email

Setting up email accounts

Tap **Email** on the Apps screen.

Set up an email account when opening **Email** for the first time.

Enter the email address and password. Tap **Next** for a private email account, such as Google Mail, or tap **Manual setup** for a company email account. After that, follow the on-screen instructions to complete the setup.

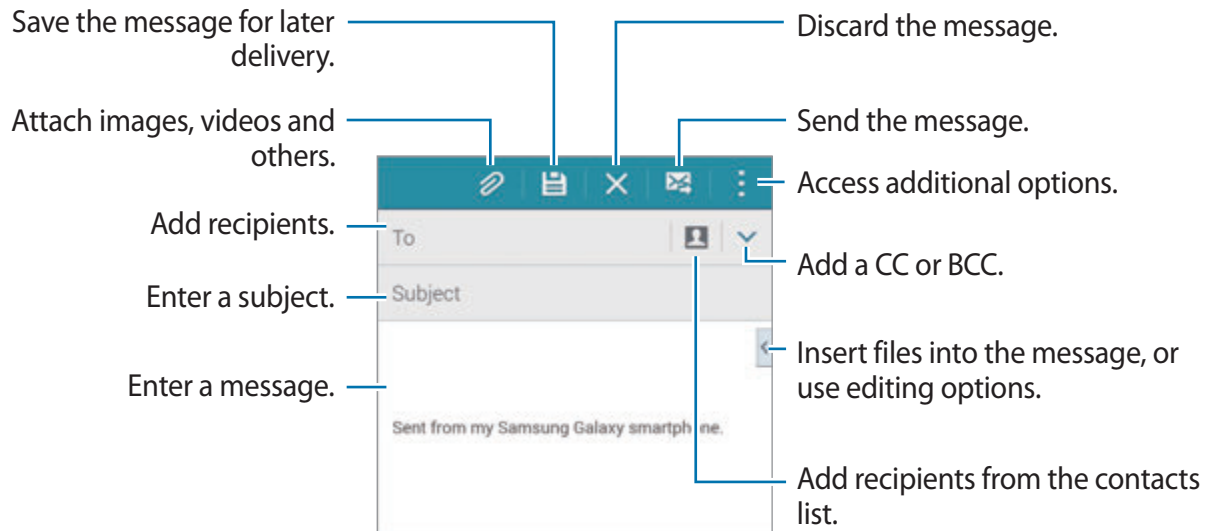

To set up another email account, tap  → **Manage accounts** → .

If you have more than two email accounts, you can set one as the default account. Tap  → **Manage accounts** →  → **Set as default account**.

Sending messages

Tap **Email** on the Apps screen.

Tap  at the bottom of the screen to compose a message.

Accessing additional options

While composing a message, tap  and access additional options.

- **Send email to myself:** Send the message to myself.
- **Schedule email:** Send the message at a scheduled time.

- If the device is turned off at the scheduled time, is not connected to the network, or the network is unstable, the message will not be sent.
- This feature is based on the time and date set on the device. Messages may be sent at an incorrect time if you move across time zones or the network does not update the information.

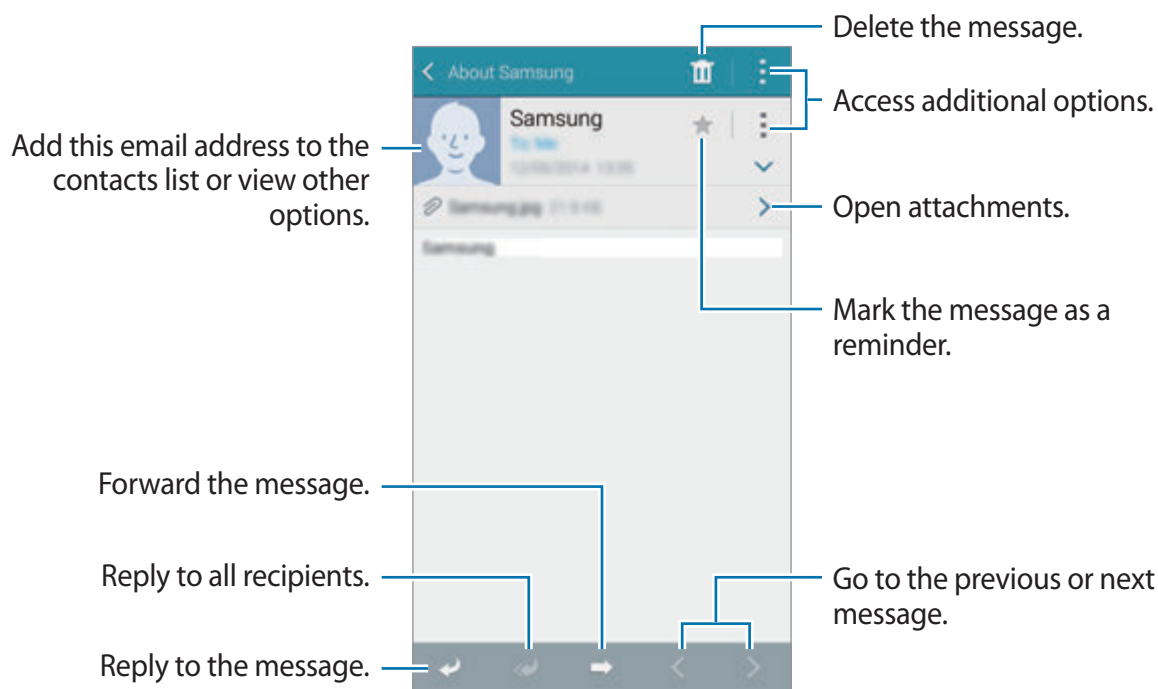

- **Priority:** Select a message's priority level.
- **Security options:** Set security options for the message.

Reading messages

Tap **Email** on the Apps screen.

Tap ☰, select an email account to use, and new messages are retrieved. To manually retrieve new messages, tap ↻.

Tap a message to read.

Adding contacts to the priority list

Set contacts that you communicate with frequently as priority contacts.

Tap ☰ → **Priority senders** → **Tap to add priority senders** → **Enter email** or **Contacts**, enter email addresses or select contacts to add, and then tap **OK** or **Done**.

To add more contacts to the priority list, tap ⊕.

To remove contacts from the priority list, tap and hold a contact, tap **Edit list of priority senders**, tap ⊖ on each contact, and then tap **Done**.

Camera

Basic shooting

Taking photos or recording videos

- 1 Tap **Camera** on the Apps screen.
- 2 Tap the image on the preview screen where the camera should focus.
When the subject is in focus, the focus frame turns green.
- 3 Tap  to take a photo or  to record a video.
 - Spread two fingers apart on the screen to zoom in, and pinch to zoom out.
 - To capture an image from the video while recording, tap .
 - To change the focus while recording a video, tap where you want to focus. To focus on the centre of the screen, tap .

- The camera automatically shuts off when unused.
- Make sure that the lens is clean. Otherwise, the device may not work properly in some modes that require high resolutions.
- The front camera lens is suitable for taking wide-angle photos. Minor distortion may occur in wide-angle photos and does not indicate device performance problems.

Launching Camera on the locked screen

To quickly take photos of special moments, launch **Camera** on the locked screen.

On the locked screen, drag  outside the large circle. If  is not shown, open the Apps screen, tap **Settings** → **Lock screen**, and then tick **Camera shortcut**.

This feature may not be available depending on the region or service provider.

Reorganising camera shortcuts

You can reorganise camera shortcuts for fast and easy access on the preview screen. Tap  on the preview screen. Tap and hold an item and drag it to a slot at the left of the screen.

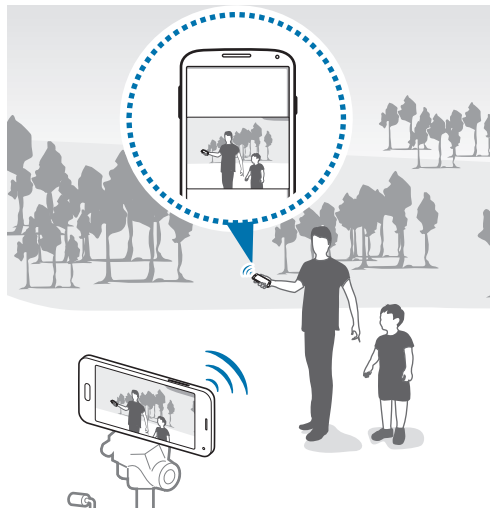

Camera etiquette

- Do not take photos or record videos of other people without their permission.
- Do not take photos or record videos where legally prohibited.
- Do not take photos or record videos in places where you may violate other people's privacy.

Remote viewfinder

Use your device as a viewfinder for another device. You can control the other device remotely to take photos or record videos from a distance. Your device displays the same image that is displayed on the connected device.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap **⚙️** → **Remote viewfinder**.

3 Tap **Easily connect via NFC** or **Wi-Fi Direct settings** to connect to another device.

- **Easily connect via NFC:** Activate the NFC feature on both devices.
- **Wi-Fi Direct settings:** Activate the Wi-Fi Direct feature on both devices.

4 Tap the image on the preview screen where the device should focus.

5 Tap  to take the photo displayed on the connected device's viewfinder.

Ensure that the device you want to connect to supports the remote viewfinder mode.

Shooting modes

Auto

Use this mode to allow the camera to evaluate the surroundings and determine the ideal mode for the photo.

On the Apps screen, tap **Camera** → **MODE** → **Auto**.

Beauty face

Use this mode to take a photo with lightened faces for gentler images.

On the Apps screen, tap **Camera** → **MODE** → **Beauty face**.

Shot & more

Use this mode to take a series of photos and modify them by applying various effects using the shooting modes. The device identifies the photos with  in **Gallery**.

The zoom feature is not available while taking photos in this mode.

1 Tap **Camera** on the Apps screen.

2 Tap **MODE** → **Shot & more**.

3 Tap .

The device takes a series of photos and displays the available shooting modes.

4 Select a shooting mode and apply an effect to the photos.

- **Best photo:** Take a series of photos and save the best one. To view other photos in the series, scroll left or right. The device recommends the best photo and identifies it with .
- **Best face:** Take multiple group shots at the same time and combine them to create the best possible image. Tap the white frame on each face and choose the best individual pose for each subject from the poses that appear at the bottom of the screen. The device recommends the best photo and identifies it with .
- **Drama shot:** Take a series of photos and combine them to create an image that shows motion trails. Extend the motion trail in the image by selecting more photos from the bottom of the screen. To edit the motion trails of selected photos, tap  and select a photo. Tap  to display subject's motion trails or tap  to erase the motion trails. Edit the photo as desired and tap **Done**.
- **Eraser:** Erase unwanted moving objects. Tap  to erase unwanted moving objects. Tap  to restore the original photo.
- **Panning shot:** Apply an effect to the subject's background that makes the subject appear to be moving fast. Tap **Objects** to select a subject. Tap **Motion blur** to change the angle of blurring to apply to the background. Tap  and draw a circle with your finger around the large circle to adjust the angle of blurring. To adjust the level of background blurring, drag the screen to the left or the right.

5 When you are finished editing photos, tap .

Panorama

Use this mode to take a photo composed of many photos strung together. The device identifies the photo with  in **Gallery**.

On the Apps screen, tap **Camera** → **MODE** → **Panorama**.

To get the best shot, follow these tips:

- Move the camera slowly in one direction.
- Keep the image within the frame on the camera's viewfinder.
- Avoid taking photos of indistinct backgrounds, such as an empty sky or a plain wall.

Virtual tour

Use this shooting mode to take photos in a space by moving forwards, or rotating left or right. Photos of the space are taken from different angles. You can view the photos in a slideshow and simulate actually moving through the space. The device identifies the photo with  in **Gallery**.

- 1 Tap **Camera** on the Apps screen.
- 2 Tap **MODE** → **Virtual tour**.
- 3 Move with the device to position the dot inside the large circle in the centre of the preview screen.

When the circle's border turns blue, the device starts to take photos.

4 Move slowly forwards, or rotate left or right while taking photos.

Whenever the dot is inside the large circle, the device takes a photo automatically.

5 Repeat this action to take more photos.

To see a preview of the photo, tap > at the bottom left of the screen. The direction where images were taken is displayed on each preview thumbnail.

To delete the last photo that was taken, tap **Undo**.

6 To finish, tap ■.

Continuous shot

Use this mode to take a series of photos of moving subjects.

On the Apps screen, tap **Camera** → **MODE** → **Continuous shot**.

HDR (Rich tone)

Use this mode to take photos with rich colours and reproduce details even in bright and dark areas.

On the Apps screen, tap **Camera** → **MODE** → **HDR (Rich tone)**.

Without effect

With effect

Managing shooting modes

Select the shooting modes to appear on the mode selection screen.

On the Apps screen, tap **Camera** → **MODE** → **Manage modes**.

Downloading shooting modes

Download more shooting modes from **Samsung Apps** (GALAXY Apps).

On the Apps screen, tap **Camera** → **MODE** → **Download**.

Camera settings

On the Apps screen, tap **Camera** → . Not all of the following options are available in both still camera and video camera modes. The available options vary depending on the mode used.

- **Picture size:** Select a resolution. Use higher resolution for higher quality. But it takes up more memory.
- **Picture stabilisation:** Set the device to automatically detect darker conditions and adjust the brightness of the photo without the flash.

This option is not available when you record videos.

- **Face detection:** Set the device to recognise people's faces and help you take photos of them.
- **ISO:** Select an ISO value. This controls camera light sensitivity. It is measured in film-camera equivalents. Low values are for stationary or brightly-lit objects. Higher values are for fast-moving or poorly-lit objects.
- **Metering modes:** Select a metering method. This determines how light values are calculated. **Centre-weighted** measures background light in the centre of the scene. **Spot** measures the light value at a specific location. **Matrix** averages the entire scene.
- **Tap to take pics:** Tap the image on the preview screen to take photos.
- **Save as:** Set the device to save both the rich tone photo and original photo, or only the rich tone photo.
- **Video size:** Select a resolution. Use higher resolution for higher quality. But it takes up more memory.
- **Recording mode:** Change the recording mode.
- **Effects:** Select a filter effect to use when taking photos or recording videos.

- **Flash:** Activate or deactivate the flash.
- **Timer:** Use this for delayed-time shots.
- **Location tags:** Attach a GPS location tag to the photo.

- To improve GPS signals, avoid shooting in locations where the signal may be obstructed, such as between buildings or in low-lying areas, or in poor weather conditions.
- Your location may appear on your photos when you upload them to the Internet. To avoid this, deactivate the GPS tag setting.
- **Storage location:** Select the memory location for storage.
- **Review pics/videos:** Set the device to show photos or videos after capturing them.
- **Remote viewfinder:** Set the device to use as a viewfinder and control the other device to take photos or record videos. Refer to [Remote viewfinder](#) for more information.
- **White balance:** Select an appropriate white balance, so images have a true-to-life colour range. The settings are designed for specific lighting situations. These settings are similar to the heat range for white-balance exposure in professional cameras.
- **Exposure value:** Change the exposure value. This determines how much light the camera's sensor receives. For low-light situations, use a higher exposure.
- **Grid lines:** Display viewfinder guides to help composition when selecting subjects.
- **The volume key:** Set the device to use the Volume button to control the shutter or zoom function.
- **Voice control:** Set the device to take photos with voice commands.
- **Help:** View help information for using the camera.
- **Reset settings:** Reset the camera settings.

Gallery

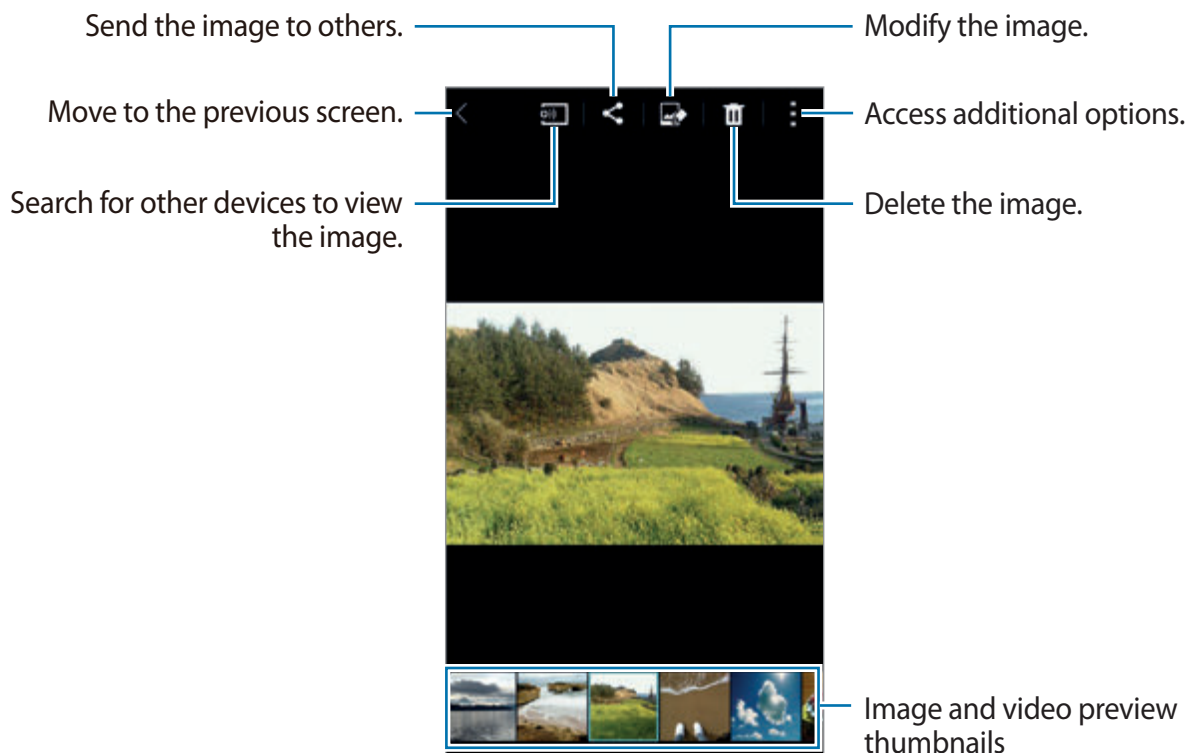

Viewing photos or videos

Viewing content on the device

On the Apps screen, tap **Gallery** and select an image or a video.

Video files show the ▶ icon on the preview thumbnail.

To hide or show the menu bar and the preview thumbnails, tap the screen.

Selecting a sorting option

The images or videos on your device can be sorted by time or album. You can also filter images and videos by category, such as people or scenery.

On the Apps screen, tap **Gallery** → , and then select a sorting option.

Accessing additional options

On the Apps screen, tap **Gallery** and select an image or a video. Tap  and use the following options. The available options may differ depending on the selected file.

- **More info:** View more information about the file.
- **Copy to clipboard:** Copy the file to the clipboard.
- **Studio:** Edit images or videos in studio mode.
- **Rotate left:** Rotate anticlockwise.
- **Rotate right:** Rotate clockwise.
- **Crop:** Trim the image.
- **Rename:** Rename the file.
- **Slideshow:** Start a slideshow with the images in the current folder.
- **Set as:** Set the image as wallpaper or a contact image.
- **Print:** Print the image by connecting the device to a printer. Refer to [Mobile printing](#) for more information.
- **Settings:** Change the Gallery settings.

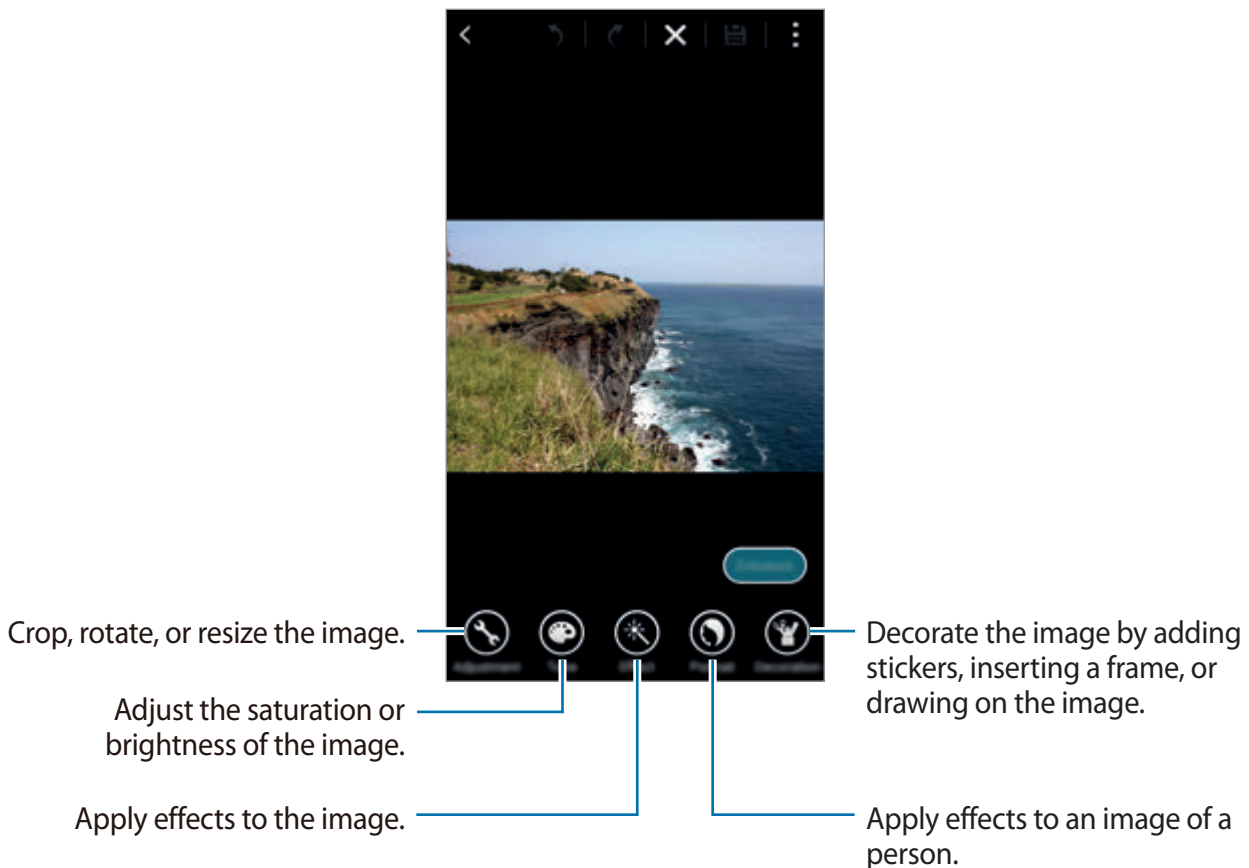

On the list of files, you can select multiple files by tapping and hold a file. You can share or delete the selected files at once, and use additional options by tapping .

Editing photos or videos

Photo studio

Edit images by applying various effects.

- 1 Tap **Gallery** on the Apps screen.
- 2 Tap **→ Studio → Photo studio**.
- 3 Select an image to edit.
- 4 Edit the image by applying various effects.

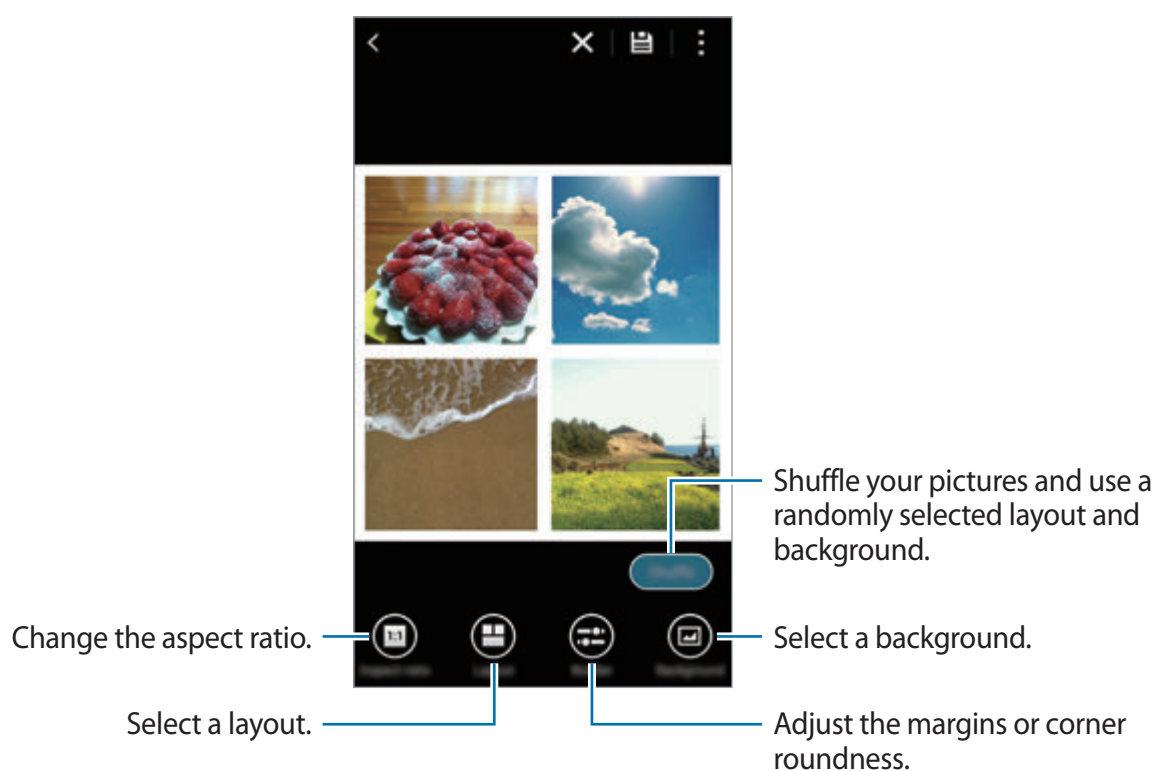

- 5 When you are finished editing the image, tap **Done** → .
- 6 Select a save option and tap **OK**.
The edited photo is saved in the **Studio** folder. To open the folder, tap **Gallery** →  → **Album** → **Studio**.

Collage studio

Combine several images together to create a collage.

- 1 Tap **Gallery** on the Apps screen.
- 2 Tap **→ Studio → Collage studio**.
- 3 Select images to combine and tap **Done**.
- 4 Edit the image by applying various effects.

- 5 When you are finished editing the images, tap **Save**.

The edited image is saved in the **Studio** folder. To open the folder, tap **Gallery → ≡ → Album → Studio**.

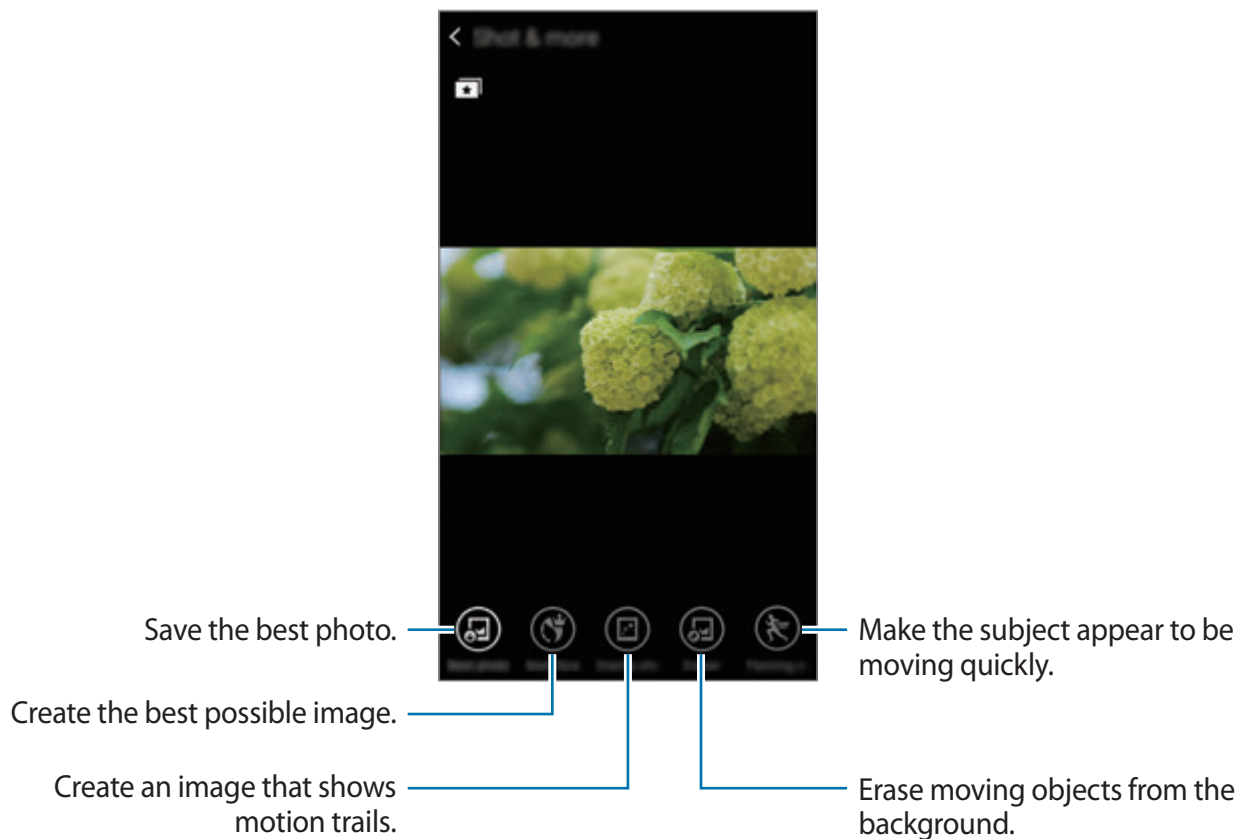

Shot & more

Apply various effects to the images you have taken.

Only photos taken in shot & more mode can be selected.

- 1 Tap **Gallery** on the Apps screen.
- 2 Tap **→ Studio → Shot & more**.
- 3 Select an image to edit.
- 4 Edit the image by applying various effects.

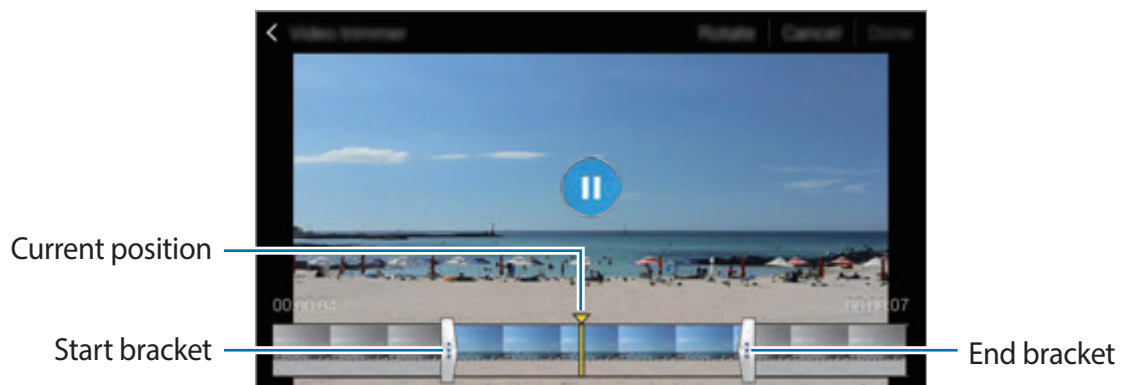

- 5 When you are finished editing the image, tap . The edited image is saved in the **Studio** folder. To open the folder, tap **Gallery → ≡ → Album → Studio**.

Video trimmer

Trim video segments.

- 1 Tap **Gallery** on the Apps screen.
- 2 Tap **:** → **Studio** → **Video trimmer**.
- 3 Select a video to edit.
- 4 Move the start bracket to the desired starting point, move the end bracket to the desired ending point, tap **Done**.

- 5 Enter a filename, and then tap **OK** to save the video.

Gallery settings

1 Tap **Gallery** on the Apps screen.

2 Tap **:** → **Settings**.

3 Use the following options:

- **Sync via Wi-Fi only:** Set the device to sync content only when the Wi-Fi connection is activated.
- **Tag buddy:** Tag photos with information, such as date and location. To edit tags, tap the information on an image, tap , edit the details, and then tap **Done**.
- **Face tag:** Assign tags to faces in an image. A white frame appears around a face when it is detected. Select the face, tap **Add name**, and then select a contact to identify the face tag. When the face tag appears on an image, tap it and access various options, such as calling or sending a message to the person.

When you use **Face tag**, face recognition may fail depending on the face angle, face size, skin colour, facial expression, light conditions, or accessories the subject is wearing.

Multimedia

Music

Playing music

Tap **Music** on the Apps screen.

Select a music category, and then select a song to play.

To listen to songs at equal volume levels, tap  → **Settings**, and then tick **Smart volume**.

When **Smart volume** is activated, the volume may end up louder than the device volume level. Use caution to avoid long-term exposure to loud sounds to prevent damage to your hearing.

Smart volume may not be activated for some files.

To set a personalised sound while listening to songs with a headset, tap  → **Settings** → **Adapt Sound** → **On**.

When you activate this option for the first time, tap **Start** to adjust the sound. The device starts a series of sound tests to adjust the sound level and starts to beep. Tap **Yes** if you can hear the beep or **No** if you cannot. Repeat this step for each test until the sound adjustment is finished. Then, tick **Music sound** and tap **Done** to apply the option when you listen to music.

When you turn the volume up to level 14 or higher, the adapt sound option is not applied to music playback. If you turn the volume down to level 13 or lower, the option is reapplied.

Viewing a list of recommended songs

To view a list of recommended songs based on the song that is currently playing, rotate the device to landscape orientation.

Setting a song as ringtone or alarm tone

To use the currently-playing song as a ringtone or an alarm tone, tap  → **Set as** → **From the beginning** or **Auto recommendations**, select an option, and then tap **Done**.

Creating playlists

Make an own selection of songs.

Tap **Music** on the Apps screen.

Tap **Playlists** →  → **Create playlist**. Enter a title and tap **OK**. Tap **+**, select songs to include, and then tap **Done**.

To add the currently-playing song to a playlist, tap  and select the playlist.

Playing music by mood

Use this feature to play music that suits your mood.

Tap **Music** on the Apps screen.

Tap **Music square**. Songs are automatically categorised by mood. Tap a mood cell or drag multiple cells to listen to the music in the cells.

Song categories are based on available information about the song. Some songs may not be categorised in mood cells.

Playing music stored on other devices

Search for music that is stored on other devices and play it on your device.

Tap **Music** on the Apps screen.

Accessing music on a registered device

Tap **Devices** and select a device in **REGISTERED DEVICES** to access and play music. You can play the song on the devices that are registered to Samsung link. Visit link.samsung.com for more information. Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.

You may incur additional charges when you access content stored on other devices via the mobile network.

Accessing music on a nearby device

Tap **Devices** and select a device in **NEARBY DEVICES** to access and play music. You can play the song on the devices with the content sharing feature activated.

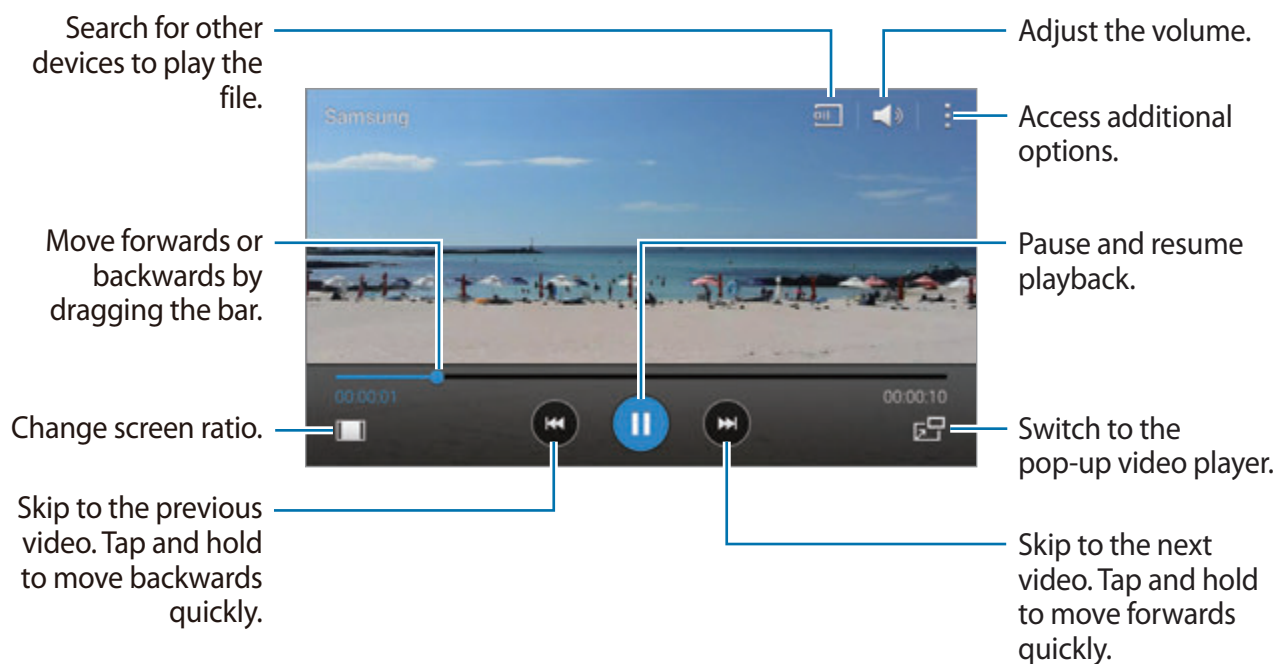

On the Apps screen, tap **Settings** → **Nearby devices**, and then tap the **Nearby devices** switch to activate it. Refer to [Nearby devices](#) for more settings.

Video

Playing videos

Tap **Video** on the Apps screen.

Select a video to play.

To customise the control panel location during playback, tap **⋮** → **Settings**, tick **Mini controller**, and then tap **Close**. Then, tap **◀** or **▶** to move the control panel to either side of the screen.

This feature is available only in landscape orientation.

Using the pop-up video player

Use this feature to use other apps without closing the video player. While watching videos, tap  to use the pop-up video player.

Spread two fingers apart on the screen to enlarge the player or pinch to reduce it. To move the player, drag the player to another location.

Capturing images

To use this feature, during playback, tap  → **Settings**, tick **Capture**, and then tap **Close**.

Tap  to capture an image from the video during playback.

Sharing or deleting videos

Tap **Video** on the Apps screen.

Tap and hold a video, tap , and then select a sharing method.

Tap  → **Delete**, select videos, and then tap **Done**.

Editing videos

Tap **Video** on the Apps screen.

Select a video, tap  → **Studio** → **Video trimmer**. Move the start bracket to the desired starting point, move the end bracket to the desired ending point, tap **Done**, enter a filename, and then tap **OK** to save the video.

Playing videos stored on other devices

Search for videos that are stored in other devices and play them on your device.

Tap **Video** on the Apps screen.

Accessing a video on a registered device

Tap **Devices** and select a device in **REGISTERED DEVICES** to access and play the video. You can play the video on the devices registered to Samsung link. Visit link.samsung.com for more information. Ensure that the registered devices are turned on and connected to a Wi-Fi or mobile network.

You may incur additional charges when you access content stored on other devices via the mobile network.

Accessing a video on a nearby device

Tap **Devices** and select a device in **NEARBY DEVICES** to access and play the video. You can play the video on devices that have the content sharing feature activated.

On the Apps screen, tap **Settings** → **Nearby devices**, and then tap the **Nearby devices** switch to activate it. Refer to [Nearby devices](#) for more settings.

S Health

About S Health

Use this app to set your calorie intake and calorie burning levels based on your physical statistics. You can use it to record the actual calories you eat and burn. Also, the app recommends exercises and provides health tips to help you maintain a balanced-lifestyle.

Tap **S Health** on the Apps screen.

S Health features

While using S Health, you can access the following features:

- **Pedometer:** Count the steps that you take.
- **Exercise:** Set and manage your exercise goals. You can record and check exercise information, such as quantity, speed, and calories burnt. Also, when you exercise outdoors, you can use the exercise feature to take photos, listen to music, and check your location.
- **Food:** Manage your calorie intake.
- **Weight:** Record and manage weight changes.

Setting up a user profile

When running this app for the first time, read and agree to the terms and conditions, and then set up a user profile.

- 1 Tap **S Health** on the Apps screen.
- 2 Read the on-screen information about the app and tap **Next**.
- 3 Read and agree to the terms and conditions, and then tap **Next**.
- 4 Sign in to your Samsung account. Or, tap **Skip** to skip this procedure.
- 5 Enter a user name and your birth date, select your gender, and then tap **Next**.
To prevent your profile to be viewed from other S Health users, tick **Hide my profile information from other S Health users**.

- 6 Enter your physical statistics and tap **Next**.

- 7 Select an activity level and tap **Next**.

When you finish setting up the profile, the profile information you entered appears.

- Based on your physical statistics, the device calculates your basal metabolic rate (BMR) and recommends a daily calorie intake. The recommendation may not be accurate for all ages, body compositions, or nutritional needs.
- The burned calories estimated through the S Health may differ from the actual burned calories due to your device specification, surroundings, health status, exercise style and many more. Samsung does not warrant the accuracy of the estimated information of burned calories and we recommend you to use the data for recreational purpose only.

- 8 Check your profile information and tap **Start**.

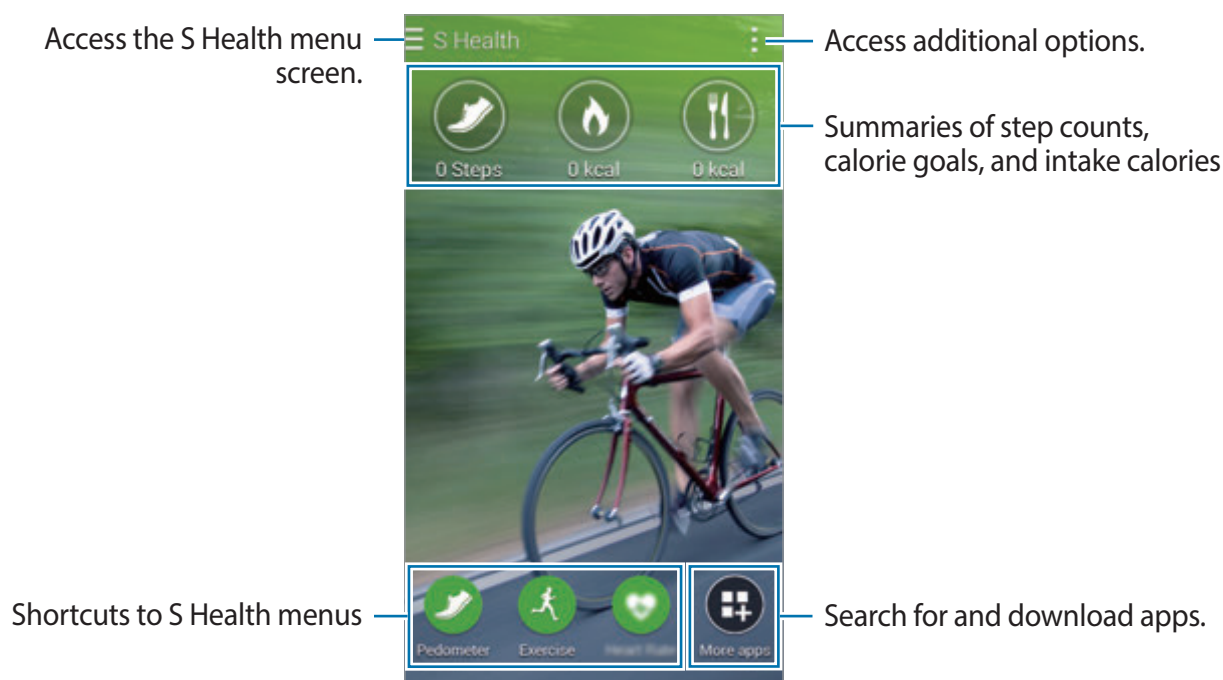

The S Health main screen appears.

S Health main screen

View a summary that shows your current step count and the calories you have burnt or eaten. You can also reorganise shortcuts for easy access to S Health menus and change the background image on the S Health main screen.

On the S Health main screen, tap  → **Edit favourites**, and then tap  to add shortcuts to the S Health main screen.

To delete shortcuts, tap .

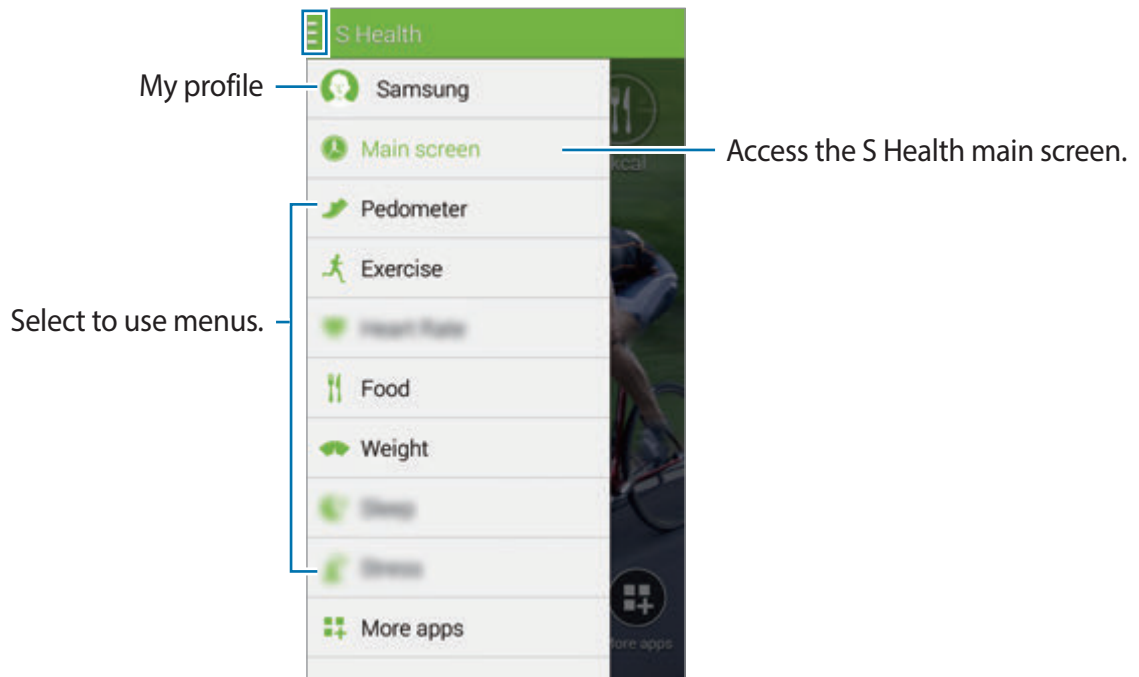

Tap  and use the following functions:

- **Edit favourites:** Add or edit S Health menu shortcuts.
- **Set background:** Select a background image.
- **Backup and restore:** Backup or restore your S Health data.
- **Settings:** Configure settings for S Health.
- **Help:** View help information about using S Health.

Using S Health menus

Tap ☰ to access various menus.

- **Pedometer:** Measure your step count and check burnt calories. Refer to [Walking mate](#) for more information.
- **Exercise:** Record exercise duration and check burnt calories. Refer to [Exercise mate](#) for more information.
- **Food:** Record and manage calorie intake. Refer to [Recording food intake](#) for more information.
- **Weight:** Record and manage weight changes. Refer to [Managing weight](#) for more information.
- **More apps:** Search for and download the apps that can sync with **S Health**.

Further information about S Health functions or apps downloaded via **More apps** is available. To access more information about a function or app, open it. Then, tap ⓘ → **Help**, select a topic, and then tap **User manual**.

Walking mate

The device counts the number of steps you have taken and measures the distance travelled. It also measures the calories you have burnt using a sensor.

1 Tap  → **Pedometer**.

2 Tap **Start** and start walking.

The device measures your step count, distance travelled, and burnt calories, and displays them in real-time.

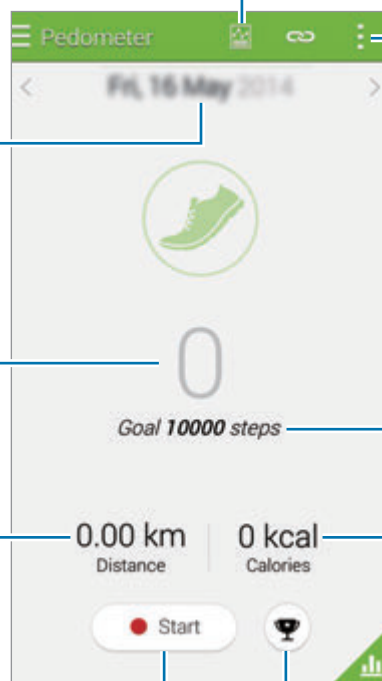

View the logs of your daily steps.

Move to a specific date of step count records.

Step count

Distance you have walked

Start measuring.

Access additional options.

Target number of steps

Calories you have burnt

View your step count in a graph.

Check your ranking in the community.

3 To stop measuring, tap **Pause** → **OK**.

The measurements are saved.

Tap  and use the following functions:

- **Daily step goal:** Change the target number of steps.
- **Reset daily data:** Reset the daily step count.
- **Device data to view:** Select a device to view information recorded by the pedometer.
- **Share via:** Send the current page to others.
- **Notice:** View notice of burnt calories.
- **Settings:** Configure settings for S Health.
- **User manual:** View more information about using this feature.

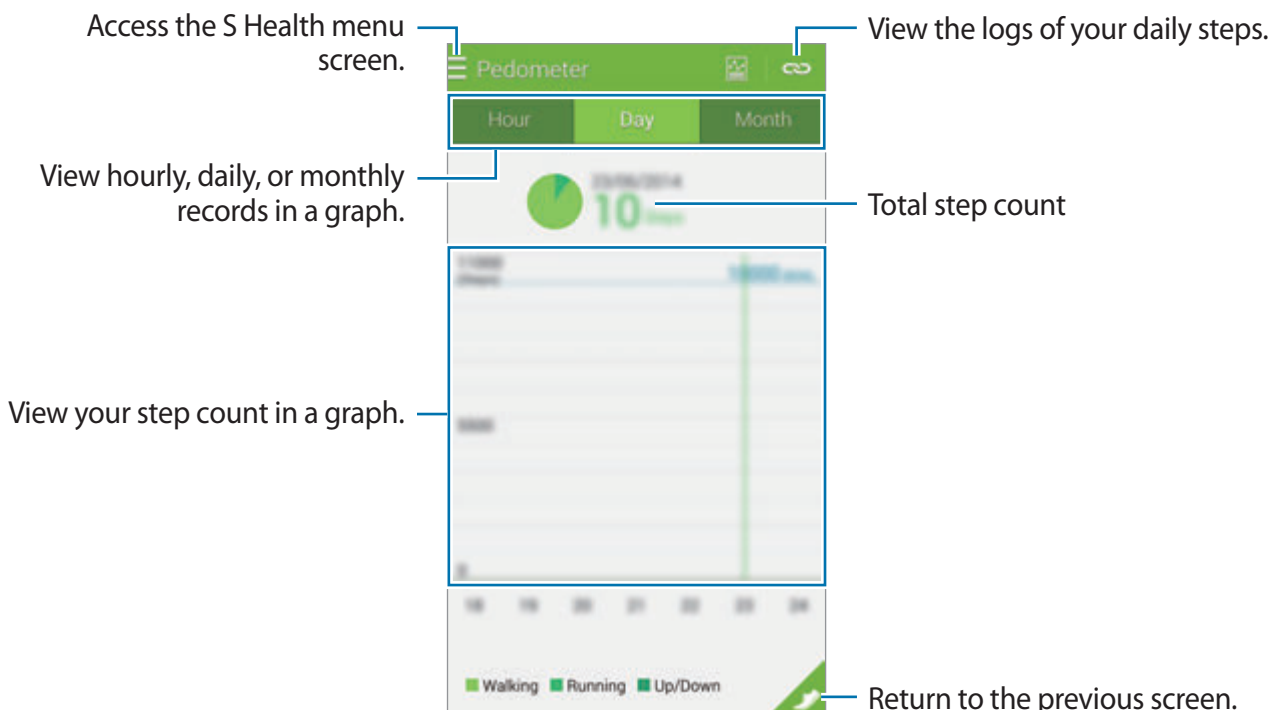

- You may experience a brief delay while the Pedometer monitors your steps and displays your step count.
- If you use the Pedometer while travelling by car or train, vibration may affect your step count.

Viewing your step count in a graph

View your burnt calories for a period in a graph.

On the Pedometer main screen, tap .

Resetting the daily step records

The device accumulates each day's step records.

To reset the daily step count, tap  → **Reset daily data** → **OK**.

Exercise mate

Record your exercise information and burnt calories using S Health's exercise feature. You can view your exercise and burnt calorie records in a graph and share the data with others.

Tap  → **Exercise**.

- Before using this feature, pregnant women, the elderly, and young children, users suffering from conditions, such as chronic heart disease or high blood pressure, are recommended to seek the advice of a licensed medical professional.
- If you feel dizzy, experience pain, or have difficulty breathing during exercise, stop using this feature and seek the advice of a licensed medical professional.

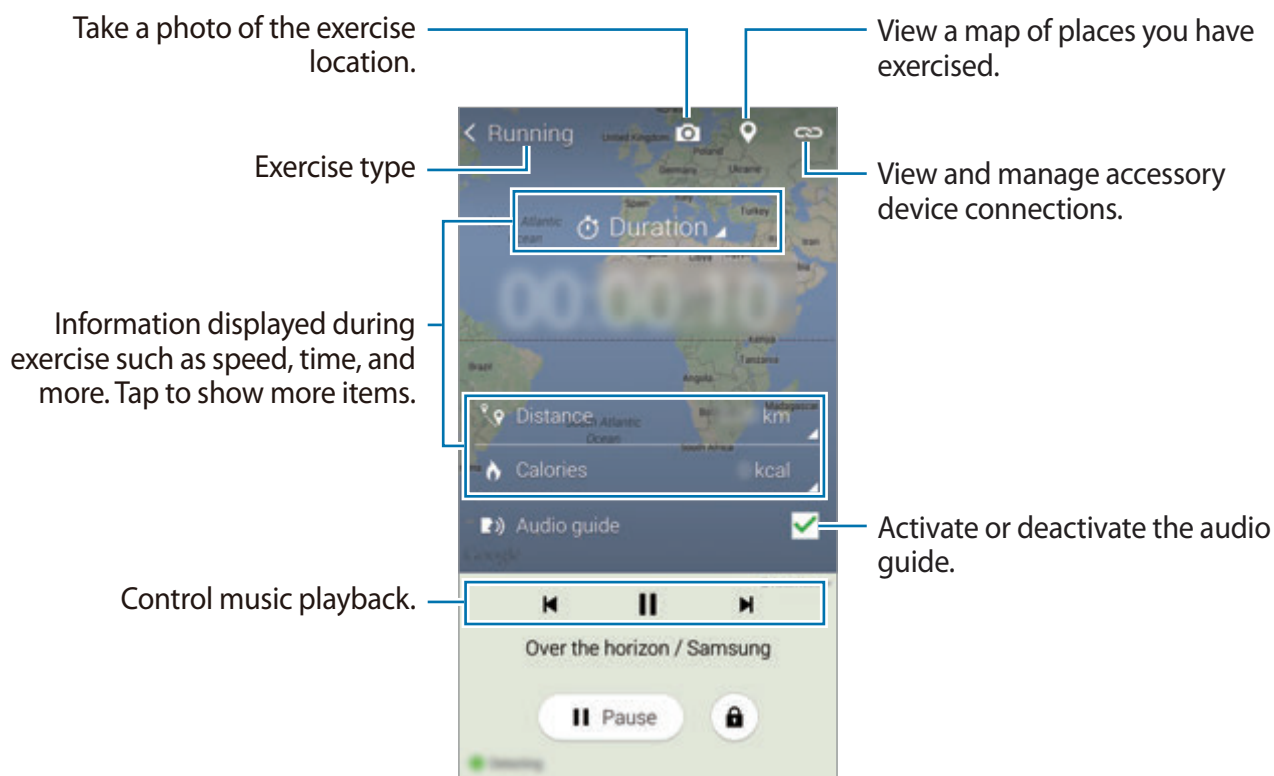

Starting to exercise

- 1 Set the exercise type, activate or deactivate the voice guide, select background music, and then tap **Start**.

The device records the exercise time and displays progress towards achieving exercise goals.

2 Start exercising and use various features on the screen.

Tap  to lock the screen and display exercise information only. To unlock the screen, tap and hold .

3 To finish exercising, tap **Pause** → **Stop**.

The exercise information, distance, and photos you have taken are displayed on the screen.

4 Enter additional information and tap **Done**.

The device saves the exercise information.

Tap  and use the following functions:

- **Set maximum heart rate:** Set the device to automatically update your maximum heart rate based on your profile and previous heart rate measurements. Or, set your heart rate to be manually updated and enter it yourself.
- **Reset daily data:** Reset the daily exercise data.
- **Notice:** View notice of burnt calories.
- **Settings:** Configure settings for S Health.
- **User manual:** View more information about using this feature.

Using the coaching feature while exercising in running mode

Use the personalised coaching feature to exercise safely and effectively. You will receive real-time coaching advice that leads you through a safe and effective workout that keeps you fit. Connect the device to the heart rate monitor to use the coaching feature.

To view the available heart rate monitors, tap  → **Settings** → **Compatible accessories** → **Exercise**.

About the coaching feature

The coaching feature includes Firstbeat technology to provide personalised exercise guidance. Firstbeat uses Training Effect (TE) analysis that measures the accumulated physical load during a workout and assesses the impact on your fitness. TE levels are based on your physical profile and the heart rate information recorded while you work out. Your TE level increases when you perform effective exercise and the coaching feature uses the TE to provide you with feedback.

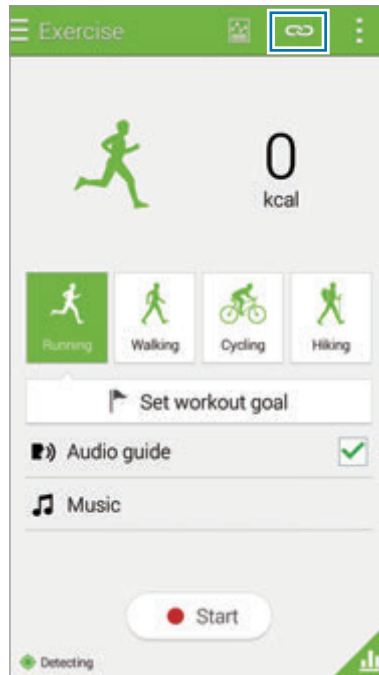

The feedback is provided by the feature via prompts, such as 'speed up', 'keep up this pace', and 'slow down'. When you first start to use the coaching feature, it will estimate an appropriate TE level based on your profile. As you exercise, it will analyse your training history and provide more personalised guidance. A typical workout may start at a lower intensity and sharply increase in intensity towards the end.

Visit www.firstbeat.fi/te for more information.

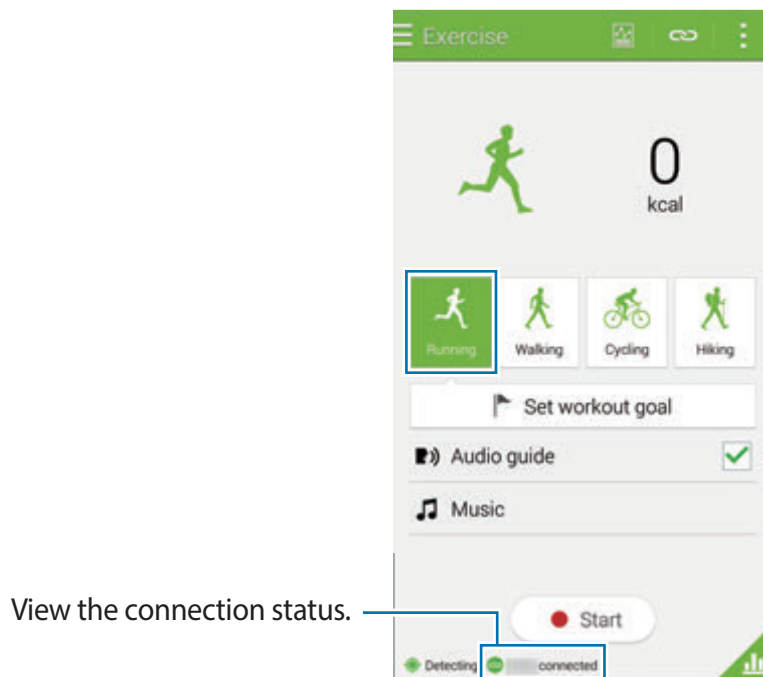

While exercising, the heart rate monitor may not work properly if the device is exposed to excessive sweat or its position is changed.

- 1 Wear the heart rate monitor.
- 2 On the Exercise main screen, tap  → **Scan**.

- 3 Select your heart rate monitor from the detected devices list.
- 4 Follow the on-screen instructions to connect your heart rate monitor to your device.

5 When connection is made, tap **Running** on the Exercise main screen.

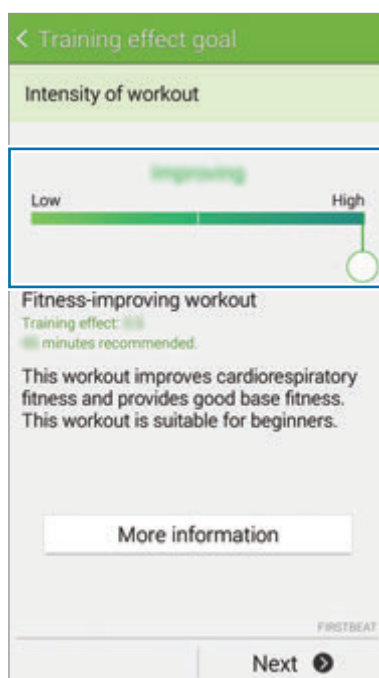

6 Tap **Set workout goal** → **Training effect goal**.

7 Tap **Auto** in the pop-up window to automatically set the maximum heart rate.

The maximum heart rate is the fastest heart rate an individual can achieve through exercise. If you know your maximum heart rate, enter it manually. If you set the maximum heart rate to be measured automatically, the device will calculate it using $210 - 0.65 \times \text{age}$.

8 Set the exercise intensity and tap **Next**.

Set the training intensity at one of the three available levels.

9 Set the exercise duration and tap **Done**.

If you set the exercise duration shorter than the recommended duration, the exercise intensity will increase to achieve the TE.

10 On the Exercise main screen, activate or deactivate the voice guide, select background music, and then tap **Start**.

11 Start exercising.

If you feel pain or discomfort while exercising, stop immediately and consult a medical professional.

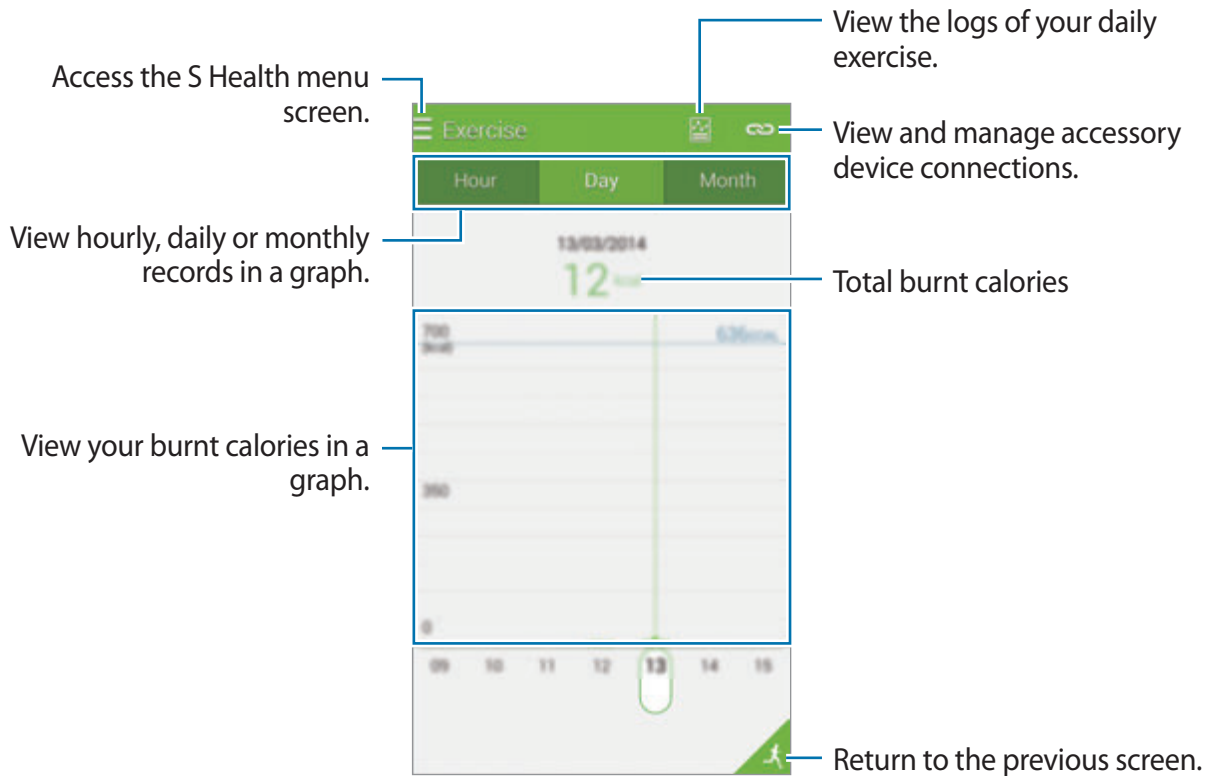

12 To finish exercising, tap **Pause** → **Stop**.

13 Check the exercise duration, distance, and calories burned and tap **Done** to save the exercise information to the device.

Viewing a log of burnt calories

Compare your burnt calorie records for a period by viewing them in a graph.

On the Exercise main screen, tap .

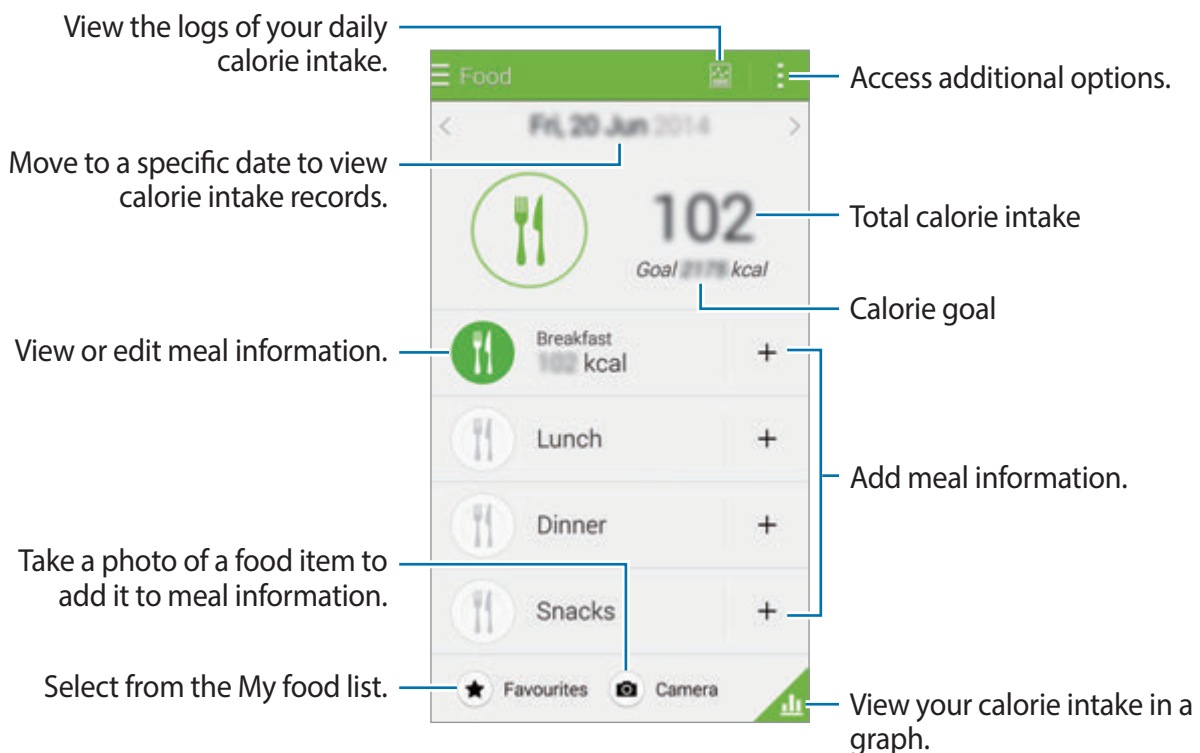

Recording food intake

Record your daily food intake and manage your calorie consumption.

- 1 Tap  → **Food**.
- 2 Tap **+** next to the meal.
- 3 Enter the meal information and tap **Done**.
 - To search for a food, tap **Search** and select it from the search results.
 - To select from a food list sorted into categories, tap **Category**.
 - To select from the frequently-eaten foods, tap **Frequent**.
 - To select from the My food list, tap **My food**.
- 4 Enter additional food information and tap **Save**.

The food information is recorded as your calorie intake for the meal.

Tap  and use the following functions:

- **Daily calorie goal:** Change your daily calorie intake goal.
- **My food:** Enter the frequently-eaten foods.
- **Reset daily data:** Reset the daily calorie intake data.
- **Share via:** Send the current page to others.
- **Settings:** Configure settings for S Health.
- **User manual:** View more information about using this feature.

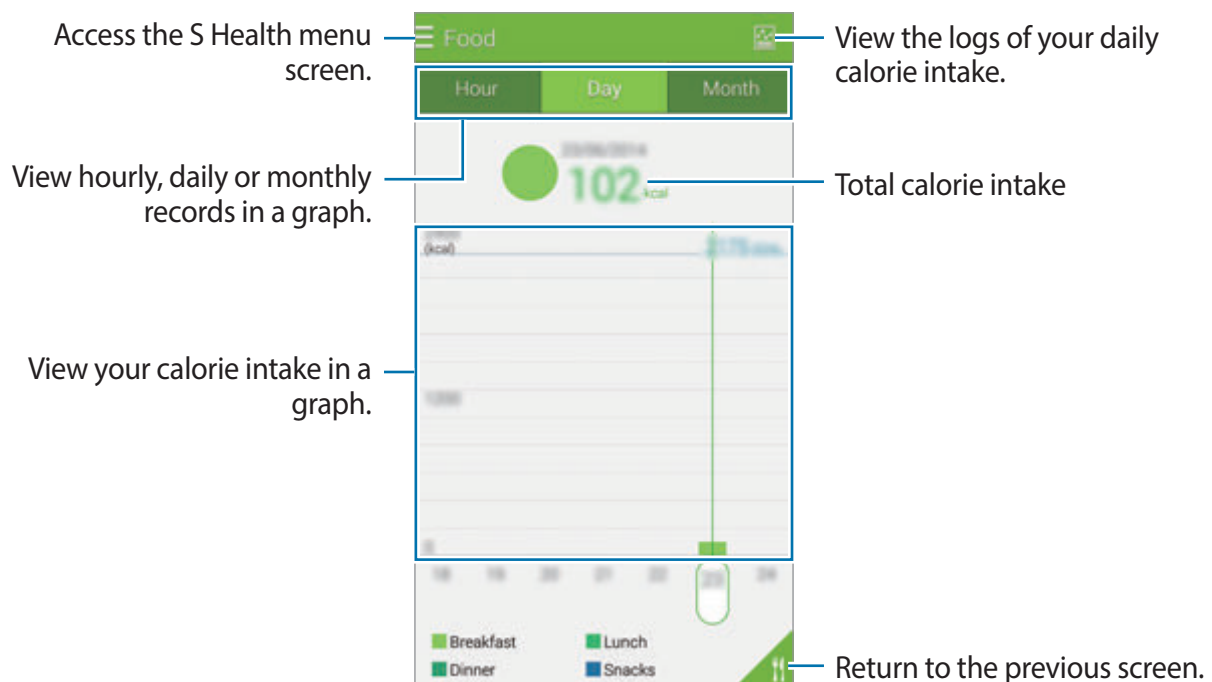

Use the calorie information in **Food** for personal reference only. The data provided may not be accurate at all times and is subject to change. Some food information may differ from actual calorie levels.

Viewing calorie intake in a graph

Compare your calorie intake records for a period by viewing them in a graph.

On the Food main screen, tap .

Entering information about frequently-eaten food

Save information about food that you eat frequently. You can quickly update your calorie intake by adding saved food information instead of entering the information each time you eat it.

- 1 Tap **+** → **My food**.
- 2 Tap **Add food item**, enter the food name and its calorie information, and then tap **Save**.
- 3 Enter the amount that you eat and tap **OK**.
The food information is added to the My food list.
- 4 To record intake food information from the frequently-eaten food list, tap **My food**, select the added food, and then tap **Done**.
- 5 Tap **Save**.

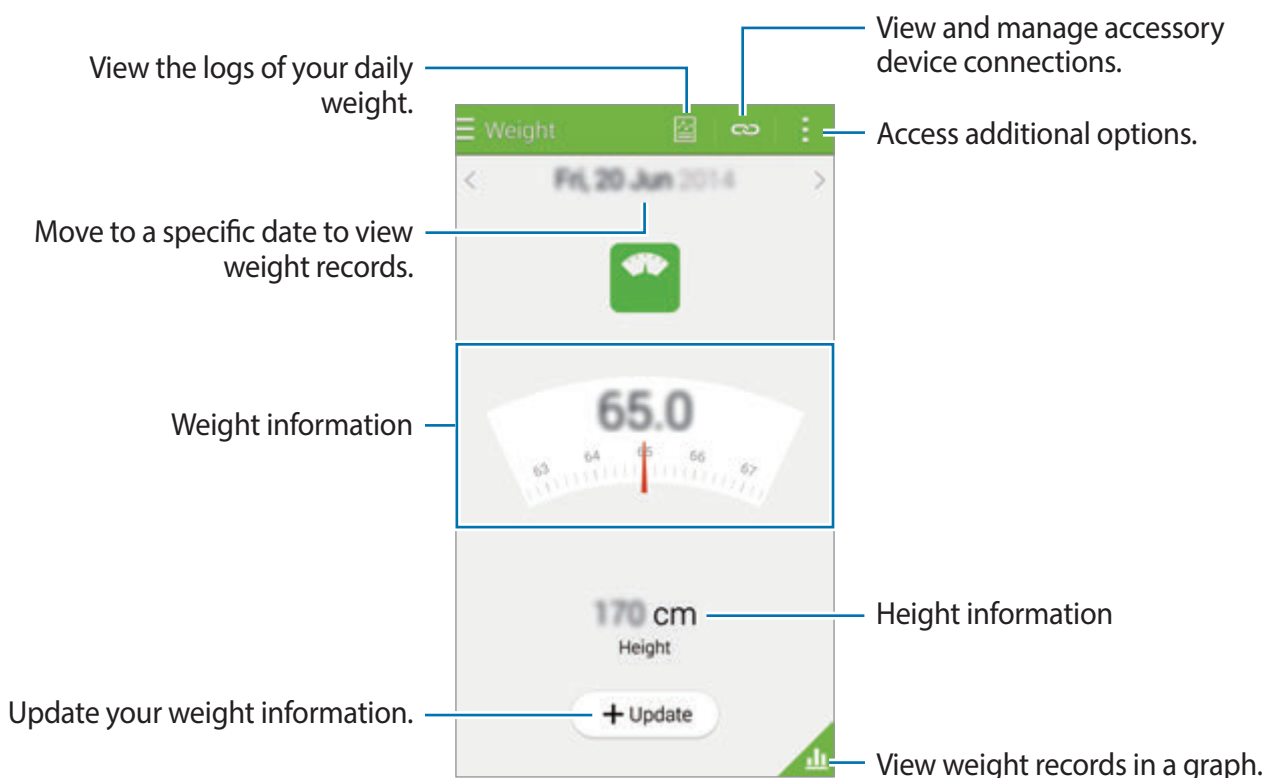

Managing weight

Record your weight information and monitor weight changes using S Health's weight feature. You can view your weight records in a graph and share the data with others.

- 1 Tap **≡** → **Weight**.
- 2 Tap **Update**.

3 Enter your weight and tap **Save**.

Whenever you change your weight, the device applies it to your profile.

Tap  and use the following functions:

- **Reset daily data:** Reset the daily weight data.
- **Share via:** Send the current page to others.
- **Settings:** Configure settings for S Health.
- **User manual:** View more information about using this feature.

Viewing your recorded weight in a graph

Compare your weight records for a period by viewing them in a graph. Tap  on the Weight main screen.

Entering data by using accessory devices

Import weight information from the connected device.

Tap  → **Scan**, select a device from the detected devices list. Follow the on-screen instructions to connect the device to your device.

Resetting weight record

To reset the daily weight record, tap  → **Reset daily data** → **OK**.

Installing additional S Health apps

You can download and install various apps that are compatible with this app.

- 1 Tap  → **More apps**.
- 2 Tap **More** and select an app.
- 3 Follow the on-screen instructions and install the app.

S Health settings

On the S Health main screen, tap  → **Settings**, and then select one of the following:

- **Profile:** Edit your physical statistics.
- **Accounts:** Sign in to your Samsung account to manage S Health data online.
- **Password:** Set a PIN to lock or unlock S Health.
- **Unit settings:** Set unit options.
- **Notification:** Set the device to display new events and achievements.
- **My accessories:** View and manage accessory device connections.
- **Compatible accessories:** View accessories that are compatible with the device or manage connected accessories.
- **Reset data:** Reset S Health data.
- **Check for updates:** Check the current version of S Health.
- **Terms and Conditions:** View the terms and conditions, including personal information and data retention policies.
- **About S Health:** View information about S Health.

- The personal information collected by S Health may be stored on the device for informative purposes only. Samsung does not receive, store, nor transmit your personal information. (But if you sign in to your Samsung account from S Health, your data may be saved on the server for data backup purposes.) Personal information may be stored until the completion of such purposes. You can delete personal data stored by S Health by using the Reset data option in the Settings menu or by uninstalling the app. Resetting the data will delete all information stored in the server. To delete any data you have shared with social networks or transferred to storage devices, you must delete them separately.
- You assume full responsibility for the inappropriate use of data shared on social networks or transmitted to others. Use caution when sharing your personal data with others.
- To secure your personal information, on the S Health main screen, tap **⋮** → **Settings** → **Password**, and then set a password.
- If the device is connected to measuring devices, verify the communication protocol to confirm proper operation. If you use a wireless connection, such as Bluetooth or ANT+, the device may be affected by electronic interference from other devices. Avoid using the device near other devices that transmit radio waves.
- The content used in the S Health app may vary depending on the software version of the app. The services provided with the app are subject to change or the cancellation of support without prior notice.

Security features

Emergency mode

About emergency mode

Use this mode to extend the device's standby time when you are in an emergency situation. When this mode is activated, the screen brightness decreases and battery consumption is reduced by restricting some features. You can also turn on the flash, sound alarms, and send your location information to others in a message.

Activating emergency mode

Press and hold the Power button, and then tap **Emergency mode**. Alternatively, on the Apps screen, tap **Settings** → **Safety assistance** → **Emergency mode**, and then tap the **Emergency mode** switch to activate it.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Deactivating emergency mode

To deactivate emergency mode, press and hold the Power button, and then tap **Emergency mode**. Alternatively, tap **⋮** → **Disable Emergency mode**. Emergency mode is deactivated.

Help message

About help message

You can preset contacts to send a message to in an emergency. Send messages to your primary contacts by quickly pressing the Power button three times.

On the Apps screen, tap **Settings** → **Safety assistance**.

Adding primary contacts

- 1 On the Apps screen, tap **Settings** → **Safety assistance**.
- 2 Tap **Manage primary contacts** → **Create primary contact**.
- 3 Tap **Create new contact** and enter contact information or tap **Select from contacts** to add an existing contact as a primary contact.

Setting help messages

On the Apps screen, tap **Settings** → **Safety assistance** → **Send help messages**, and then tap the **Send help messages** switch to activate it. Select content to include in help messages.

Sending help messages

In an emergency situation, quickly press the Power button three times. The device sends messages to your primary contacts. The messages include your location information.

Severe weather notifications (Geo News)

About severe weather notifications (Geo News)

Use this feature to receive notifications about severe weather conditions close to your current location.

- The feature identifies your location and provides you with information about disasters if they occur in your area. The information provided may differ depending on the service provider in your current location.

To view information about severe weather conditions and the regions and languages that the information is available in, visit www.samsung.com/geonews.

- To receive severe weather notifications, connect the device to a Wi-Fi or mobile network.
- This feature may not be available depending on the region or service provider.

Receiving notifications

On the Apps screen, tap **Settings** → **Safety assistance** → **Geo News**, and then tap the **Geo News** switch to activate it.

Warning notifications

Tick **Geo News notification pop-ups**.

If the weather conditions worsen, the device displays the notification in a pop-up window. You can make an emergency call or send emergency messages to preset contacts from the pop-up window.

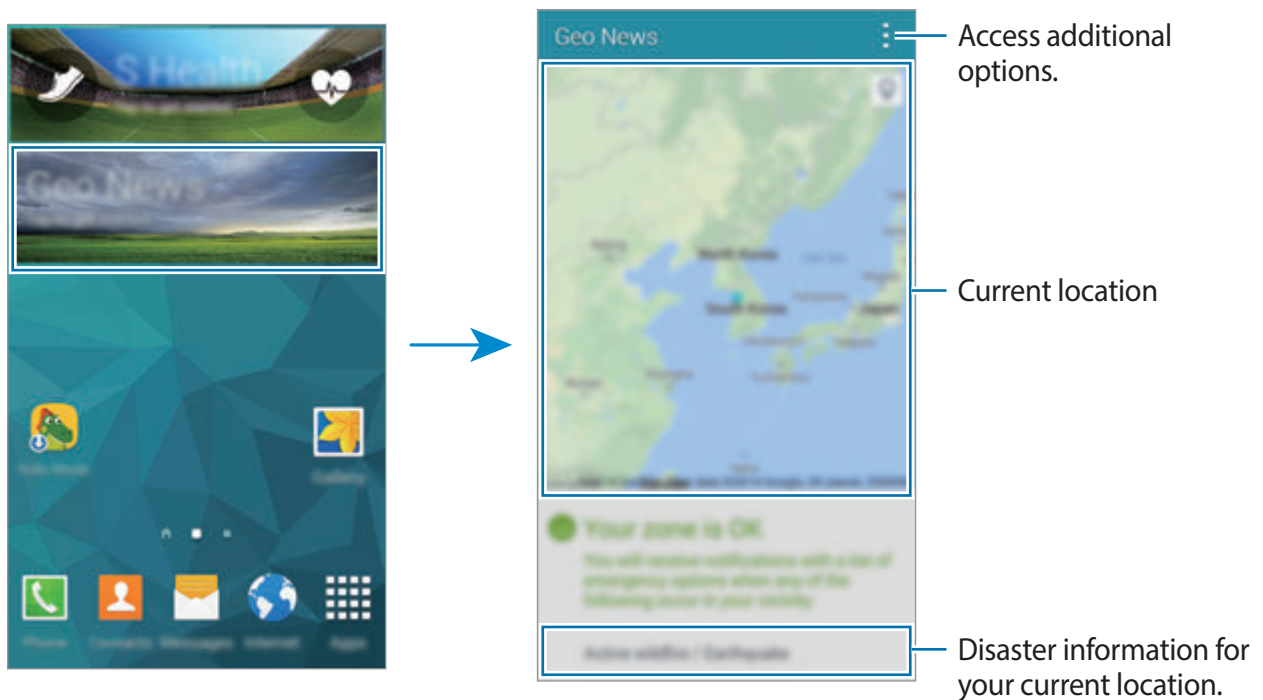

Watch notifications

Notifications for less severe weather conditions appear on the status bar at the top of the screen. The information provided is displayed in the **Geo News** widget.

Using the geo news widget

You can view your current location and information about disasters in your region in the **Geo News** widget.

On the Home screen, scroll left and tap the **Geo News** widget.

Useful apps and features

Kids Mode

Starting Kids Mode

Use this widget to provide a fun and safe environment for children by restricting children's access to certain apps or content.

Before you use this widget, you need to download and install it. On the Home screen, tap **Kids Mode** → **Install**. When it is installed, the widget appears on the Home and App screens.

To start kids mode, tap **Kids Mode** on the Home or Apps screen.

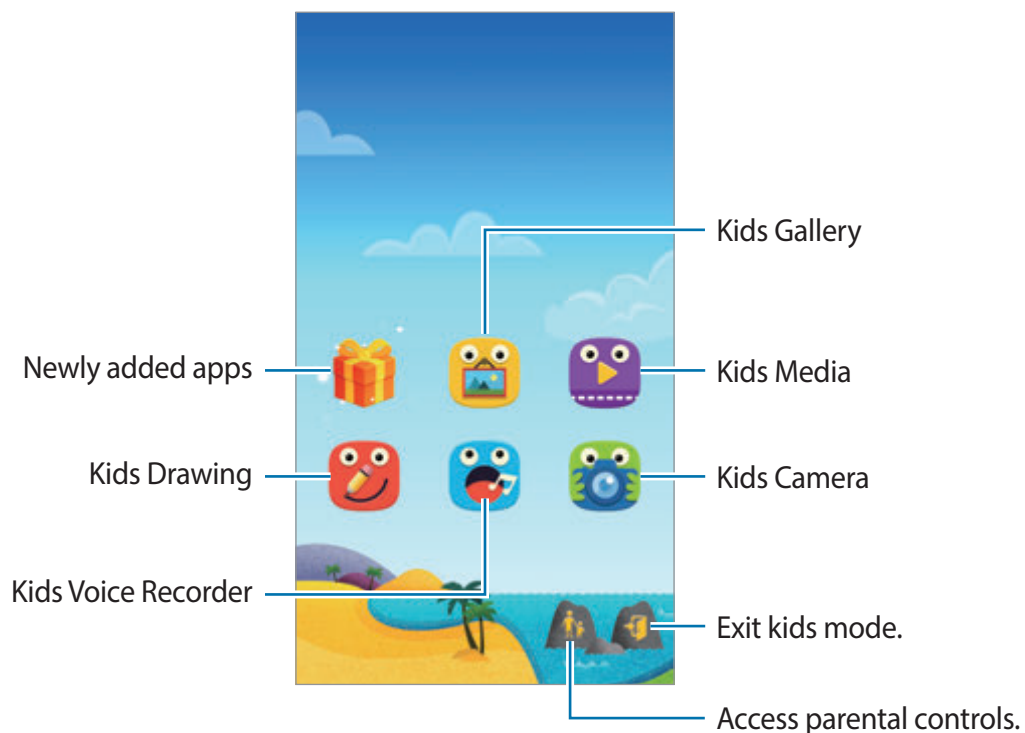

When you launch this widget for the first time, tap **Set PIN** at the bottom of the screen. Then, follow the on-screen instructions.

If the **Kids Mode** widget is accidentally uninstalled, you can reinstall it. On the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold the **Kids Mode** widget. Drag the widget to the Home screen and tap **Kids Mode** to reinstall it.

Kids mode home screen

The Home screen is the starting point to access all of apps in kids mode.

Use this app to view saved images, drawings, voice recordings, and media files that you allow your child to access.

Use this app to play videos. Before you use this app, add videos that are saved on the device to the app. Refer to [Parental control](#) for more information.

Use this app to create a drawing with a pen, a brush, and more.

Use this app to record or play voice recordings.

Use this app to take photos or record videos.

Kids mode play area

Scroll right on the Home screen to open kids mode play area.

You can interact with characters, background objects, and more.

Parental control

Use this feature to set restrictions for kids mode to control access to content and apps. You can change kids mode settings, usage time limits, and more.

On the Home screen, tap  and enter the PIN.

To exit parental control, press the Home button.

Tap  and use the following:

- **Children's name:** View and edit children's profile.
- **Activity:** View information about how your children use the device, such as playing duration and frequently-used apps.
- **Daily playtime limit:** Set a time limit to manage your children's usage.
- **Applications:** View and add apps that are allowed to be used in kids mode.
- **Media:** Allow your children to access certain images and videos saved on the device.
- **General:** Configure kids mode settings.
- **Kids Store:** Download apps for kids from **Samsung Apps (GALAXY Apps)**.

S Finder

Use this app to search for content on the device. You can apply various filters and view the search history.

Open the notifications panel and tap **S Finder**.

Searching for content

Tap the search field and enter a keyword, or tap  and say a keyword.

To get more refined results, tap  and apply filters under the search field.

To update the list of search results, tap  → **Refresh**.

You can set the search parameters using the available filters or select search categories. Tap  → **Settings** → **Select filters** or **Select search category**.

Managing the search history

You can view or delete your past searches. Select a previous search item to perform the search again.

To delete the search history, tap  → **Settings** → **Delete history**, select search keywords, and then tap **Done**.

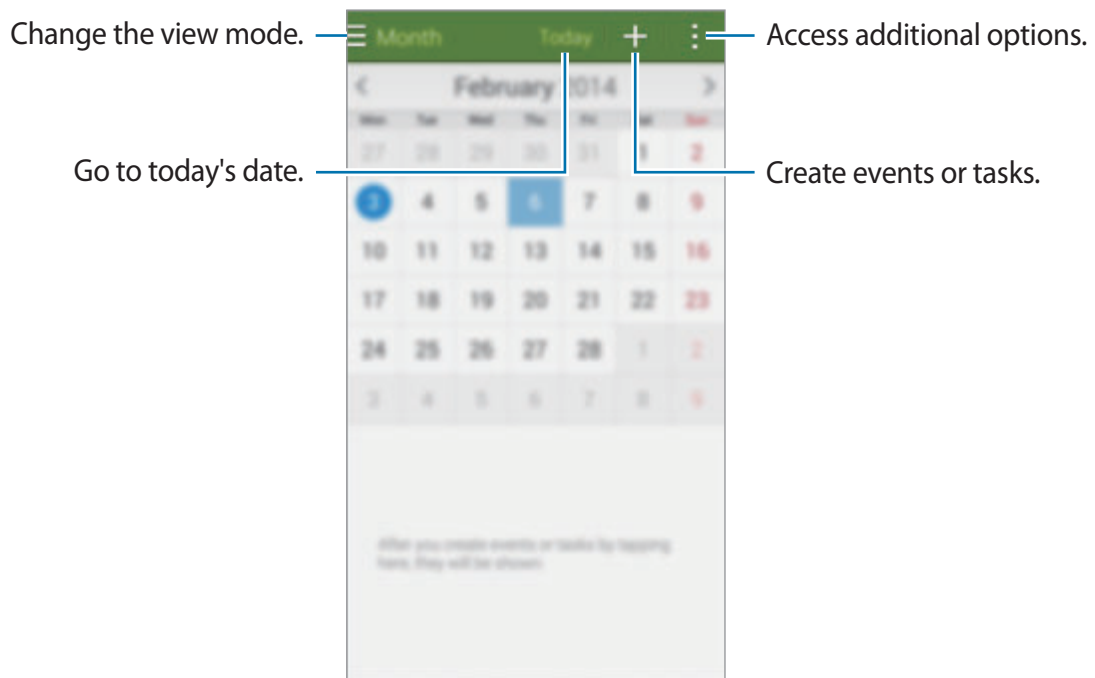

To set the device to not save the search history, tap  → **Settings**, and deselect **Save search history**.

S Planner

Starting S Planner

Use this app to manage events and tasks.

Tap **S Planner** on the Apps screen.

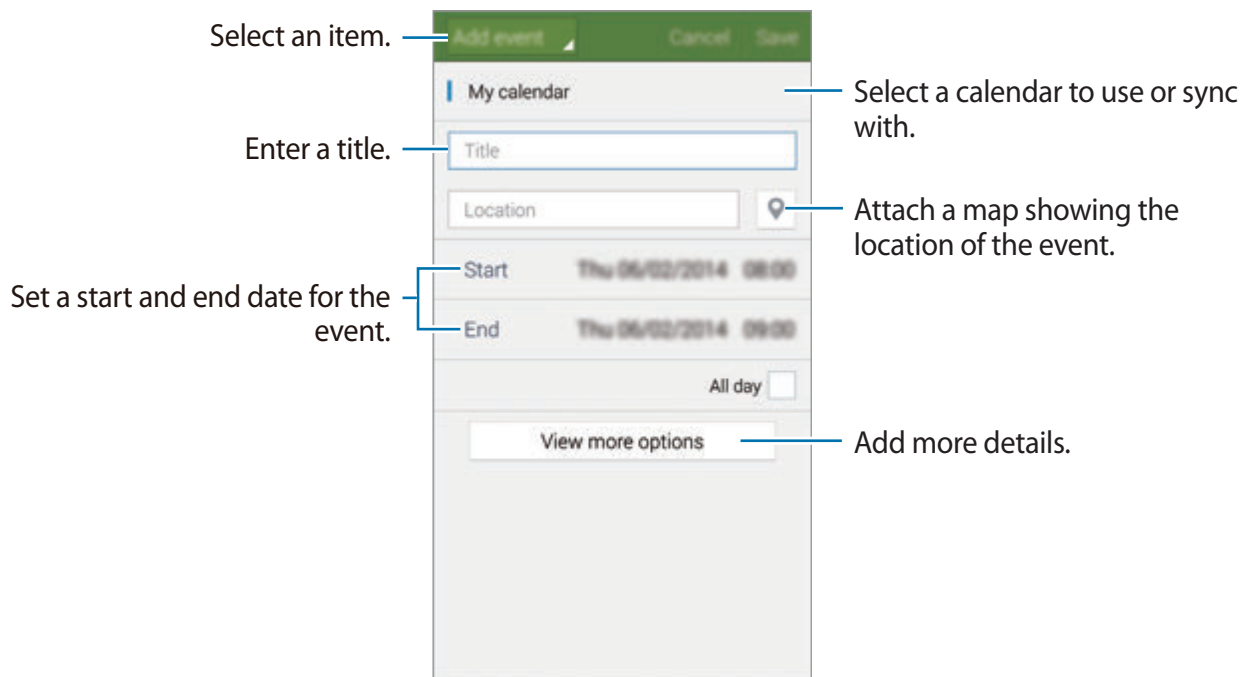

Tap  and use the following:

- **Go to:** Move to a specific date.
- **Delete:** Delete events or tasks.
- **Search:** Search for events or tasks.
- **Calendars:** Select the calendars to display.
- **Sync:** Sync events and tasks with your accounts.
- **Settings:** Change settings for S Planner.

Creating events or tasks

- 1 Tap **S Planner** on the Apps screen.
- 2 Tap **+**. Alternatively, select a date with no events or tasks in it and tap the date again. If the date already has saved events or tasks in it, tap the date and tap **+**.
- 3 Select either event or task and enter details.
 - **Add event:** Set a start and end date for an event. You can set an optional repeat setting.
 - **Add task:** Add a task to do on a specific date. You can set an optional priority setting.

- 4 Tap **Save** to save the event or task.

Syncing events and tasks with your accounts

Tap **S Planner** on the Apps screen.

To sync events and tasks with your accounts, tap  → **Sync**.

To add accounts to sync with, tap  → **Calendars** → **Add account**. Then, select an account to sync with and sign in. When an account is added, a green circle is displayed next to the account name.

To change an account's syncing option, on the Apps screen, tap **Settings** → **Accounts**, and then select an account service.

Deleting events or tasks

Tap **S Planner** on the Apps screen.

To delete events or tasks, tap  → **Delete**, select the events or tasks, and then tap **Done** → **OK**.

To delete an event or task while viewing it, tap  → **OK**.

To mark tasks as completed, tap a date that has tasks in it and tick completed tasks.

Sharing events or tasks

Tap **S Planner** on the Apps screen.

To share an event or task while viewing it, tap  → **Share via**, and then select a sharing method.

S Voice

About S Voice

Use this app to command the device by voice to perform various features.

Tap **S Voice** on the Apps screen. Alternatively, press the Home button twice.

To deactivate the access by pressing the Home button, tap **⋮** → **Settings**, and then deselect **Open via the home key**.

This app may not be available depending on the region or service provider.

Setting the language

Tap **⋮** → **Settings** → **Language**, and then select a language.

The selected language is applied to **S Voice** only, not to the language displayed on the device.

Using S Voice

When you launch **S Voice**, the device starts voice recognition and the microphone icon turns red.

Say a voice command.

If you say a command and the device recognises it, the microphone icon at the bottom of the screen flashes green. Then, the device performs the command.

Tips for better voice recognition:

- Speak clearly.
- Speak in quiet places.
- Do not use offensive or slang words.
- Avoid speaking in dialectal accents.

The device may not recognise your commands or may perform unwanted commands depending on your surroundings or how you speak.

Waking up S Voice in standby mode

If S Voice is not used for a certain period, it automatically switches to standby mode.

Tap the microphone icon or say “Hi Galaxy” to the device to resume voice recognition.

Changing the wake-up command

You can change the wake-up command from “Hi Galaxy”. The wake-up command is used to launch **S Voice** when the device is in standby mode.

Tap  → **Settings** → **Voice wake-up** → **Set wake-up command**.

Disabling voice feedback

Tap  → **Disable Voice feedback**. The device stops providing voice feedback when you say commands.

Correcting unwanted voice commands

You can edit the voice commands if the device does not recognise them correctly.

To correct a voice command, tap the last speech bubble that contains your spoken text and edit the text with the keyboard.

Clock

Alarm

On the Apps screen, tap **Clock** → **Alarm**.

Setting alarms

Tap **+** in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap **Save**. To activate or deactivate alarms, tap  next to the alarm in the alarms list.

- **Snooze:** Set an interval and the number of times for the alarm to repeat after the preset time.
- **Smart alarm:** Set a time and tone for the smart alarm. A smart alarm starts at a low volume a few minutes before a preset alarm is scheduled to sound. The volume of the smart alarm increases gradually until you turn it off or the preset alarm sounds.

Stopping alarms

Drag  outside the large circle to stop an alarm. If you have previously enabled the snooze option, drag  outside the large circle to repeat the alarm after a specified length of time.

Deleting alarms

Tap  → **Delete**, select alarms, and then tap **Done**.

World clock

On the Apps screen, tap **Clock** → **World clock**.

Creating clocks

Tap **+** and enter a city name or select a city from the cities list.

To apply summer time, tap and hold a clock, and then tap .

Deleting clocks

Tap  → **Delete**, select clocks, and then tap **Done**.

Stopwatch

On the Apps screen, tap **Clock** → **Stopwatch**.

Tap **Start** to time an event. Tap **Lap** to record lap times.

Tap **Stop** to stop timing. To clear lap times, tap **Reset**.

To set the device to dim the screen during laps, tap  → **Settings** → **Keep screen dimmed**.

Timer

On the Apps screen, tap **Clock** → **Timer**.

Set the duration, and then tap **Start**.

Drag  outside the large circle when the timer goes off.

To change the alarm ringtone settings, tap  → **Settings**.

Calculator

Use this app for simple or complex calculations.

Tap **Calculator** on the Apps screen.

Rotate the device to landscape orientation to display the scientific calculator. If **Screen rotation** is disabled, tap  → **Scientific calculator**.

Memo

Use this app to create memos and organise them by category.

Tap **Memo** on the Apps screen.

Composing memos

Tap  on the memos list and enter a memo. While composing a memo, use the following options:

-  : Create or set a category.
-  : Insert images.
-  : Make a voice recording to insert.

To save the memo, tap **Save**.

To edit a memo, tap a memo, and then tap the content of the memo.

Searching for memos

Tap  on the memos list and enter a keyword to search for memos that include the keyword.

Adding and managing categories

Create categories to sort and manage your memos.

On the memos list, tap  → **Manage categories**.

To add a new category, tap , enter a category name, and then tap **OK**.

To delete a category, tap  next to the category, and then tap **OK**.

To rename a category, tap and hold a category name, enter a new name for the category, and then tap **OK**.

To change the category order, tap  next to a category and drag it up or down to another position.

Accessing additional options

You can access additional options on the memos list and while viewing memos.

On the memos list, tap  and use the following options:

- **Select:** Select memos to apply options.
- **Delete:** Delete memos.
- **Account:** Sync memos with your Samsung account.

While viewing a memo, tap  and use the following options:

- **Delete:** Delete the memo.
- **Share Via:** Share the memo with others.
- **Print:** Print the memo by connecting the device to a printer. Refer to [Mobile printing](#) for more information.

Voice Recorder

Recording voice memos

Tap **Voice Recorder** on the Apps screen.

Tap  to start recording. Speak into the microphone. Tap  to pause recording. To cancel recording, tap . Tap  to finish recording.

While recording a voice memo, tap  to insert a bookmark.

To set the device to remove background noise, tap  → **Settings**, and then tick **Noise reduction**.

Saving files with contextual tags

Add contextual tags, such as locations and dates, to filenames when saving voice memos.

Tap  → **Settings**, and then tick **Contextual filename**. The device adds the recording date to a filename. To add the location where a voice memo is recorded, tap  → **Settings**, and then tick **Location tags**.

Playing voice memos

Tap **Voice Recorder** on the Apps screen.

Tap  and select a voice memo to play.

- : Trim the voice memo.
- : Set a portion of the voice memo for loop playback.
- **x1.0**: Adjust the playback speed.
- : Skip a silent portion in the voice memo.
- : Insert bookmarks in the voice memo.
-  / : Pause or resume playback.
-  / : Skip to the previous or next voice memo.

Using the bookmarks list

You can mark specific points in a voice memo with bookmarks. Each bookmark is marked with a bookmark icon on the voice memo.

To view the bookmark details while a voice memo is playing, tap  → **Bookmarks**. Select a bookmark from the bookmark list to play the voice memo from that position.

Managing voice memos

On the Apps screen, tap **Voice Recorder** → .

Tap  to search for voice memos.

Tap  to delete voice memos.

Tap  and select one of the following:

- **Select**: Select voice memos to apply options.
- **Sort by**: Sort memos by date, title, or category.
- **Filter by category**: View memos filtered by a category.
- **Edit categories**: Add, delete, or rename categories.
- **Settings**: Change the voice recorder settings.

Renaming voice memos

Tap and hold the voice memo, tap  → **Rename**, enter a new name for the voice memo, and then tap **OK**.

Managing categories

Tap  → **Edit categories** → , enter a category name, select a colour, and then tap **Done**.

To change or assign voice memo categories, in the list of voice memos, tap and hold the voice memo. Then, tap  → **Change category**, and then select the category.

To filter voice memos by category, tap  → **Filter by category**, and then select the category.

Dropbox

Use this app to save and share files with others via Dropbox cloud storage. When you save files to Dropbox, your device automatically syncs with the web server and any other devices that have Dropbox installed.

This app may not be available depending on the region or service provider.

1 Tap **Dropbox** on the Apps screen.

2 Sign in to your Dropbox account. If you do not have it, create a Dropbox account.

3 Tap **Turn on Camera Upload**.

The device uploads photos taken with the device's camera to Dropbox. To upload videos, tap the **Include videos** switch to activate it.

To upload photos or videos manually, tap **Skip this**.

4 Use the following functions:

-  : Upload or open files. Tap  → **Upload here** to upload files.
-  : View the uploaded photos or videos. Tap  to share or delete files, or create albums.
-  : Open files in the favourites list.
-  : View notifications.

Flipboard

Use this app to view live social network updates and news in a personalised magazine format.

Tap **Flipboard** on the Apps screen.

This app may not be available depending on the region or service provider.

When you launch this app for the first time or restart it after performing a data reset, follow the on-screen instructions to finish the setup.

On the Flipboard main screen, select from various news articles and subscriptions.

Editing subscriptions

On the Flipboard main screen, tap  → **My Flipboard** to view your subscriptions.

To delete subscriptions or to change their location, tap and hold an item. Then, drag the item to the rubbish bin or to a new location.

To add more subscriptions, tap , select a subscription under **DISCOVER MORE**, and then tap .

Creating personalised magazines

Save various content by creating your own magazine to read later or to share with others.

While you are reading content, tap  to create a magazine. You can create a new magazine or save the selected content to an existing magazine.

To view your magazines, tap  → **My Flipboard**.

To view help information, tap  → **My Flipboard** →  → **Help**. You can visit the Flipboard website for more information.

Smart Remote

About Smart Remote

Use this app to connect to a TV and use the device as a remote control. You can search for and select TV programmes and control channels with your device.

Tap **Smart Remote** on the Apps screen.

Connecting to a TV

- 1 Tap **Smart Remote** on the Apps screen.
- 2 Tap **Select country or region** and select a country.
- 3 Select a region and select the broadcast service.
The available TV programmes appear.

Using the device as a remote control

You can turn the TV on or off, browse channels, or adjust the volume level on the TV using the device as a remote control.

- 1 On the device, tap  → **Continue**.
- 2 Select the TV brand.
- 3 Ensure that the device's infrared port is facing the TV and tap . Then, tap **Yes, this code 1 works** if the device turns off the TV.

If the device does not turn off the TV, tap **Send this code 1 again** or **No, test next code 2**, and then repeat this until the TV recognises the signal.

- 4 Select a channel source.
- 5 When the setup is completed, tap .

Watching TV using the device

Select a TV programme from the list of available programmes to watch on the connected TV. Ensure that the device's infrared port is facing the TV.

- 1 Tap  → **TV shows**, **Movies**, or **Sports** and scroll left or right to select a category.
- 2 Select a TV programme and tap **Watch now**.
The selected programme will be shown on the connected TV.
- 3 Tap  to change channels or adjust the volume.
The remote control panel appears on the screen.

Setting programme reminders

- 1 Select a TV programme to watch.
- 2 Tap **Reminder**, set an alarm to remind you of the TV programme's start time, and then tap **Done**.
The alarm goes off at the preset time.

Torch

Use this widget to turn the flash on or off to improve visibility.

To add it to the Home screen, on the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold the **Torch** widget, and then drag it to the Home screen.

Tap the **Torch** widget on the Home screen to turn it on or off.

Magnifier

Use this widget to magnify text or objects with the rear camera.

To add it to the Home screen, on the Home screen, tap and hold an empty area, tap **Widgets**, tap and hold the **Magnifier** widget, and then drag it to the Home screen.

Tap the **Magnifier** widget on the Home screen.

Tap **+** or **−** to adjust the magnification.

To focus on the centre of the screen, tap . You can also adjust the focus manually by tapping where you want to focus.

To turn on the flash to view text or objects in dark conditions, tap .

To take a photo of text or objects, tap .

Google apps

Google provides entertainment, social network, and business apps. You may require a Google account to access some apps. Refer to [Setting up accounts](#) for more information.

To view more app information, on the each app's main screen, tap  → **Help**.

Some apps may not be available or may be labelled differently depending on the region or service provider.

Chrome

Search for information and browse webpages.

Google Mail

Send or receive emails via the Google Mail service.

Google+

Share your news and follow updates that your family, friends, and others share. You can also back up your photos and videos, and more.

Maps

Find your location on the map, search for locations, and view location information for various places.

Play Music

Discover, listen to, and share music on your device.

Play Movies & TV

Watch videos stored on your device and download various content to watch from the **Play Store**.

Play Books

Download various books from **Play Store** and read them.

Play Newsstand

Read news and magazines that interest you in one convenient location.

Play Games

Download games from **Play Store** and play them with others.

Drive

Store your content on the cloud, access it from anywhere, and share it with others.

YouTube

Watch or create videos and share them with others.

Photos

Manage photos, albums, and videos that you have saved on the device and uploaded to **Google+**.

Hangouts

Chat with your friends individually or in groups and use images, emoticons, and video calls while you are chatting.

Google

Search quickly for items on the Internet or your device.

Voice Search

Search quickly for items by saying a keyword or phrase.

Google Settings

Configure settings for some features provided by Google.

Connecting with other devices

Bluetooth

About Bluetooth

Bluetooth creates a direct wireless connection between two devices over short distances. Use Bluetooth to exchange data or media files with other devices.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes).
Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

Pairing with other Bluetooth devices

- 1 On the Apps screen, tap **Settings** → **Bluetooth**, tap the **Bluetooth** switch to activate it, and then tap **Scan**.

The detected devices are listed.

To set the device as visible to other devices, tap the device name.

- 2 Select a device to pair with.

If your device has paired with the device before, tap the device name without confirming the auto-generated passkey.

If the device you want to pair with is not in the list, request that the device turns on its visibility option.

- 3 Accept the Bluetooth authorisation request on both devices to confirm.

Sending and receiving data

Many apps support data transfer via Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

Sending an image

- 1 On the Apps screen, tap **Gallery**.

- 2 Select an image.

- 3 Tap  → **Bluetooth**, and then select a device to transfer the image to.

If the device you want to pair with is not in the list, request that the device turns on its visibility option. Or, set your device as visible to other devices.

- 4 Accept the Bluetooth authorisation request on the other device.

Receiving an image

When another device sends you an image, accept the Bluetooth authorisation request. The received image is saved in the **Gallery** → **Download** folder.

Unpairing Bluetooth devices

- 1 On the Apps screen, tap **Settings** → **Bluetooth**.
The device displays the paired devices in the list.
- 2 Tap  next to the device's name to unpair.
- 3 Tap **Unpair**.

Wi-Fi Direct

About Wi-Fi Direct

Wi-Fi Direct connects devices directly via a Wi-Fi network without requiring an access point.

Connecting to other devices

- 1 On the Apps screen, tap **Settings** → **Wi-Fi**, and then tap the **Wi-Fi** switch to activate it.
- 2 Tap  → **Wi-Fi Direct**.
The detected devices are listed.
- 3 Select a device to connect to.
To connect to multiple devices, tap  → **Multi-connect**.
To change the device name, tap  → **Rename device**.
- 4 Accept the Wi-Fi Direct authorisation request on the other device to confirm.

Sending and receiving data

You can share data, such as contacts or media files, with other devices. The following actions are an example of sending an image to another device.

Sending an image

- 1 On the Apps screen, tap **Gallery**.
- 2 Select an image.
- 3 Tap  → **Wi-Fi Direct**, and then select a device to transfer the image to.
- 4 Accept the Wi-Fi Direct authorisation request on the other device.

Receiving an image

When another device sends you an image, accept the Wi-Fi Direct authorisation request. The received image is saved in the **Gallery** → **Download** folder.

Ending the device connection

- 1 On the Apps screen, tap **Settings** → **Wi-Fi**.
- 2 Tap  → **Wi-Fi Direct**.
The device displays the connected devices in the list.
- 3 Tap **End connection** → **OK** to disconnect the devices.

NFC

About NFC

Your device allows you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps.

The battery contains a built-in NFC antenna. Handle the battery carefully to avoid damaging the NFC antenna.

Using the NFC feature

Use the NFC feature to send images or contacts to other devices, and read product information from NFC tags. If you insert a SIM or USIM card that has a payment feature, you can use the device to make payments conveniently.

On the Apps screen, tap **Settings** → **NFC**, and then tap the **NFC** switch to activate it. Alternatively, open the quick setting panel and tap **NFC** to activate it.

Place the NFC antenna area on the back of your device near an NFC tag. The information from the tag appears.

Ensure that the device's screen is unlocked. Otherwise, the device will not read NFC tags or receive data.

Making a purchase with the NFC feature

Before you can use the NFC feature to make payments, you must register for the mobile payment service. To register or get more information about the service, contact your service provider.

On the Apps screen, tap **Settings** → **NFC**, and then tap the **NFC** switch to activate it. Alternatively, open the quick setting panel and tap **NFC** to activate it.

Touch the NFC antenna area on the back of your device to the NFC card reader.

To set the default payment app, tap **Tap and pay** and select an app.

The payment services list may not include all available payment apps.

Sending data

Use the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.

- 1 On the Apps screen, tap **Settings** → **NFC**, and then tap the **NFC** switch to activate it. Alternatively, open the quick setting panel and tap **NFC** to activate it.
- 2 Tap **Android Beam** and tap the **Android Beam** switch to activate it.
- 3 Select an item and touch the other device's NFC antenna to your device's NFC antenna.
- 4 When **Touch to beam.** appears on the screen, tap your device's screen to send the item.

S Beam

Use this feature to send data, such as videos, images, and documents.

- 1 Activate the S Beam feature on the receiving device.
 - 2 On the Apps screen, tap **Settings** → **NFC**, and then tap the **NFC** switch to activate it. Alternatively, open the quick setting panel and tap **NFC** to activate it.
 - 3 Tap **S Beam** and tap the **S Beam** switch to activate it.
 - 4 Select a file and touch the other device's NFC antenna to your device's NFC antenna.
 - 5 When **Touch to beam.** appears on the screen, tap your device's screen to send the file.
-  • Do not send copyright-protected data via S Beam. Doing so may violate copyright laws. Samsung is not responsible for any liabilities caused by the illegal use of copyrighted data.
 - If both devices try to send data simultaneously, the file transfer may fail.

Quick connect

About Quick Connect

Use this feature to easily search and connect to nearby devices. You can use the device as a remote control by connecting it to a TV. You can also conveniently share content stored on your device with computers.

- Connection methods may vary depending on the type of connected devices or the shared content.
- Device name may vary depending on the Bluetooth devices to pair with. For example, the device name can be shown as BT MAC.

Before using this feature

- When connecting to a device that supports the Quick Connect feature, turn on the device's screen to make it detectable.
- When connecting to a device that does not support the Quick Connect feature, ensure that Wi-Fi Direct or the Bluetooth feature is activated.

Connecting to other devices

1 Open the notifications panel and tap **Quick connect**.

When the panel opens, the Bluetooth feature is activated automatically and the device searches for nearby devices.

2 Select a device to connect to.

The next steps may vary depending on the connected device. Follow the on-screen instructions to complete the connection between the devices.

To allow nearby devices to search for your device and connect to it, tap **⋮ → Always ready to connect**, and then tap the **Always ready to connect** switch to activate it.

Re-searching for devices

If the desired device does not appear in the list, search for the device.

Tap  and select the device from the list of detected devices.

Disconnecting devices

To deactivate the Quick Connect feature, tap  at the top of the screen. Alternatively, tap .

Sharing content

Share content with the connected devices.

- 1 Open the notifications panel and tap **Quick connect**.
- 2 Select a device from the list of detected devices.
- 3 Select a media category.
- 4 Select the content to share and tap **Done**.
Your device sends the content to the connected device.

Connecting to a TV

Connect the device to a TV and control the TV by using the device as a remote control.

- 1 Open the notifications panel and tap **Quick connect**.
Ensure that the TV is turned on.
- 2 Select a TV from the list of detected devices.
When the device is connected to the TV, a remote control layout appears on the screen.
When you connect the device to a TV for the first time, tap **Set up Remote control**. Then, follow the on-screen instructions to complete connecting the devices.
- 3 Control the connected TV using the remote control.

Screen Mirroring

About Screen Mirroring

Use this feature to connect your device to a large screen with an AllShare Cast dongle or HomeSync and then share your contents. You can also use this feature with other devices that support the Wi-Fi Miracast feature.

- This feature may not be available depending on the region or service provider.
- Miracast-enabled devices that do not support High-bandwidth Digital Content Protection (HDCP 2.X) may not be compatible with this feature.
- Some files may be buffered during playback, depending on the network connection.
- To save energy, deactivate this feature when not in use.
- If you specify a Wi-Fi frequency, AllShare Cast dongles or HomeSync may not be detected or connected.
- If you play videos or games on a TV, select an appropriate TV mode to get the best experience.

Viewing content on a TV

Before you connect a TV to your device, connect the TV and the screen mirroring-enabled device. To set up the connection, refer to the device's user manual. The following actions are an example of viewing content on a TV connected via an AllShare Cast dongle.

- 1 Connect the screen mirroring-enabled device to the TV using an HDMI cable.
- 2 On the TV, select a connection mode, such as HDMI mode, to connect an external device.
- 3 On the Apps screen, tap **Settings** → **Screen Mirroring**.
The detected devices are listed.
- 4 Select a device to connect to.
Your device's screen appears on the TV screen.
If you connect the device for the first time, tap and hold the dongle's name in the list and enter the PIN shown on the TV screen.
- 5 Open or play a file, and then control the display with the keys on your device.

Stopping viewing the content

On the Apps screen, tap **Settings** → **Screen Mirroring**, and then tap the **Screen Mirroring** switch to deactivate it.

Mobile printing

Connect the device to a printer via the Wi-Fi feature or Wi-Fi Direct, and print image or documents.

Some printers may not be compatible with the device.

Connecting to a printer

On the Apps screen, tap **Settings** → **Printing**, select a printer type, and then tap the switch at the top right of the screen to activate it. The device searches for printers that are connected to the same Wi-Fi network as your device. Select a printer to use as the default printer.

To add printers manually, tap **:** → **Add printer** → **+**, enter details, and then tap **OK**.

To change printing settings, tap **:** → **Printing settings**.

Printing content

While viewing content, such as images or documents, tap **:** → **Print**, and then select a printer.

Device & data manager

Upgrading the device

The device can be upgraded to the latest software.

Upgrading over the air

The device can be directly upgraded to the latest software by the firmware over-the-air (FOTA) service.

On the Apps screen, tap **Settings** → **About device** → **Software update** → **Update now**.

Upgrading with Samsung Kies

Download the latest version of Samsung Kies from the Samsung website. Launch Samsung Kies and connect the device to the computer. Samsung Kies automatically recognises the device and shows available updates in a dialogue box, if any. Click the Update button in the dialogue box to start upgrading. Refer to the Samsung Kies help for more information about how to upgrade.

- Do not turn off the computer or disconnect the USB cable while the device is upgrading.
- While upgrading the device, do not connect other media devices to the computer. Doing so may interfere with the update process.

Transferring files between the device and a computer

Move audio, video, image, or other types of files from the device to the computer, or vice versa.

Do not disconnect the USB cable from the device when you are transferring files. Doing so may cause data loss or device damage.

- Do not disconnect the device from the computer when you play files saved in the device on the connected computer. After you finish playing the file, disconnect the device from the computer.
- The devices may not connect properly if they are connected via a USB hub. Directly connect the device to the computer's USB port.

Connecting as a media device

- 1 Connect the device to the computer using the USB cable.
- 2 Open the notifications panel, and then tap **Connected as a media device** → **Media device (MTP)**.
Tap **Camera (PTP)** if your computer does not support Media Transfer Protocol (MTP) or not have any appropriate driver installed.
- 3 Transfer files between your device and the computer.

Connecting with Samsung Kies

Samsung Kies is a computer app that manages media contents and personal information with Samsung devices. Download the latest Samsung Kies from the Samsung website.

- 1 Connect the device to the computer using the USB cable.
Samsung Kies launches on the computer automatically. If Samsung Kies does not launch, double-click the Samsung Kies icon on the computer.
- 2 Transfer files between your device and the computer.
Refer to the Samsung Kies help for more information.

Backing up and restoring data

Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information to a backup account and access it later.

Using a Google account

- 1 Tap **Settings** on the Apps screen.
- 2 Tap **Backup and reset** and tick **Back up my data**.
- 3 Tap **Backup account** and select an account as the backup account.

To restore data, you must sign in to your Google account via the setup wizard. You can launch and open the setup wizard by performing a factory data reset on the device. If you do not sign in to your Google account via the setup wizard, you cannot restore the backup data.

Using a Samsung account

- 1 On the Apps screen, tap **Settings** → **Accounts** → **Add account** → **Samsung account**, and then sign into your Samsung account.
 - 2 Tap **Settings** on the Apps screen.
 - 3 Tap **Cloud** → **Backup**, tick the items to back up, and then tap **Back up now** → **Back up**.
-  To restore data, on the Apps screen, tap **Settings** → **Cloud** → **Restore**, select the items, and then tap **Restore now**.

Performing a data reset

Delete all settings and data on the device. Before performing a factory data reset, ensure you back up all important data stored on the device. Refer to [Backing up and restoring data](#) for more information.

On the Apps screen, tap **Settings** → **Backup and reset** → **Factory data reset** → **Reset device** → **Erase everything**. The device automatically restarts.

Settings

About Settings

Use this app to configure the device, set app options, and add accounts.

Tap **Settings** on the Apps screen.

To search for settings by entering keywords, tap **Q**.

QUICK SETTINGS

View the list of your favourite setting options.

To edit the list of favourite setting options, tap **:** → **Edit quick settings**, select a settings option, and then tap **Done**.

NETWORK CONNECTIONS

Wi-Fi

Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices.

On the Settings screen, tap **Wi-Fi**, and then tap the **Wi-Fi** switch to activate it.

The device can maintain a stable network connection by automatically selecting either the Wi-Fi or mobile network to use the strongest signal. To automatically switch between networks, tick **Smart network switch**.

To use options, tap ⋮.

- **Scan:** Search for available networks.
- **Wi-Fi Direct:** Activate Wi-Fi Direct and connect devices directly via Wi-Fi to share files.
- **Advanced:** Customise Wi-Fi settings.
- **WPS push button:** Connect to a secured Wi-Fi network with a WPS button.
- **WPS PIN entry:** Connect to a secured Wi-Fi network with a WPS PIN.
- **Help:** View help information for Wi-Fi.

Setting Wi-Fi sleep policy

Tap ⋮ → **Advanced** → **Keep Wi-Fi on during sleep**.

When the screen is turned off, the device automatically turns off Wi-Fi connections. When this happens, the device automatically accesses mobile networks if it is set to use them. This may incur data transfer fees. To avoid additional charges, set this option to **Always**.

Setting Network notification

The device can detect open Wi-Fi networks and display an icon on the status bar to notify when available.

Tap ⋮ → **Advanced** and tick **Network notification** to activate this feature.

Bluetooth

Activate the Bluetooth feature to exchange information over short distances.

On the Settings screen, tap **Bluetooth**, and then tap the **Bluetooth** switch to activate it.

To use more options, tap .

- **Visibility timeout:** Set duration that the device is visible.
- **Received files:** View received files via Bluetooth.
- **Rename device:** Change the device name.
- **Help:** View help information for Bluetooth.

Tethering and Mobile hotspot

Use the device as a mobile hotspot to share the device's mobile data connection with other devices. Refer to [Tethering and Mobile hotspot](#) for more information.

On the Settings screen, tap **Tethering and Mobile hotspot**.

- **Mobile hotspot:** Use the mobile hotspot to share the device's mobile data connection with computers or other devices through the Wi-Fi network. You can use this feature when the network connection is not available.
- **USB tethering:** Use USB tethering to share the device's mobile data connection with a computer via USB. When connected to a computer, the device is used as a wireless modem for the computer.
- **Bluetooth tethering:** Use Bluetooth tethering to share the device's mobile data connection with computers or other devices via Bluetooth.

Flight mode

This disables all wireless functions on your device. You can use only non-network services.

On the Settings screen, tap **Flight mode**.

Data usage

Keep track of your data usage amount and customise the settings for the limitation.

On the Settings screen, tap **Data usage**.

- **Mobile data:** Set the device to use data connections on any mobile network.
- **Set mobile data limit:** Set a limit for mobile data usage.
- **Data usage cycle:** Set a monthly reset date to monitor data usage between periods.

To use more options, tap ⋮.

- **Data roaming:** Set the device to use data connections when you are roaming.
- **Restrict background data:** Set the device to disable sync in the background while using a mobile network.
- **Auto sync data:** Activate or deactivate auto-syncing of apps, such as calendar or email. You can select what information to sync for each account in **Settings** → **Accounts**.
- **Show Wi-Fi usage:** Set the device to show your data usage via Wi-Fi.
- **Mobile hotspots:** Select mobile hotspots to prevent apps that are running in the background from using them.

Location

Change settings for location information permissions.

On the Settings screen, tap **Location**, and then tap the **Location** switch to activate it.

- **Mode:** Select a method to collect your location data.
- **RECENT LOCATION REQUESTS:** View which apps request your current location information and their battery usage.
- **LOCATION SERVICES:** View the location services your device is using.
- **My places:** Set up profiles that will be used for specific locations when you use GPS, Wi-Fi, or Bluetooth features to find your current location.

More networks

Customise settings to control networks.

On the Settings screen, tap **More networks**.

Default messaging app

Select the default app to use for messaging.

Mobile networks

- **Mobile data:** Set the device to use data connections on any mobile network.
- **Data roaming:** Set the device to use data connections when you are roaming.
- **Access Point Names:** Set up access point names (APNs).
- **Network mode:** Select a network type.
- **Network operators:** Search for available networks and select a network for roaming.

VPN

Set up and connect to virtual private networks (VPNs).

CONNECT AND SHARE

NFC

Activate the NFC feature to read or write NFC tags that contain information.

On the Settings screen, tap **NFC**, and then tap the **NFC** switch to activate it.

- **Android Beam:** Turn on the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.
- **S Beam:** Activate the S Beam feature to send data, such as videos, images, and documents, to devices that support NFC and Wi-Fi Direct.
- **Tap and pay:** Set the default payment app for mobile payments.

The payment services list may not include all available payment apps.

Nearby devices

Change settings for sharing content when you connect the device to nearby devices.

On the Settings screen, tap **Nearby devices**, and then tap the **Nearby devices** switch to activate it.

- **DEVICE NAME:** View the media server name for your device.
- **Content to share:** Set the device to share your content with other devices.
- **Allowed devices:** View the list of devices that can access your device.
- **Denied devices:** View the list of devices that are blocked from accessing your device.
- **Download to:** Select a memory location for saving media files.
- **Download from other devices:** Set the device to accept uploads from other devices.

Printing

Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files via Wi-Fi or cloud services.

On the Settings screen, tap **Printing**.

Screen Mirroring

Activate the screen mirroring feature and share your display with others.

On the Settings screen, tap **Screen Mirroring**.

SOUND AND DISPLAY

Sound

Change settings for various sounds on the device.

On the Settings screen, tap **Sound**.

- **Sound mode:** Set the device to use sound mode or silent mode.
- **Volume:** Adjust the volume level for call ringtones, music and videos, system sounds, and notifications.
- **Ringtones:** Add or select a ringtone for incoming calls.
- **Vibrations:** Add or select a vibration pattern.
- **Notifications:** Select a ringtone for events, such as incoming messages and missed calls.
- **Vibrate when ringing:** Set the device to vibrate and play a ringtone for incoming calls.
- **Dialling keypad tone:** Set the device to sound when you tap the buttons on the keypad.
- **Touch sounds:** Set the device to sound when you select an app or option on the touch screen.
- **Screen lock sound:** Set the device to sound when you lock or unlock the touch screen.
- **Sound when tapped:** Set the device to sound when a key is touched.
- **SAMSUNG APPLICATIONS:** Change the notification settings for each app.
- **Music effects:** Select a sound effect to apply when you adjust to music.

Display

Change the display settings.

On the Settings screen, tap **Display**.

- **Brightness:** Set the brightness of the display.
- **Font:**
 - **Font style:** Change the font type for display text.
 - **Font size:** Change the font size.
- **Screen rotation:** Set the content to rotate automatically when the device is turned.
 - **Smart rotation:** Set the interface not to rotate according to the orientation of your face.
- **Smart stay:** Set the device to prevent the display backlight from turning off while you are looking at the display.
- **Screen timeout:** Set the length of time the device waits before turning off the display's backlight.
- **Screen mode:**
 - **Adapt Display:** Use this mode for optimising the display according to the display settings.
 - **Dynamic:** Use this mode to make the display tone more vivid.
 - **Standard:** Use this mode for normal surroundings.
 - **Professional photo:** Use this mode to make the display tone look like real colours.
 - **Cinema:** Use this mode for dim surroundings, such as in a dark room.
- **Auto adjust screen tone:** Set the device to save power by adjusting the brightness of the display.
- **Daydream:** Set the device to launch a screensaver when the device is charging or connected to a desktop dock.

- **LED indicator:**
 - **Charging:** Set the device to turn on the notification light while the battery is charging.
 - **Low battery:** Set the device to turn on the notification light when the battery is low.
 - **Notifications:** Set the device to turn on the notification light when you have missed calls, messages, or notifications.
 - **Voice recording:** Set the device to turn on the notification light when you record voice memos.
- **Touch key light duration:** Set the duration that the Recent apps button and the Back button's backlight remains on.
- **Increase touch sensitivity:** Set the device to allow use of the touch screen with gloves on.

Depending on the type of material you wear while touching the device, some commands may not be recognised.

Wallpaper

Change the wallpaper settings.

On the Settings screen, tap **Wallpaper**.

- **Home screen:** Select a background image for the Home screen.
- **Lock screen:** Select a background image for the locked screen.
- **Home and lock screens:** Select a background image for the Home screen and the locked screen.

Lock screen

Change the settings for the locked screen.

On the Settings screen, tap **Lock screen**.

- **Screen lock:** Activate the screen lock feature. The following options may vary depending on the screen lock feature selected.
- **Dual clock:** Set the device to show the dual clock.

- **Clock size:** Change the clock size.
- **Show date:** Set the device to show the date with the clock.
- **Camera shortcut:** Set the device to show the camera shortcut on the locked screen.

This feature may not be available depending on the region or service provider.

- **Owner information:** Enter your information that is shown with the clock.
- **Unlock effect:** Select an effect that you see when you unlock the screen.
- **Additional information:** Set the device to display additional information on the locked screen.
- **Help text:** Set the device to show the help text on the locked screen.

Notification panel

Customise the items that appear on the notifications panel.

On the Settings screen, tap **Notification panel**.

- **Brightness adjustment:** Set the device to display the brightness adjustment bar on the notifications panel.
- **Recommended apps:** Set the device to display a list of recommended apps on the notifications panel based on your actions, such as connecting a headset to the device.
- **Set quick setting buttons:** Rearrange the quick setting buttons displayed on the notifications panel.

Toolbox

Set the device to use the toolbox.

On the Settings screen, tap **Toolbox**, and then tap the **Toolbox** switch to activate it.

- **APPLICATIONS:** View the apps list to display in the toolbox.
- **Edit:** Select the apps to display in the toolbox.

PERSONALISATION

Easy mode

Set the device to easy mode.

On the Settings screen, tap **Easy mode**.

- **Standard mode:** Set the device to standard mode.
- **Easy mode:** Set the device to easy mode.
- **EASY APPLICATIONS:** Select apps to apply simpler layouts.

Accessibility

Use this feature to improve accessibility to the device. Refer to [About Accessibility](#) for more information.

On the Settings screen, tap **Accessibility**.

Blocking mode

Select which notifications will be blocked or set to allow notifications for calls from specified contacts in blocking mode.

On the Settings screen, tap **Blocking mode**, and then tap the **Blocking mode** switch to activate it.

Private mode

Set the device to prevent others from accessing your personal content by activating private mode.

On the Settings screen, tap **Private mode**, and then tap the **Private mode** switch to activate it.

- **Unlock method:** Set or change the unlock method to activate private mode.

Finger Scanner

Register your fingerprint to the device to secure the device or sign in to your Samsung account.

On the Settings screen, tap **Finger Scanner**.

- **Fingerprint manager:** Register or delete fingerprint information.
- **Change alternative password:** Change the alternative password to use if the device does not recognise the fingerprint.
- **Screen lock:** Set an unlock method and an alternative password.
- **Verify Samsung account:** Set the device to verify your Samsung account with fingerprints.
- **Pay with PayPal:** Set the device to verify your PayPal account and to authorise purchases using your fingerprints.

This feature may not be available depending on the region or service provider.

MOTION

Motions and gestures

Activate the motion recognition feature and change the settings that control motion recognition on your device.

On the Settings screen, tap **Motions and gestures**.

- **Direct call:** Set the device to make a voice call by picking up and holding the device near your ear while viewing call, message, or contact details.
- **Smart alert:** Set the device to alert you if you have missed calls or new messages when you pick up the device.
- **Mute/Pause:** Set the device to mute incoming calls or alarms, or to pause media playback by using palm motions or looking away from the screen.
 - **Covering screen with hand:** Set the device to mute incoming calls or alarms, or to pause media playback when you cover the screen with your palm.
 - **Turning device over:** Set the device to mute incoming calls or alarms, or to pause media playback by placing the device face down.

- **Palm swipe to capture:** Set the device to capture a screenshot when you sweep your hand to the left or right across the screen.

Air view

Hover over an item or the screen with your finger to preview content or view information in a pop-up window.

On the Settings screen, tap **Air view**, and then tap the **Air view** switch to activate it.

USER AND BACKUP

Accounts

Add email or SNS accounts.

On the Settings screen, tap **Accounts**.

Cloud

Change settings for syncing data or files with your Samsung account or Dropbox cloud storage.

On the Settings screen, tap **Cloud**.

Backup and reset

Change the settings for managing settings and data.

On the Settings screen, tap **Backup and reset**.

- **Back up my data:** Set the device to back up settings and app data to the Google server.
- **Backup account:** Set up or edit your Google backup account.
- **Automatic restore:** Set the device to restore settings and app data when the apps are reinstalled on the device.
- **Factory data reset:** Reset settings to the factory default values and delete all data.

SYSTEM

Language and input

Change the settings for text input. Some options may not be available depending on the selected language.

On the Settings screen, tap **Language and input**.

Language

Select a display language for all menus and apps.

Default

Select a default keyboard type for text input.

Samsung keyboard

To change the Samsung keyboard settings, tap .

The available options may vary depending on the region or service provider.

- **English(UK):** Select a default keyboard layout.
- **Select input languages:** Select languages for text input.
- **Predictive text:** Activate predictive text mode to predict words based on your input and show word suggestions. You can also customise the word prediction settings.
- **Auto replacement:** Set the device to correct misspelled and incomplete words by tapping the space bar or punctuation mark.
- **Auto capitalisation:** Set the device to automatically capitalise the first character after a final punctuation mark, such as a full stop, question mark, or exclamation mark.
- **Auto spacing:** Set the device to automatically insert a space between words.
- **Auto-punctuate:** Set the device to insert a full stop when you double-tap the space bar.

- **Keyboard swipe:**
 - **None:** Set the device to deactivate the keyboard swipe feature.
 - **Continuous input:** Set the device to enter text by sweeping on the keyboard.
 - **Cursor control:** Enable the smart keyboard navigation feature to move the cursor by scrolling the keyboard.
 - **Flick input:** Enable or disable the keyboard to enter numbers or symbols when you tap and hold a key, and then flick your finger upwards.
- **Sound:** Set the device to sound when a key is touched.
- **Character preview:** Set the device to display a large image of each character tapped.
- **Tap and hold delay:** Set the recognition time for tapping and holding the screen.
- **Reset settings:** Reset Samsung keyboard settings.

Google voice typing

To change the voice input settings, tap .

- **Choose input languages:** Select languages for text input.
- **Block offensive words:** Set the device to prevent the device from recognising offensive words in voice inputs.
- **Offline speech recognition:** Download and install language data for offline voice input.

Voice search

- **Language:** Select a language for voice recognition.
- **“Ok Google” hotword detection:** Set the device to begin voice recognition when you say the wake-up command while using the search app.

This feature may not be available depending on the region or service provider.

- **Speech output:** Set the device to provide voice feedback to alert you to the current action.
- **Block offensive words:** Hide offensive words from voice search results.
- **Offline speech recognition:** Download and install language data for offline voice input.

- **Personalised recognition:** Set the device to use information from your Google dashboard to improve speech recognition accuracy.
- **Bluetooth headset:** Set the device to allow voice input of search keywords via the Bluetooth headset microphone when a Bluetooth headset is connected.

Text-to-speech options

- **PREFERRED TTS ENGINE:** Select a speech synthesis engine. To change the settings for speech synthesis engines, tap ⚙️.
- **Speech rate:** Select a speed for the text-to-speech feature.
- **Listen to an example:** Listen to the spoken text for an example.
- **Default language status:** View the status of the default language for the text-to-speech feature.

Notification readout

Set the device to read aloud notifications when you have incoming calls, messages, or events.

Pointer speed

Adjust the pointer speed for the mouse or trackpad connected to your device.

Date and time

Access and alter the following settings to control how the device displays the time and date.

On the Settings screen, tap **Date and time**.

If the battery remains fully discharged or removed from the device, the time and date is reset.

- **Automatic date and time:** Automatically update the time and date when moving across time zones.
- **Set date:** Set the current date manually.
- **Set time:** Set the current time manually.
- **Automatic time zone:** Set the device to receive time zone information from the network when you move across time zones.
- **Select time zone:** Set the home time zone.
- **Use 24-hour format:** Display time in 24-hour format.
- **Select date format:** Select a date format.

Safety assistance

Activate emergency mode and set primary contacts and messages. Refer to [Emergency mode](#) for more information.

On the Settings screen, tap **Safety assistance**.

- **Emergency mode:** Set the device to activate emergency mode and reduce battery consumption by using basic functions, such as calling.
- **Geo News:** Set the device to receive notifications for severe weather conditions.

This feature may not be available depending on the region or service provider.

- **Send help messages:** Set the device to send help messages by pressing the Power button three times.
 - **Send pictures:** Set the device to send photos taken by the front and rear cameras with the help message.

This feature may not be available depending on the region or service provider.

- **Send sound recording:** Set the device to record sound and send it along with the message to the recipients.
- **Manage primary contacts:** Select or edit the recipients for help messages.

Battery

View the amount of battery power consumed by your device.

On the Settings screen, tap **Battery**.

- **Display battery percentage:** Set the device to display the remaining battery life.

Power saving

Activate power-saving mode and change the settings for power-saving mode. Refer to [Power saving feature](#) for more information.

On the Settings screen, tap **Power saving**.

- **Power saving mode:** Activate power-saving mode and change the settings for power-saving mode.
 - **Restrict background data:** Set the device to prevent apps that are running in the background from using a mobile data connection.
 - **Restrict performance:** Set the device to limit various options, such as turning off the Recent apps button and the Back button's backlight.
 - **Greyscale mode:** Set the device to display colours on the screen as grey tones.
- **Ultra power saving mode:** Extend standby time and reduce battery consumption by displaying a simpler layout and allowing limited access to an app.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions.

Storage

View memory information for your device and memory card, or format a memory card.

On the Settings screen, tap **Storage**.

Formatting a memory card permanently deletes all data from it.

The actual available capacity of the internal memory is less than the specified capacity because the operating system and default apps occupy part of the memory. The available capacity may change when you upgrade the device.

Security

Change settings for securing the device and the SIM or USIM card.

On the Settings screen, tap **Security**.

- **Encrypt device:** Set a password to encrypt data saved on the device. You must enter the password each time you turn on the device.

Charge the battery before enabling this setting because it may take more than an hour to encrypt your data.

- **Encrypt external SD card:** Set the device to encrypt files on a memory card.

If you reset your device to the factory defaults with this setting enabled, the device will not be able to read your encrypted files. Disable this setting before resetting the device.

- **Remote controls:** Set the device to allow control of your lost or stolen device remotely via the Internet. To use this feature, you must sign in to your Samsung account.
 - **ACCOUNT REGISTRATION:** Add or view your Samsung account.
 - **Use wireless networks:** Set the device to allow location data collection or to determine the location of your lost or stolen device via Wi-Fi or mobile networks.
- **SIM change alert:** Activate or deactivate the Find my mobile feature which helps locate the device when lost or stolen.
- **Go to website:** Access the Find my mobile website (findmymobile.samsung.com). You can track and control your lost or stolen device from the Find my mobile website.
- **Set up SIM card lock:**
 - **Lock SIM card:** Activate or deactivate the PIN lock feature to require the PIN before using the device.
 - **Change SIM PIN:** Change the PIN used to access SIM or USIM data.

- **Make passwords visible:** Set the device to display passwords as they are entered.
- **Device administrators:** View device administrators installed on the device. You can allow device administrators to apply new policies to the device.
- **Unknown sources:** Set the device to allow the installation of apps from unknown sources.
- **Verify apps:** Set the device to allow Google to check the apps for harmful content before installing them.
- **Security policy updates:** Set the device to check and download security updates.
- **Send security reports:** Set the device to automatically send the updated security reports to Samsung.
- **Storage type:** Set a storage type for credential files.
- **Trusted credentials:** Use certificates and credentials to ensure secure use of various apps.
- **Install from device storage:** Install encrypted certificates stored on the USB storage.
- **Clear credentials:** Erase the credential contents from the device and reset the password.

Help

View help information to learn how to use the device and apps or configure important settings.

On the Settings screen, tap **Help**.

About device

Access device information, edit the device name, or update device software.

On the Settings screen, tap **About device**.

APPLICATIONS

Application manager

View and manage the apps on your device.

On the Settings screen, tap **Application manager**.

Default applications

Select a default setting for using apps.

On the Settings screen, tap **Default applications**.

Call

Customise the settings for calling features.

On the Settings screen, tap **Call**.

- **Call rejection:** Reject calls from specified phone numbers automatically. Add phone numbers to the reject list.
- **Answering and ending calls:**
 - **Pressing the home key:** Set the device to answer a call when you press the Home button.
 - **Using voice commands:** Set the device to answer or reject a call with voice commands.
 - **Pressing the power key:** Set the device to end a call when pressing the Power button.

- **Call-related pop-ups:**
 - **Call notification pop-ups:** Set the device to display a pop-up window when you receive an incoming call while using apps.
 - **In-call status pop-ups:** Set the device to display a pop-up window that shows the status of a call while using apps.
- **Show caller information:** Set the device to display the caller's recent social networking activity when a call comes in.
- **Call alerts:**
 - **Vibrate when answered:** Set the device to vibrate when the other party answers a call.
 - **Vibrate when call ends:** Set the device to vibrate when the other party ends a call.
 - **Call connect tone:** Activate or deactivate the call connection tone.
 - **Minute minder:** Activate or deactivate the minute minder tone.
 - **Call end tone:** Activate or deactivate the call disconnection tone.
 - **Notify during calls:** Set the device to alert you to events during a call.
- **Call accessories:**
 - **Automatic answering:** Set the device to answer a call automatically when a headset is connected.
 - **Automatic answering timer:** Set the length of time the device waits before answering a call.
 - **Outgoing call conditions:** Set the device to allow outgoing calls with a Bluetooth headset when the device is locked.
 - **Outgoing call types:** Select the type of outgoing calls to make when using a Bluetooth headset.

- **More settings:**
 - **Caller ID:** Display your caller ID to other parties for outgoing calls.
 - **Call forwarding:** Divert incoming calls to another number.
 - **Auto area code:** Set the device to automatically insert a prefix (area or country code) before a phone number.
 - **Call barring:** Block incoming or outgoing calls.
 - **Call waiting:** Allow incoming call alerts when a call is in progress.
 - **Auto redial:** Activate auto redial for calls that were not connected or that were cut off.
 - **Fixed Dialling Numbers:** Activate or deactivate FDN mode to restrict calls to numbers in the FDN list. Enter the PIN2 supplied with your SIM or USIM card.
- **Ringtones and keypad tones:**
 - **Ringtones:** Add or select a ringtone for incoming calls.
 - **Vibrations:** Add or select a vibration pattern.
 - **Vibrate when ringing:** Set the device to vibrate and play a ringtone for incoming calls.
 - **Dialling keypad tone:** Set the device to sound when buttons on the keypad are tapped.
- **Personalise call sound:** Select or personalise the sound quality used during calls when a headset is connected.
- **Hide my video:** Select an image to be shown to the other party.
- **Service provider:** Select your voicemail service provider.
- **Voicemail settings:** Enter the number to access the voicemail service. Obtain this number from the service provider.
- **Ringtones:** Select a ringtone for new voicemails.
- **Vibrate:** Set the device to vibrate when voicemails are received.
- **Accounts:** Set the device to accept IP calls and set up your accounts for IP call services.
- **Use Internet calling:** Set whether to use IP call services for all calls or only for IP calls.

Contacts

Change settings for using contacts.

On the Settings screen, tap **Contacts**.

- **Import/export:** Import or export contacts.
- **Contacts to display:** Select which contacts to display.
- **Swipe to call or send msg:** Set the device to make a call or send a message when you drag a contact to the left or right in the contacts list.
- **Only contacts with phones:** Set the device to display contacts that only have a phone number.
- **Sort by:** Select an option for sorting contacts.
- **Display contacts by:** Select an option for displaying contact names.
- **Send contact information:** Select a method to share contacts.
- **Accounts:** Add or edit accounts to sync contacts with.

Email

Change settings for managing and sending emails.

On the Settings screen, tap **Email**.

- **Manage accounts:** Manage existing email accounts or add new accounts.
- **Display:** Change the settings for displaying emails.
- **Default display:** Set the device to open a specific screen after you delete emails.
- **Priority sender settings:** Change settings for priority senders.
- **Spam addresses:** Add email addresses to block.
- **Delay email sending:** Set the time the device waits before sending emails after you tap the send button.

Gallery

Change settings for using **Gallery**.

On the Settings screen, tap **Gallery**.

- **Sync via Wi-Fi only:** Set the device to sync content only when the Wi-Fi connection is activated.
- **Tag buddy:** Set the device to display contextual tags.
- **Face tag:** Register the faces in the image as face tags.

Internet

Change settings for using Internet.

On the Settings screen, tap **Internet**.

- **Account:** Sign in to a Samsung account.
- **Set homepage:** Set a default homepage.
- **Autofill forms:** Set the device to automatically enter user information, such as names or phone numbers when you fill out forms on webpages.
- **Privacy:** Manage personal data when visiting webpages.
- **Screen and text:** Change the settings, adjust the font size, and more when viewing webpages.
- **Content settings:** Change the settings for managing cookies from visiting webpages or set whether or not to display pop-up windows, and more.
- **Bandwidth management:** Change the bandwidth settings.

Messages

Change settings for using messages.

On the Settings screen, tap **Messages**.

- **Default messaging app:** Select the default app to use for messaging.
- **Display:** Change settings for the messaging window, such as the font size, background colour, and more.
- **Quick responses:** Add or edit the message template.
- **Text messages:** Change settings for text messages.
- **Multimedia messages:** Change settings for multimedia messages.
- **Delete old messages:** Set the device to delete old messages.
- **Priority senders:** Set the device to show priority senders list.
- **Push messages:** Set an interval for pop-up notifications that alert you to new messages.
- **Cell broadcast:** Set the device to receive cell broadcast messages.
- **Notifications:** Set the device to alert you to new messages.
- **Signature:** Set the device to display your signature on the message.
- **Spam filter:** Set the device to block messages from specific numbers or that contain certain words.
- **Delay message sending:** Set the time the device waits before sending messages after you tap the send button.
- **Safe mode:**
 - **Allow access to all links:** Set the device to allow to open the link on a message when you tap the link.
 - **Potential threat alerts:** Set the device to alert you when you install apps that support messaging feature to prevent phishing.

S Planner

Change settings for using **S Planner**.

On the Settings screen, tap **S Planner**.

- **First day of week:** Select the first day of a week.
- **Show week numbers:** Set the device to display the number of weeks in a year.
- **Hide declined events:** Set the device to hide expired events.
- **Hide completed tasks:** Set the device to hide completed tasks.
- **Weather:** Set the device to display the weather forecast.
- **Lock time zone:** Set the device to leave the time zone setting unchanged when moving across time zones.
- **Select time zone:** Select the time zone.
- **View today according to:** Set the calendar to use your home time zone or a selected time zone.
- **Select alert type:** Select the notification settings for events.
- **Notification sound:** Select a ringtone for events or tasks.
- **Vibration:** Set the device to vibrate to alert you to events or tasks.
- **Quick responses:** Create templates for sending messages to event participants.

S Voice

Change settings for voice recognition.

On the Settings screen, tap **S Voice**.

- **Language:** Select a language for voice recognition.
- **Hide offensive words:** Hide offensive words from voice search results.
- **About:** View version information.
- **Open via the home key:** Set the device to launch **S Voice** when you press the Home button twice.
- **Voice wake-up:** Set the device to start voice recognition by saying a wake-up command while using **S Voice**.
- **Auto start speakerphone:** Set the device to automatically turn on the speakerphone when making a call with **S Voice**.

- **Show body of message:** Set the device to display the text of a new message.
- **Check missed events:** Set the device to launch **S Voice** and alert you to missed notifications when a headset is connected and you press the headset button.
- **Personal briefing:** Set the device to display events saved in **S Planner** while using **S Voice**.
- **Erase S Voice data:** Delete the data used by **S Voice** from the **S Voice** server.
- **Home address:** Enter your home address to use location information with the voice command feature.
- **Log in to Facebook:** Enter your Facebook account information to use Facebook with **S Voice**.
- **Sign in to Twitter:** Enter your Twitter account information to use Twitter with **S Voice**.

Accessibility

About Accessibility

Accessibility menus are special features for those with certain physical disabilities, such as poor eyesight or hearing impairment. You can use the following features:

- TalkBack
- Changing the font size
- Magnifying the screen
- Notification reminders
- Reversing the display colours
- Colour adjustment
- Turning off all sounds
- Flash notification
- Adjusting the sound balance
- Mono audio mode
- Customising caption settings
- Assistive menus
- Setting tap and hold delay options
- Interaction control mode
- Changing the method of answering or ending calls
- Single tap mode
- Managing accessibility settings

To use accessibility menus, on the Apps screen, tap **Settings** → **Accessibility**.

Using the Home button to open accessibility menus

You can access the following accessibility menus by pressing the Home button three times quickly.

- Accessibility
- TalkBack
- Negative colours
- Interaction control

On the Apps screen, tap **Settings** → **Accessibility** → **Direct access**, and then tap the **Direct access** switch to activate it. Then, select an accessibility menu to open when you press the Home button three times quickly.

If you select more than one menu, the device displays a pop-up window asking which menu to use each time you press the Home button three times quickly. To enable **Interaction control** on the accessibility menus, activate the feature. On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Interaction control**, and then tap the **Interaction control** switch to activate it.

Voice feedback (TalkBack)

Activating or deactivating TalkBack

When you activate TalkBack, the device reads aloud the text on the screen or selected features. This feature is useful if you have difficulty viewing the screen.

1 On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack**.

2 Tap the **TalkBack** switch to activate it.

To deactivate TalkBack, tap the **TalkBack** switch and tap anywhere on the screen twice quickly.

3 Tap **OK**.

To deactivate TalkBack, tap **OK** and tap anywhere on the screen twice quickly.

When you activate TalkBack, the device provides voice feedback and reads aloud the features you select. Also, the device provides voice feedback when the screen turns off, when you have new notifications, and more.

When you activate **Explore by touch** while using TalkBack, the device reads selected items aloud. Firstly, the device reads aloud items on the screen when you tap them. Then, the device will perform the function or open the app if you tap anywhere on the screen twice quickly. If **Explore by touch** is deactivated, the device cannot perform various features that require finger gestures.

To activate **Explore by touch**, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings**, and then tick **Explore by touch**.

Some features are not available while you are using TalkBack.

Controlling the screen with finger gestures

You can use various finger gestures to control the screen while you are using TalkBack. If **Explore by touch** is deactivated, the device cannot perform some of the features that require finger gestures.

To activate **Explore by touch**, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings**, and then tick **Explore by touch**.

- Exploring the screen: Place a finger on the screen and move your finger to explore the screen. Select and hold on an item and the device reads aloud the item. When you release your finger, the item under your finger is selected.
- Selecting items: Tap an item to select it. Or, select and hold on an item while exploring the screen, and then release your finger.
- Opening the selected item: While selected items are read aloud, when you hear the item you want, release your finger from the item. Then, tap anywhere on the screen twice quickly.
- Selecting the previous item: Scroll quickly upwards or to the left on the screen with one finger.

- Selecting the next item: Scroll quickly downwards or to the right on the screen with one finger.
- Scrolling the lists: Scroll the screen upwards or downwards with two fingers.
- Returning to the previous page: Scroll the screen to the right with two fingers.
- Moving to the next page: Scroll the screen to the left with two fingers.
- Unlocking the screen: Scroll the screen in any direction within the locked screen area with two fingers.
- Opening the notifications panel: Drag the top of the screen downwards with two fingers.
- Opening the quick setting panel: Drag the top of the screen downwards with three fingers.

You can configure finger gesture settings for TalkBack in **Manage gestures**. Refer to [Configuring finger gesture settings](#) for more information.

Configuring finger gesture settings

When you use TalkBack, you can perform actions using finger gestures. You can perform actions such as, returning to the previous screen, opening the Home screen, and more. Configure finger gestures before using them.

Configuring settings for vertical gestures

You can use two-part vertical gestures by dragging your finger upwards and downwards from the bottom of the screen, or vice versa.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings** → **Manage gestures** → **Two-part vertical gestures**. Then, select one of the following features:

- **Move to the first and last items on screen:** When you drag your finger upwards and then downwards on the screen, the first item at the top of the screen is selected. When you drag your finger downwards and then upwards on the screen, the last item at the bottom of the screen is selected.
- **Cycle through reading granularities:** When you drag your finger upwards and then downwards on the screen, the reading unit changes. The reading unit changes to page, paragraph, line, word, character, and default. When you drag your finger downwards and then upwards on the screen, the reading units change in reverse order.

Configuring settings for shortcut gestures

Use this feature to configure eight shortcut gestures. You can configure gestures such as, dragging your finger upwards and then to the right without releasing it, and more. You can change shortcut gestures or assign features to empty shortcuts.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings** → **Manage gestures**. Select a gesture, and then assign a feature to it.

The following features are available:

- **Back button:** Return to the previous screen.
- **Home button:** Open the Home screen.
- **Recent apps button:** Open the list of recently-used apps.
- **Open notifications:** Open the notifications panel.
- **Open global context menu:** Open the global contextual menu. Tap and hold the screen to open the circular global contextual menu. You can use features, such as **Quick navigation**, **Read from top**, **Spell last utterance**, and **Read from next item**. Then, explore menus by drawing a circle with your finger without releasing it. When you find the menu you want, release your finger from the menu to select it.

Tap **Pause feedback** at the top left of the screen to pause voice feedback.

Tap **TalkBack Settings** at the top right of the screen to access the TalkBack settings. Refer to [Configuring settings for TalkBack](#) for more information.

- **Open local context menu:** Open the local contextual menu. You can select a unit for reading text on the screen. When you use this feature while entering text, contextual menus, such as the cursor control menu, are available. Tap and hold the screen to open the circular contextual menu. Then, explore menus by drawing a circle with your finger without releasing it. When you find the menu you want, release your finger from the menu to select it.
- **Read from top:** Read items aloud from the first item to the last item in order.
- **Read from next item:** Read items aloud starting from the item next to the selected item in order.

Changing reading units

When you use TalkBack, you can listen to the text on the screen. You can drag your finger up, down, left, or right to select the text you want. By default, the device reads text aloud in the selected area. Or, you can set the device to read text in other reading units, such as lines or paragraphs.

Changing reading units by using the local contextual menu

- 1 Select some text to read.
- 2 Drag your finger upwards, and then to the right without releasing it to open the local contextual menu.
- 3 Tap and hold the screen and draw a circle with your finger to explore menus. Then, release your finger when you hear **Change granularity**.
- 4 Tap and hold the screen again and draw a circle with your finger to explore menus. Then, release your finger when you hear the reading unit you want.

To change the shortcut gesture to open the local contextual menu, refer to [Configuring settings for shortcut gestures](#).

Changing reading units using two-part vertical gestures

When you drag your finger upwards and then downwards on the screen, the reading unit changes. The reading unit changes to page, paragraph, line, word, character, and then default. When you drag your finger downwards and then upwards on the screen, the reading units change in reverse order.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings** → **Manage gestures** → **Two-part vertical gestures** → **Cycle through reading granularities**.

You can listen to the text next to the currently-selected text using the current reading unit. To listen to the next section of text, drag your finger downwards or to the right on the screen. Also, you can listen to the text before the currently-selected text using the current reading unit. To listen to the previous section of text, drag your finger upwards or to the left on the screen.

Pausing TalkBack

Open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. When you select **Pause feedback** at the top left of the screen, TalkBack pauses.

When TalkBack is paused, you can resume it by turning on the screen or other methods. To change the method of resuming TalkBack, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings** → **Resume from suspend**. Then, select an option.

To change the shortcut gesture to open the global contextual menu, refer to [Configuring settings for shortcut gestures](#).

Using the quick navigation feature

With the quick navigation feature, you can access menus by drawing a circle on the screen without scrolling up or down to select an item.

Open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menus. Then, release your finger when you hear **Quick navigation**. Tap the screen again and draw a circle around the menu with your finger to explore the menus. Then, release your finger when you hear the menu you want.

Adding and managing image labels

You can assign labels to images on the screen. The device reads aloud the labels when the images are selected. Add labels to unlabelled images by using the local contextual menu.

Open the local contextual menu by dragging your finger upwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menus. When you hear the add label menu, release your finger to add labels.

To view the labels, on the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings** → **Manage customised labels**.

Configuring settings for TalkBack

Configure settings for TalkBack for your convenience.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **TalkBack** → **Settings**.

Alternatively, open the global contextual menu by dragging your finger downwards and then to the right on the screen without releasing it. Then, drag your finger to the top right of the screen and release it when you hear **TalkBack Settings**.

- **Speech volume:** Adjust the volume level for voice feedback.

Voice feedback volume can vary depending on the media volume. To adjust the media volume, press the Volume button up or down while listening to voice feedback. Or, on the Apps screen, tap **Settings** → **Sound** → **Volume**, and then drag the volume adjustment bar for the media content to the left or right.

- **Use pitch changes:** Set the device to read aloud text at a low pitch when it is entered using a keyboard.
- **Keyboard echo:** Set the device to read aloud text or symbols entered using a keyboard. You can also set the type of keyboard to apply this feature to.
- **Speak when screen is off:** Set the device to provide voice feedback when the screen is turned off.
- **Use proximity sensor:** Set the device to pause voice feedback when you place your hand over the sensor at the top of the device. To resume voice feedback, tap the screen.
- **Shake to start continuous reading:** Set the device to read aloud the text displayed on the screen when you shake the device. You can select from various shaking speeds.
- **Speak caller ID:** Set the device to read the caller's name aloud when you have an incoming call.
- **Vibration feedback:** Set the device to vibrate when you explore the screen.
- **Sound feedback:** Set the device to emit a sound when you control the screen, such as scrolling the screen, and more.

- **Focus speech audio:** Set the device to turn the media volume down when the device reads an item aloud.
- **Sound volume:** Adjust the volume that sound is played when you touch the screen to control it. This feature is available when **Sound feedback** is selected.
- **Explore by touch:** Set the device to read aloud the items under your finger. For example, when you tap **Apps** on the Home screen with your finger, the device reads out “**Apps**”. To select **Apps**, release your finger from it and tap anywhere on the screen twice quickly. You can move to the page you want by scrolling the screen left or right with two fingers. To learn about controlling the screen using the explore by touch feature, refer to [Controlling the screen with finger gestures](#) for more information.
- **Automatically scroll lists:** Set the device to automatically scroll through the rest of the list not displayed on the screen and read the items aloud.
- **Single-tap selection:** Set the device to open the selected item by tapping it once.
- **Launch “Explore by touch” tutorial:** View the tutorial about using the Explore by touch feature.
- **Manage gestures:** Assign actions to perform using finger gestures. Refer to [Configuring finger gesture settings](#) for more information.
- **Manage customised labels:** View the labels you added.
- **Resume from suspend:** Select a method to resume voice feedback.
- **Developer settings:** Set options for app development.

Using the device with the screen turned off

Set the device to turn the screen off at all times to keep the content on your screen private. The screen does not turn on when you press external buttons or tap the screen. Also, currently-activated features do not turn off.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Dark screen**. You can activate or deactivate this feature by pressing the Power button twice.

Using the rapid key input feature

Set the device to enter a character when you release your finger from the character on the keyboard. You can use this feature to enter characters instead of releasing your finger and double-tapping on the screen.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Rapid key input**.

Reading passwords aloud

Set the device to read the password aloud when you enter the password while TalkBack is activated. Use this feature to make sure that you are entering the right password.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Speak passwords**.

Setting text-to-speech features

Change the settings for text-to-speech features used when TalkBack is activated, such as languages, speed, and more.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Text-to-speech options**, and then use the following functions:

- **Samsung text-to-speech engine / Google Text-to-speech engine:** Select an engine for the text-to-speech feature.
- **Speech rate:** Select a speed for the text-to-speech feature.
- **Listen to an example:** Listen to the spoken text for an example. If the device cannot read examples aloud, tap  → **Install voice data** to download and install voice data for the text-to-speech feature.
- **Default language status:** View the status of the current language set for the text-to-speech feature.

Entering text using the keyboard

To display the keyboard, tap the text input field, and then tap anywhere on the screen twice quickly.

When you touch the keyboard with your finger, the device reads aloud the character buttons under your finger. When you hear the character you want, release your finger from the screen to select it. The character is entered and the device reads the text aloud.

If **Rapid key input** is not activated, release your finger from the character you want, and then tap anywhere on the screen twice quickly. To activate the rapid input feature, on the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Rapid key input**.

Entering additional characters

Tap and hold a button on the keyboard. If additional characters are available via the button, a pop-up window appears above the keyboard showing the characters. To select a character, drag your finger on the screen until you hear the character you want, and then release it.

Changing the input language

To add input languages, on the Apps screen, tap **Settings** → **Language and input**. Then, tap  next to **Samsung keyboard** → **Select input languages** and select the languages to use.

To change the input language, tap , and then tap anywhere on the screen twice quickly.

Editing text

Use the local contextual menu to move the cursor or copy and paste text.

Open the local contextual menu by dragging your finger upwards and then to the right on the screen without releasing it. Tap and hold the screen and draw a circle around the menu with your finger to explore the menu. Then, release your finger when you hear **Change granularity**. Tap the screen again and draw a circle around the menu to explore the menus. Then release your finger when you hear the reading unit you want.

When you edit text, set the reading unit to either word or character for your convenience. In selection mode, the device selects text according to the reading unit you selected.

Drag your finger up, down, left, or right to listen to the text. When the text you want to edit is read aloud, use the following actions:

- Deleting text: Tap the delete button on the keyboard.
- Selecting text using selection mode: Activate selection mode to select and listen to the text. To activate selection mode, open the local contextual menu and select **Cursor control** → **Start selection mode**. Scroll to the left or right to listen to the text before or next to the currently-selected text. To deactivate selection mode, open the local contextual menu and select **Cursor control** → **End selection mode**.
- Selecting entire text: Open the local contextual menu and select **Cursor control** → **Select all**. All text in the document will be selected.
- Copying or cropping text: Select text using the local contextual menu. Then, open the local contextual menu and select **Cursor control**. Select **Copy** to copy the selected text or select **Cut** to cut the selected text. The selected text is copied to the clipboard.
- Pasting text: Place the cursor at the point where the text should be inserted, open the local contextual menu, and then select **Cursor control** → **Paste**.

Entering text by voice

You can enter text by voice. To display the keyboard, tap the text input field, and then tap anywhere on the screen twice quickly.

When you tap and hold , the device displays a pop-up window showing the keyboard options. Drag your finger on the screen without releasing it. When  is selected, release your finger. Then, say the words that you want to enter in the text field. The spoken words appear as text on the screen and the device reads them aloud.

To enter additional text, select the microphone button and say the words.

Changing the input language

While entering text by voice, select **English (UK)** and select a language to change the input language.

To add languages to the list, select **English (UK)** → **Add more languages**, deselect **Automatic**, and then select languages to use.

Changing the font size

Use this feature to change the font size. The device provides various font sizes to make the device more convenient for visually impaired users. Setting the font size to **Huge** may not be available in some apps.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Font size**.

Magnifying the screen

Use this feature to magnify the screen and to zoom in on a specific area.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Magnification gestures**, and then tap the **Magnification gestures** switch to activate it.

- Zooming in and out: Tap the screen three times quickly to zoom in on a specific area. Tap the screen three times quickly again to return.
- Exploring the screen by scrolling: Use two fingers to scroll through the magnified screen.
- Adjusting zoom ratio: Tap the screen with two fingers on the magnified screen. Then, spread two fingers apart or pinch them together to adjust the ratio.

- Keyboards on the screen cannot be magnified.
- When this feature is activated, the performance of some apps, such as **Phone** and **Calculator**, may be affected.

Setting notification reminders

Use this feature to alert you to notifications that you have not checked at the interval.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Notification reminder**, and then tap the **Notification reminder** switch to activate it.

To set an interval between alerts, tap **Reminder interval**.

Reversing the display colours

Use this feature to improve screen visibility and to help users recognise text on the screen more easily. When this feature is activated, the device displays a negative image that reverses the colours on the screen. Reversing the colours increases the contrast between black and white.

On the Apps screen, tap **Settings** → **Accessibility** → **Vision**, and then tick **Negative colours**.

Colour adjustment

Use this feature to adjust how colours are displayed on the screen if you have difficulty in distinguishing colours. The device changes the colours into more recognisable colours.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Vision** → **Colour adjustment**.
- 2 Tap the **Colour adjustment** switch to activate it.
- 3 Tap **Start**.
- 4 Arrange the colour tiles in order of similarity, starting from the base colour.
- 5 When you are finished adjusting the colours, tap **Done**.
If you can distinguish the colours, no more adjustment is required.
- 6 If the colours cannot be distinguished, tap **Camera** or **Image**.
- 7 Drag the colour adjustment bar to the left or right and tap **Done**.
To readjust the colour, tap **⋮** → **Readjust colour**.

Setting flash notification

Set the flash to blink when you have incoming calls, new messages, or notifications.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Flash notification**.

Turning off all sounds

Set the device to mute all device sounds, such as media sounds, and the caller's voice during a call.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Turn off all sounds**.

Caption settings

Samsung caption

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Samsung subtitles (CC)**, and then tap the **Subtitles (CC)** switch to activate it.

Use the following options:

- **Alignment:** Change the position of the caption.
- **Font:** Change the font type.
- **Size:** Change the font size.
- **Edge:** Change the edge of the subtitle text.
- **Font:** Change the colour and transparency of the text.
- **Background:** Change the colour and transparency of the caption box background.
- **Caption window:** Change the colour and transparency of the caption window.

Google caption

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Google subtitles (CC)**, and then tap the **Google subtitles (CC)** switch to activate it.

Use the following options:

- **Language:** Select a display language for the caption.
- **Text size:** Change the font size.
- **Caption style:** Change the caption style.

Adjusting the sound balance

Set the device to adjust the sound balance when using a headset.

To adjust the sound balance, connect a headset to the device. On the Apps screen, tap **Settings** → **Accessibility** → **Hearing** → **Sound balance**. Drag the adjustment bar to the left or right and adjust the sound balance, and then tap **Set**.

Mono audio

Set the device to switch the sound output from stereo to mono when a headset is connected. Mono output combines stereo sound into one signal that is played through all headset speakers. Use this if you have a hearing impairment or if a single earbud is more convenient.

On the Apps screen, tap **Settings** → **Accessibility** → **Hearing**, and then tick **Mono audio**.

Assistive menu

Displaying the assistive shortcut icon

Set the device to display the assistive shortcut icon. You can use the icon to access apps, features, and settings by tapping assistive menus in the icon. Control the device by tapping the assistive menus in the icon without exploring the screen. When this feature is launched, **Single tap mode** is activated.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**.
- 2 Tap the **Assistant menu** switch to activate it.
The assistive shortcut icon appears at the bottom right of the screen.
- 3 Tap **Dominant hand** to move the assistive shortcut icon to a convenient location.

Accessing assistive menus

The assistive shortcut icon appears as a floating icon for easy access to the assistive menus from any screen.

When you tap the assistive shortcut icon, the icon expands slightly and the assistive menus appear on the icon. Tap the up or down arrow to move to other panels or scroll the screen up or down to select other menus.

Using the cursor

On the assistive menu, tap **Cursor**. A cursor and a touch area where the cursor can be controlled are displayed on the screen. You can control the screen using small finger movements on the touch area. Drag your finger on the touch area to move the cursor. Also, tap the screen to select items under the cursor.

Use the following options:

-  / : Select an item or scroll left or right on the screen.
-  / : Scroll up or down the screen.
- : Move the touch area to another location.
- : Close the touch area.

To change the cursor settings, on the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**, tap the **Assistant menu** switch to activate it. Then, use options under **TOUCHPAD AND CURSOR SETTINGS**.

Using enhanced assistive menus

Set the device to display enhanced assistive menus for selected apps. For example, when you launch **Messages**, searching and composing functions appear on the assistive menu.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu** → **Assistant plus**, tap the **Assistant plus** switch to activate it, and then select apps.

Editing the assistive menus

You can use this feature to edit menus in the assistive shortcut icon.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Assistant menu**, tap the **Assistant menu** switch to activate it, and then tap **Edit**. To add or delete menus, tap  or .

Setting tap and hold delay options

Set the recognition time for tapping and holding the screen.

On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Tap and hold delay**, and then select an option.

Interaction control

Activate interaction control mode to restrict the device's reaction to inputs while using apps. Use this mode when you want to allow others only limited access to and control of your media or data.

- 1 On the Apps screen, tap **Settings** → **Accessibility** → **Dexterity and interaction** → **Interaction control**.
- 2 Tap the **Interaction control** switch to activate it.
- 3 Press and hold the Home button and the Volume button down simultaneously while using an app.
- 4 Adjust the size of the frame or draw a line around an area that you want to restrict.
- 5 Tap **Done**.

The device displays the restricted area. If you tap the screen or press buttons, such as the Home button, they will not work in this area.

To deactivate interaction control mode, press and hold the Home button and the Volume button down simultaneously.

Answering or ending calls

Change the method of answering or ending calls.

On the Apps screen, tap **Settings** → **Accessibility** → **Answering and ending calls**.

Use the following options:

- **Pressing the home key:** Set the device to answer a call when you press the Home button.
- **Using voice commands:** Set the device to answer a call with voice commands.
- **Pressing the power key:** Set the device to end a call when you press the Power button.

Using single tap mode

Set the device to control incoming calls or notifications by tapping the button instead of dragging it. When an alarm sounds or a call comes in, tap the button to stop the alarm or answer the call instead of dragging the button.

On the Apps screen, tap **Settings** → **Accessibility**, and then tick **Single tap mode**.

Managing accessibility settings

Saving accessibility settings in a file

Export the current accessibility settings in a file.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Import/Export**, select an export option, and then tap **OK**. The accessibility settings file is saved to the selected storage location.

Importing an accessibility settings file

Import an accessibility settings file and update the current settings.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Import/Export**, and then select an import option. Select a file to import and tap **Done** → **OK**. The accessibility settings will be updated according to the imported file.

Sharing accessibility settings files

Share accessibility settings files with others via email, Wi-Fi Direct, Bluetooth, and more.

On the Apps screen, tap **Settings** → **Accessibility** → **Manage accessibility** → **Share via**. Then, select accessibility files and tap **Done**. Select a sharing method and follow the on-screen instructions to share the files.

Viewing accessibility services

View accessibility services installed on the device.

On the Apps screen, tap **Settings** → **Accessibility**, and view the list of accessibility services available in **SERVICES**.

Using other useful features

- Using S Voice: You can use **S Voice** to perform various functions using voice commands. Launch **S Voice** and make calls, send messages, and view tasks. Refer to [S Voice](#) for more information.
- Searching by voice: Use voice commands to search for webpage content. Use this feature when you are on the move and cannot use your hands to enter text. Refer to [Voice Search](#) for more information.
- Using the notifications panel: Drag the status bar downwards to open the notifications panel. You can view missed calls, new messages, adjust the screen brightness, and more. Refer to [Notifications and quick setting panels](#) for more information.
- Switching to easy mode: Easy mode uses a simpler layout and large icons to provide an easy user experience. You can add frequently-used apps or shortcuts to the Home screen for easier access. Refer to [Easy mode](#) for more information.
- Using control motions: Control the device with palm motions or gestures. Refer to [Motions and gestures](#) for more information.
- Using the finger scanner: Register your fingerprints to the device to unlock the screen or verify the Samsung account password. Refer to [Finger Scanner](#) for more information.
- Using shortcuts to contacts: Add shortcuts to contacts on the Home screen to make calls or send messages more conveniently. Refer to [Adding shortcuts for contacts to the Home screen](#) for more information.
- Using the voice recorder: Record or play voice memos. Refer to [Voice Recorder](#) for more information.

Troubleshooting

Before contacting a Samsung Service Centre, please attempt the following solutions. Some situations may not apply to your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- Password: When the device lock feature is enabled, you must enter the password you set for the device.
- PIN: When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the Lock SIM card menu.
- PUK: Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
- PIN2: When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For more information, contact your service provider.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. For more information, contact your service provider.

Your device does not turn on

- When the battery is completely discharged, your device will not turn on. Fully charge the battery before turning on the device.
- The battery may not be inserted properly. Insert the battery again.
- Wipe both gold-coloured contacts and insert the battery again.

The touch screen responds slowly or improperly

- If you attach a protective cover or optional accessories to the touch screen, the touch screen may not function properly.
- If you are wearing gloves, if your hands are not clean while touching the touch screen, or if you tap the screen with sharp objects or your fingertips, the touch screen may malfunction.
- The touch screen may malfunction in humid conditions or when exposed to water.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, visit a Samsung Service Centre.

Your device freezes or has fatal errors

If your device freezes or hangs, you may need to close apps or reinsert the battery and turn on the device to regain functionality. If your device is frozen and unresponsive, press and hold the Power button and the Volume button down simultaneously for more than 7 seconds to restart it.

If this does not solve the problem, perform a factory data reset. On the Apps screen, tap **Settings** → **Backup and reset** → **Factory data reset** → **Reset device** → **Erase everything**. Before performing the factory data reset, remember to make backup copies of all important data stored in the device.

If the problem is still not resolved, contact a Samsung Service Centre.

Calls are not connected

- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialling.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If using a headset, ensure that it is properly connected.

Sound echoes during a call

Adjust the volume by pressing the Volume button or move to another area.

A cellular network or the Internet is often disconnected or audio quality is poor

- Ensure that you are not blocking the device's internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems due to issues with the service provider's base station. Move to another area and try again.
- When using the device while moving, wireless network services may be disabled due to issues with the service provider's network.

The battery icon is empty

Your battery is low. Recharge or replace the battery.

The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- If the battery terminals are dirty, the battery may not charge properly or the device may turn off. Wipe both gold-coloured contacts and try charging the battery again.
- The batteries in some devices are not user-replaceable. To have the battery replaced, visit a Samsung Service Centre.

The battery depletes faster than when first purchased

- When you expose the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption increases when you use messaging features or some apps, such as games or the Internet.
- The battery is consumable and the useful charge will get shorter over time.

Your device is hot to the touch

When you use apps that require more power or use apps on your device for an extended period of time, your device may feel hot to the touch. This is normal and should not affect your device's lifespan or performance.

Error messages appear when launching the camera

Your device must have sufficient available memory and battery power to operate the camera app. If you receive error messages when launching the camera, try the following:

- Charge the battery or replace it with a battery that is fully charged.
- Free some memory by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Centre.

Photo quality is poorer than the preview

- The quality of your photos may vary, depending on the surroundings and the photography techniques you use.
- If you take photos in dark areas, at night, or indoors, image noise may occur or images may be out of focus.

Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some memory by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate licence or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To confirm the file formats that your device supports, visit www.samsung.com.

- Your device supports photos and videos captured with the device. Photos and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorised by your network service provider or providers of additional services. Some content circulated on the Internet, such as ringtones, videos, or wallpapers, may not work properly.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).

If the tips above do not solve the problem, contact a Samsung Service Centre.

A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.
- Ensure that you have Samsung Kies or Windows Media Player 10 or higher installed on your computer.

Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored in the device has been lost

Always make backup copies of all important data stored in the device. Otherwise, you cannot restore data if it is corrupted or lost. Samsung is not responsible for the loss of data stored in the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.
